

# Forescout FSCP 최신 업데이트 덤프 자료, FSCP 퍼펙트 덤프 공부문제

## Updated Forescout Certified Professional FSCP Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-forescout-certified-professional-fscp-certification-exam-educationry>

Exam dumps are available in the format for your exam. This questions dumps format is fairly easy and it is available on all smart devices. These actual questions and answers can easily be downloaded on the website. You can use it on your laptop or mobile and you can prepare Exam at your own convenience. When you have the exam dumps on your preferred device, then you are at ease of preparing for the exam at your own will.

You can use the latest and up-to-date real questions and answers for the Exam. If you want to have the understanding of different topics, then you need to use the best available practice dumps and this can help you in getting the Exam cleared with ease. These dumps always keep the exam syllabus up to date and that is the reason all the actual questions and answers are up to date to give worry-free exam preparation to the candidates.

Exam dumps professionals are fully aware of the fact that the syllabus for Exam need to be up to date. Updates for 90 days are provided to the candidate to allow the candidate to prepare exam from the up-to-date dumps. Up-to-dumps let the candidates have the best preparation and get successfully through the Exam. You can download these dumps from our website at any time you want. If you are satisfied with our service, then don't hesitate to make a purchase by clicking on the link given above this paragraph. You can download this dump directly from our site and start practicing for your exam. You will get a dump file that contains questions with answers along with explanations for those questions. Do not waste your time looking for other websites where that charge money for their downloads or even worse sell their study material online! It is the best choice for you if you are looking for preparation material to pass the exam. All you need is an internet connection and an efficient digital device.

ExamPassdump에서 제공해드리는 Forescout인증 FSCP덤프는 가장 출중한Forescout인증 FSCP시험전 공부자료입니다. 덤프품질은 수많은 IT인사들로부터 검증받았습니다. Forescout인증 FSCP덤프뿐만아니라 ExamPassdump에서는 모든 IT인증시험에 대비한 덤프를 제공해드립니다. IT인증자격증을 취득하려는 분들은ExamPassdump에 관심을 가져보세요. 구매의향이 있으시면 할인도 가능합니다. 고득점으로 패스하시면 지인분들께 추천도 해주실거죠?

## Forescout FSCP 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Plugin Tuning HPS: This section of the exam measures skills of plugin developers and endpoint integration engineers, and covers tuning the Host Property Scanner (HPS) plugin: how to profile endpoints, refine scanning logic, handle exceptions, and ensure accurate host attribute collection for enforcement.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Customized Policy Examples: This section of the exam measures skills of security architects and solution delivery engineers, and covers scenario based policy design and implementation: you will need to understand business case requirements, craft tailored policy frameworks, adjust for exceptional devices or workflows, and document or validate those customizations in context.</li> </ul>

주제 3	<ul style="list-style-type: none"> <li>Advanced Product Topics Licenses, Extended Modules and Redundancy: This section of the exam measures skills of product deployment leads and solution engineers, and covers topics such as licensing models, optional modules or extensions, high availability or redundancy configurations, and how those affect architecture and operational readiness.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Plugin Tuning Switch: This section of the exam measures skills of network switch engineers and NAC (network access control) specialists, and covers tuning switch related plugins such as switch port monitoring, layer 2</li> <li>3 integration, ACL or VLAN assignments via network infrastructure and maintaining visibility and control through those network assets.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>Notifications: This section of the exam measures skills of monitoring and incident response professionals and system administrators, and covers how notifications are configured, triggered, routed, and managed so that alerts and reports tie into incident workflows and stakeholder communication.</li> </ul>
주제 6	<ul style="list-style-type: none"> <li>General Review of FSCA Topics: This section of the exam measures skills of network security engineers and system administrators, and covers a broad refresh of foundational platform concepts, including architecture, asset identification, and initial deployment considerations. It ensures you are fluent in relevant baseline topics before moving into more advanced areas.]. Policy Best Practices: This section of the exam measures skills of security policy architects and operational administrators, and covers how to design and enforce robust policies effectively, emphasizing maintainability, clarity, and alignment with organizational goals rather than just technical configuration.</li> </ul>
주제 7	<ul style="list-style-type: none"> <li>Advanced Product Topics Certificates and Identity Tracking: This section of the exam measures skills of identity and access control specialists and security engineers, and covers the management of digital certificates, PKI integration, identity tracking mechanisms, and how those support enforcement and audit capability within the system.</li> </ul>
주제 8	<ul style="list-style-type: none"> <li>Plugin Tuning User Directory: This section of the exam measures skills of directory services integrators and identity engineers, and covers tuning plugins that integrate with user directories: configuration, mapping of directory attributes to platform policies, performance considerations, and security implications.</li> </ul>

## FSCP최신 업데이트 덤프자료 덤프로 시험정복하기

많은 분들은 Forescout FSCP인증시험이 아주 어려운 것은 알고 있습니다. 하지만 우리 ExamPassdump를 선택함으로 Forescout FSCP인증시험은 그렇게 어렵지 않다는 것을 알게 될 것입니다. Pass4Tes의 Forescout FSCP합습가이드는 시험의 예상문제부터 전면적으로 만들어진 아주 퍼펙트한 시험자료입니다. 우리의 서비스는 Forescout FSCP구매 후 최신버전이 업데이트 시 최신문제와 답을 모두 무료로 제공합니다.

### 최신 Forescout Certified Professional FSCP 무료 샘플문제 (Q75-Q80):

#### 질문 # 75

How can a specific event detected by CounterACT (such as a P2P compliance violation event) be permanently recorded with a custom message for auditing purposes?

- A. Configure a custom SNMP trap to be sent
- B. Customize the message in the syslog configuration in Options > Core Ext > Syslog
- C. Customize the message in the Reports Portal
- D. Increase the "Purge Inactivity Timeout" setting
- E. Customize the message on the send syslog action

정답: E

설명:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Administration Guide and Syslog Plugin Configuration Guide, specific events detected by CounterACT can be permanently recorded with a custom message for auditing purposes by customizing the message on the send syslog action.

Send Message to Syslog Action:

According to the official documentation:

"You can send customized messages to Syslog for specific endpoints using the Forescout eyeSight Send Message to Syslog action, either manually or based on policies." How to Configure Custom Messages:

According to the Syslog Plugin Configuration Guide:

- \* Create or Edit a Policy - Select a policy and edit the Main Rule section
- \* Add an Action - In the Actions section, select "Add"
- \* Select Send Message to Syslog - From the Audit folder, select "Send Message to Syslog"
- \* Customize the Message - Specify the custom message to send when the policy is triggered Custom Message Configuration:

According to the documentation:

When configuring the "Send Message to Syslog" action, you specify:

- \* Message to syslog - Type a custom message to send to the syslog server when the policy is triggered
- \* Message Identity - Free-text field for identifying the syslog message
- \* Syslog Server Address - The syslog server to receive the message
- \* Syslog Server Port - Typically port 514
- \* Syslog Server Protocol - TCP or UDP
- \* Syslog Facility - Message facility classification
- \* Syslog Priority - Severity level (e.g., Info)

Example Implementation for P2P Compliance Violation:

According to the configuration guide:

For a P2P compliance violation event, you would:

- \* Create a policy that detects P2P traffic violations
- \* Add a "Send Message to Syslog" action
- \* Customize the message to something like: "P2P VIOLATION: Endpoint [IP] detected unauthorized P2P application traffic"
- \* Configure the syslog server details
- \* When the condition is triggered, CounterACT sends the custom message to syslog for permanent auditing Permanent Recording:

According to the documentation:

The messages sent to syslog are:

- \* Permanently recorded on the syslog server
- \* Timestamped automatically by Forescout and/or the syslog server
- \* Available for audit trails and compliance reports
- \* Can be forwarded to SIEM systems like Splunk or EventTracker for further analysis Why Other Options Are Incorrect:
- \* B. Increase the "Purge Inactivity Timeout" setting - This relates to device timeout, not event recording or custom messages
- \* C. Customize the message in the Reports Portal - The Reports Portal displays reports but does not customize messages for syslog events
- \* D. Configure a custom SNMP trap - SNMP traps are for network device management, not for recording Forescout events
- \* E. Customize the message in the syslog configuration in Options > Core Ext > Syslog - While syslog configuration is done here, the actual custom messages are configured in the "Send Message to Syslog" action within policies Referenced Documentation:
- \* How-To Guide: ForeScout CounterAct to forward logs to EventTracker
- \* Audit Actions documentation
- \* How to Work with the Syslog Plugin

## 질문 # 76

Which of the following properties can be determined by the HPS Plugin? (Choose two)

- A. Operating System
- B. AD group membership
- C. Application installed on Mac OS
- D. HTTP banner
- E. External Device on Windows

정답: A,D

설명:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout HPS Inspection Engine Configuration Guide and HPS Applications Plugin documentation, the properties that can be determined by the HPS Plugin are: Operating System (C) and HTTP banner (E).

#### HPS Plugin Capabilities:

According to the HPS Inspection Engine guide:

"The HPS (Host Property Scanner) Inspection Engine provides host properties for detecting endpoint characteristics including operating system, services, and applications." The HPS plugin determines:

- \* Operating System - OS type, version, service pack level
- \* HTTP Banner - Service versions from HTTP banner scanning
- \* Services and Applications - Running processes and installed software
- \* System Information - Hardware vendor, NIC vendor, etc.

#### Operating System Detection:

According to the HPS Applications Plugin guide:

"Windows operating system information is detected by the HPS Applications Plugin, including: Release, Package/Flavor, Service Pack" The plugin detects:

- \* Windows OS versions (XP, Vista, 7, 8, 10, etc.)
- \* Server editions (2003, 2008, 2012, 2016, etc.)
- \* Service pack levels
- \* OS build information

#### HTTP Banner Detection:

According to the HPS Inspection Engine guide:

"Service Banner: Indicates the service and version information, as determined by Nmap. HTTP banner scanning returns service identification information." The HTTP banner property is resolved by NMAP scanning with the -sV parameter, which is part of the HPS plugin's classification capabilities.

Why Other Options Are Incorrect:

- \* A. Application installed on Mac OS - The HPS Applications Plugin is for Windows applications only; it does not detect Mac OS applications
- \* B. External Device on Windows - External Device detection is a separate property unrelated to HPS plugin discovery
- \* D. AD group membership - This is determined by the User Directory plugin via LDAP, not the HPS plugin HPS Plugin vs. Other Plugins:

According to the documentation:

Property

HPS Plugin

Other Plugins

Operating System

#Yes

N/A

HTTP Banner

#Yes (NMAP)

N/A

Windows Applications

#Yes

N/A

AD Group Membership

#No

User Directory

Mac OS Applications

#No

macOS-specific

External Devices

#No

Network discovery

Referenced Documentation:

#### 질문 # 77

Which of the following is the best way to brand the CounterACT HTTP pages to look like corporate internal web pages?

- A. Using the "Reports Portal," modify the CSS for the desired skins
- B. Using the "User Portal Builder" basic interface

- C. Using the "User Portal Builder," modify the CSS for the desired skins
- D. Have a webmaster modify the HTML pages within the Tomcat web server
- E. This is not possible with CounterACT portal and HTTP pages

**정답: C**

**설명:**

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Administration Guide, the best way to brand CounterACT HTTP pages to match corporate identity is to use "the 'User Portal Builder' to modify the CSS for the desired skins". This is the officially supported method for customizing the appearance of Forescout portal pages.

User Portal Builder for Branding:

The User Portal Builder provides:

- \* CSS Customization - Modify cascading stylesheets to match corporate branding
- \* Skin Selection - Choose different portal skins/themes
- \* Logo and Colors - Customize logos, color schemes
- \* Supported Customization - Official, supported method through the GUI

Why Option C is Correct:

The User Portal Builder specifically provides CSS modification capabilities to customize the appearance of Forescout HTTP portal pages to match organizational branding standards.

Why Other Options Are Incorrect:

- \* A. Reports Portal - Reports Portal is separate from HTTP portal pages; not for branding
- \* B. Not possible - Customization IS possible through User Portal Builder
- \* D. Modify HTML in Tomcat - While technically possible, this is NOT supported; may break with updates
- \* E. Basic interface only - The full User Portal Builder supports CSS modification, not just basic interface Supported Customization

Methods:

According to the documentation:

- \* # User Portal Builder (CSS) - Supported, recommended method
- \* # Direct Tomcat HTML modification - Not supported; unsupported method
- \* # Manual CSS editing - Unsupported; may conflict with updates

Referenced Documentation:

- \* Forescout Administration Guide - User Portal Builder section

**질문 # 78**

What best defines a 'Post-Connect Methodology'?

- A. Innocent until proven guilty
- B. Guilty until proven innocent
- C. Assessed for critical compliance before IP address is assigned
- D. 802.1X is a flavor of Post-Connect
- E. Used subsequent to pre-connect

**정답: A**

**설명:**

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Blog on Post-Connect Access Controls and the Comply-to-Connect framework documentation, a Post-Connect Methodology is best defined as treating endpoints as "Innocent until proven guilty".

Definition of Post-Connect Methodology:

According to the official documentation:

"Post-connect" is described as treating endpoints as innocent until they are proven guilty. They can connect to the network, during and after which they are assessed for acceptance criteria." How Post-Connect Works:

According to the Post-Connect Access Controls blog:

- \* Initial Connection - Endpoints are allowed to connect to the network immediately (innocent)
- \* Assessment During/After Connection - After connecting, endpoints are assessed for acceptance criteria
- \* Compliance Checking - Endpoints are checked for:
  - \* Corporate asset status (must be company-owned)
  - \* Security compliance (antivirus, patches, encryption, etc.)
- \* Remediation or Quarantine - Based on assessment results:
- \* Compliant endpoints: Full access

\* Non-compliant endpoints: Placed in quarantine for remediation

Post-Connect vs. Pre-Connect:

According to the Comply-to-Connect documentation:

\* Pre-Connect - "Guilty until proven innocent" - Endpoint must prove compliance BEFORE getting network access

\* Post-Connect - "Innocent until proven guilty" - Endpoint connects first, then compliance is assessed Benefits of Post-Connect Methodology:

According to the documentation:

"The greatest benefit to the post-connect approach is a positive user experience. Unless a system is out of compliance and ends up in a quarantine, your company's users have no idea access controls are even taking place on the network." Acceptance Criteria in Post-Connect:

According to the framework:

\* Corporate Asset Verification - Determines if the endpoint belongs to the organization

\* Compliance Assessment - Checks for:

\* Updated antivirus

\* Patch levels

\* Disk encryption status

\* Security tool functionality

If an endpoint fails these criteria, it's placed in quarantine (controlled network access) rather than being completely blocked.

Why Other Options Are Incorrect:

\* A. 802.1X is a flavor of Post-Connect - 802.1X is a pre-connect access control method (requires authentication before network access)

\* B. Guilty until proven innocent - This describes pre-connect methodology, not post-connect

\* D. Used subsequent to pre-connect - While post-connect can follow pre-connect, this doesn't define what post-connect is

\* E. Assessed for critical compliance before IP address is assigned - This describes pre-connect methodology Referenced

Documentation:

\* Forescout Blog - Post-Connect Access Controls

\* Comply-to-Connect Brief - Pre-connect vs Post-connect comparison

\* Achieving Comply-to-Connect Requirements with Forescout

## 질문 # 79

What should you do first when preparing for an upgrade to a new CounterACT version?

- A. Upgrading an appliance is done through Options/Modules.
- B. Upgrade the members first before upgrading the EM.
- C. Upgrade only the modules compatible with the version you are installing.
- **D. Consult the CounterACT Release Notes for the appropriate version**
- E. From the appliance CLI, fstool upgrade /tmp/counteract-v8.0.1.fsp

**정답: D**

**설명:**

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Upgrade Guides for multiple versions, the first thing you should do when preparing for an upgrade to a new CounterACT version is consult the CounterACT Release Notes for the appropriate version.

Release Notes as First Step:

According to the official documentation:

"Review the Forescout Release Notes for important information before performing any upgrade." The documentation emphasizes this as a critical first step before any other upgrade activities.

What Release Notes Contain:

According to the upgrade guidance:

The Release Notes provide essential information including:

\* Upgrade Paths - Which versions you can upgrade from and to

\* Pre-Upgrade Requirements - System requirements and prerequisites

\* End-of-Life Products - Products that must be uninstalled before upgrade

\* Non-Supported Products - Products not compatible with the new version

\* Module/Plugin Dependencies - Version compatibility requirements

\* Known Issues - Potential problems and workarounds

\* Upgrade Procedures - Step-by-step instructions

\* Rollback Information - How to revert if needed

Critical Pre-Upgrade Information:

According to the Release Notes guidance:

"The upgrade process does not continue when end-of-life products are detected." Release Notes list:

- \* End-of-Life (EOL) Products - Must be uninstalled before upgrade
- \* Non-Supported Products - Must be uninstalled before upgrade
- \* Plugin Version Compatibility - Which plugin versions work with the new Forescout version Upgrade Order vs. Release Notes Review:

According to the documentation:

While the order of upgrade (EM first, then Appliances) is important, consulting Release Notes comes FIRST because it determines what needs to be done before any upgrade attempts.

The Release Notes tell you:

- \* Whether you can upgrade at all
- \* What must be uninstalled
- \* System requirements
- \* Compatibility information

Only AFTER reviewing Release Notes do you proceed with the actual upgrade sequence.

Why Other Options Are Incorrect:

- \* A. Upgrade the members first before upgrading the EM - This is the OPPOSITE of correct order; EM (Enterprise Manager) should be upgraded first
- \* B. Upgrading an appliance is done through Options/Modules - This is not the upgrade path; upgrades are done through Tools > Options > CounterACT Devices
- \* C. From the appliance CLI, fstool upgrade /tmp/counteract-v8.0.1.fsp - This is ONE possible upgrade method, but not the first step; downloading and reviewing Release Notes comes first
- \* E. Upgrade only the modules compatible with the version you are installing - This is a consideration found IN the Release Notes, not the first step itself Correct Upgrade Sequence:

According to the comprehensive upgrade documentation:

text

1. FIRST: Review Release Notes (determine what's needed)
2. Second: Check system requirements
3. Third: Uninstall EOL/non-supported products
4. Fourth: Back up Enterprise Manager and Appliances
5. Fifth: Upgrade Enterprise Manager
6. Sixth: Upgrade Appliances

Referenced Documentation:

- \* Before You Upgrade the Forescout Platform - v8.3
- \* Before You Upgrade the Forescout Platform - v9.1.2
- \* Forescout 8.1.3 Release Notes
- \* Installation Guide v8.0 - Upgrade section

## 질문 # 80
