Both Scrum PSM-I self-assessment exams have similar features. They create an Scrum PSM-I actual test-like scenario, point out your mistakes, and offer customizable sessions.

## Scrum Professional Scrum Master I Sample Questions (Q42-Q47):

### NEW QUESTION # 42

Which of the following are roles on a Scrum Team? (Choose all that apply.)

- A. Customers
- B. Development Team
- C. Product Owner
- D. Users
- E. Scrum Master

**Answer: B,C,E**

Explanation:

According to the Scrum Guide, the Scrum Team consists of three roles: the Scrum Master, who coaches and facilitates the team; the Product Owner, who manages and prioritizes the Product Backlog; and the Development Team, who delivers a potentially releasable Increment at the end of each Sprint. Users and customers are not roles on the Scrum Team, but they are stakeholders who may provide feedback and input to the product.

### NEW QUESTION # 43

What are two good ways for the Development Team to make non-functional requirements visible? (Choose two.)

- A. Put them on a separate list on the Scrum board, available for all to see.
- B. Add them to the Product Backlog and keep the Product Owner posted on the expected effort.
- C. Run the integration and regression tests before the end of the Sprint, and capture the open work for the Sprint Backlog of the next Sprint.
- D. Add them to the definition of "Done" so the work is taken care of every Sprint.

**Answer: B,D**

### NEW QUESTION # 44

Which of the following services are appropriate for a Scrum Master in regard to the Daily Scrum?

- A. All of the above.
- B. Make sure that all 3 questions have been answered by each member of the team.
- C. Teach the Development Team to keep the Daily Scrum within the 15 minute time-box.
- D. Lead the discussions of the Development Team.
- E. Keep track of whether each team member has a chance to speak.

**Answer: C**

Explanation:

The correct answer is C, because one of the services that a Scrum Master can provide in regard to the Daily Scrum is to teach the Development Team to keep the Daily Scrum within the 15 minute time-box. The Scrum Guide states that "the Scrum Master ensures that the Development Team has the meeting, but the Development Team is responsible for conducting the Daily Scrum. The Scrum Master teaches the Development Team to keep the Daily Scrum within the 15-minute time-box."

### NEW QUESTION # 45

What are two good ways for a Scrum Team to ensure security concerns are satisfied? (Choose two.)

- A. Add security concerns to the definition of "Done".
- B. Have the Scrum Team create Product Backlog items for each concern.
- C. Postpone the work until a specialist can perform a security audit and create a list of security-related Product Backlog items.
- D. Delegate the work to the concerned department.
- E. Add a Sprint to specifically resolve all security concerns.

**Answer: A,B**

## NEW QUESTION # 46

Which of the following best describes an increment of working software?

- A. UML diagrams that describe how to deliver functionality in future iterations.
- B. An automated test suite to verify functionality delivered in previous iterations.
- **C. Additional features in a usable state that complement those delivered in previous iterations.**
- D. A new user interface design for functionality delivered in previous iterations.
- E. A decomposition of all Product Backlog items into tasks for future Sprint Backlog lists.

**Answer: C**

Explanation:

According to the Scrum Guide<sup>1</sup>, an Increment is a concrete stepping stone toward the Product Goal. Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together. In order to provide value, an Increment must be usable. Multiple Increments may be created within a Sprint. The sum of the Increments is presented at the Sprint Review thus supporting empiricism. However, an Increment may be delivered to stakeholders prior to the end of the Sprint. The Sprint Review should never be considered a gate to releasing value. Therefore, the best description of an increment of working software is additional features in a usable state that complement those delivered in previous iterations.

## NEW QUESTION # 47

.....

PracticeVCE's Scrum Certification PSM-I Exam testing exercises is very similar with real exam questions. If you choose PracticeVCE's testing practice questions and answers, we will provide you with a year of free online update service.
