## Test C-S4CPR-2502 King & Top C-S4CPR-2502 Questions

Our C-S4CPR-2502 latest exam torrents are your best choice. I promise you that you can learn from the C-S4CPR-2502 exam questions not only the knowledge of the certificate exam, but also the ways to answer questions quickly and accurately. Our C-S4CPR-2502 exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the C-S4CPR-2502 Exam, so little time great convenience for some workers, how efficiency it is.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q32-Q37):

### NEW QUESTION # 32

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Guidance and simulation of the migration process
- B. Extensibility using the Legacy System Migration Workbench
- C. Combining the local and remote schema approaches into one migration project
- D. Mapping source values to SAP S/4HANA target values

**Answer: A,D**

### NEW QUESTION # 33

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- B. Availability and Dependencies of Solution Processes Excel
- C. SAP Cloud ALM Requirements app
- D. Business Driven Configuration Questionnaire

**Answer: D**

Explanation:

In SAP Central Business Configuration, the Business Driven Configuration Questionnaire (BDCQ) is used to collect the values entered into configuration activities. The BDCQ is a key tool in the implementation process, allowing users to define business-specific settings based on their requirements. It ensures that the configuration aligns with the organization's business processes and industry standards.

\* Business Driven Configuration Questionnaire (BDCQ): The BDCQ is designed to guide users through the configuration of SAP S/4HANA Cloud Public Edition by asking relevant questions about business processes. The responses provided in the questionnaire are used to configure the system automatically. This approach simplifies the configuration process and ensures consistency across the implementation. The SAP Central Business Configuration Guide confirms that the BDCQ is the primary tool for collecting configuration values.

\* B. Availability and Dependencies of Solution Processes Excel: This Excel file is used to analyze the availability and dependencies of solution processes but does not collect configuration values. It is more of a planning tool rather than a configuration tool.

\* C. SAP Cloud ALM Requirements app: The SAP Cloud ALM Requirements app is used for managing and tracking requirements during the implementation process. While it helps in documenting requirements, it does not directly collect configuration values.

\* D. SAP Cloud ALM Processes app: The SAP Cloud ALM Processes app is used for process management and monitoring. It focuses on process flows and does not play a role in collecting configuration values.

\* SAP Central Business Configuration Guide: Explains the role of the Business Driven Configuration Questionnaire in collecting configuration values. <https://help.sap.com>

\* SAP Activate Methodology for SAP S/4HANA Cloud Public Edition: Provides an overview of the tools and methods used in the configuration process, including the BDCQ.

\* SAP Cloud ALM Documentation: Describes the functionalities of the SAP Cloud ALM apps, including the Requirements and Processes apps.

Why Option A is Correct: Why the Other Options Are Incorrect: Key References:

### NEW QUESTION # 34

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Assign a different business role that provides access.
- B. Assign a launchpad space to the business role.
- **C. Use the search function to find the app.**
- D. Create a page and assign it to the launchpad space.

**Answer: C**

Explanation:

If an end user has been granted access to only one specific application but the app does not appear on their launchpad, they can use the search function in the SAP Fiori launchpad to locate the app. This is a common troubleshooting step when apps are not visible due to configuration issues or missing assignments.

\* Use the search function to find the app (Option C): The SAP Fiori launchpad includes a search bar that allows users to search for apps by name or description. Even if an app is not pinned to the launchpad or assigned to a page, it can still be accessed through the search function if the user has the necessary permissions. The SAP Fiori Launchpad User Guide confirms this functionality.

\* A. Assign a launchpad space to the business role: Assigning a launchpad space is an administrative task and cannot be performed by the end user. Only administrators with the appropriate permissions can make this change.

\* B. Create a page and assign it to the launchpad space: Creating a page and assigning it to a launchpad space is also an administrative task and cannot be done by the end user.

\* D. Assign a different business role that provides access: Assigning business roles is an administrative task and cannot be performed by the end user.

\* SAP Fiori Launchpad User Guide: Explains how to use the search function to locate apps in the SAP Fiori launchpad. <https://help.sap.com>

\* SAP Role-Based Access Control Guide: Provides details on how business roles and launchpad spaces are configured.

Why Option C is Correct: Why the Other Options Are Incorrect: Key References:

### NEW QUESTION # 35

What is the correct release code for the second feature delivery in February 2025?

- A. 2502.2
- **B. 2025.2**
- C. 0
- D. 2025.2.2

**Answer: B**

Explanation:

The correct release code for the second feature delivery in February 2025 is 2025.2. SAP uses a standardized release naming convention where the format is YYYY.N, where YYYY represents the year and N represents the release number within that year.

\* 2025.2 (Option A): In SAP's release naming convention, the first digit after the year indicates the release number. For February 2025, the second release of the year would be labeled as "2025.2." The SAP Release Strategy Guide confirms this convention.

\* B. 2502.2: This format does not follow SAP's standard release naming convention.

\* C. 2522: This format is incorrect and does not align with SAP's YYYY.N convention.

\* D. 2025.2.2: This format includes an additional digit, which is not part of SAP's release naming convention.

\* SAP Release Strategy Guide: Explains the release naming convention used by SAP for feature deliveries. <https://help.sap.com>

\* SAP S/4HANA Cloud Release Information: Provides details on release schedules and naming conventions.

Why Option A is Correct: Why the Other Options Are Incorrect: Key References:

### NEW QUESTION # 36

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Target customer go-live date
- B. Known integration requirements
- C. Business role requirements
- D. SAP Fiori application extensions

**Answer: B,C**

Explanation:

The Digital Discovery Assessment captures critical information about a customer's business needs and technical landscape to ensure successful implementation. Below is an explanation of the correct answers:

\* Business role requirements (C): The assessment identifies the roles and responsibilities required for users in the system, ensuring proper assignment of business roles and permissions.

\* Known integration requirements (D): The assessment documents existing and planned integrations with other systems, helping to define the integration strategy and scope.

\* Target customer go-live date (A): While the go-live date is important, it is typically defined during project planning and is not captured in the Digital Discovery Assessment.

\* SAP Fiori application extensions (B): Extensions to SAP Fiori apps are identified during the realization phase, not during the discovery phase.
