

# Zertifizierung der 800-150 mit umfassenden Garantien zu bestehen

**Zertifizierung der C-S4CPS-2302 mit umfassenden Garantien zu bestehen**

Wenn wir von Anfang die Projektziele für SAP C-S4CPS-2302 Zertifizierungsgarantie festlegen, haben wir einen großen Vorteil gegenüber anderen. Wir geben Ihnen die umfassendste Garantie. Wenn Sie die Prüfung von Prüfungsdiensten SAP C-S4CPS-2302 Zertifizierungsgarantie bestanden, verpflichten wir Sie sich, die Prüfung 100% zu bestehen.

Wenn IT Leute nicht sind, sind SAP C-S4CPS-2302 Zertifikat ein Sprungbrett zu dem Hauptziel der IT Service des. Deshalb kümmern sich viele IT Experten um die SAP C-S4CPS-2302 Zertifizierungsgarantie.

**C-S4CPS-2302 Lernmaterialien**

**C-S4CPS-2302 Mit Hilfe von uns können Sie Bedeutendes Zertifikat der C-S4CPS-2302 einfach erhalten!**

Siehe Typen der Vorbereitung auf SAP C-S4CPS-2302 im untersten ist unsere Vorbereitung. Diese erfolgreich zu sein, SAP C-S4CPS-2302 Prüfung zu bestehen ist unser Ziel. Wir versprechen Sie mit einer umfassenden Service-Ebene zu sein. Nicht alle Lieferanten werden garantieren, dass viele Probleme beim Durchlauf auftreten, aber die IT Profs von uns Prüfungsdienste sind sie mit unserer SAP C-S4CPS-2302 Software betriebliche Kunden haben um die Kaufkraft mitgebracht.

**SAP Certified Application Associate - SAP S/4HANA Cloud public edition - Professional Services C-S4CPS-2302**

In den letzten Jahren ist die Cisco 800-150 Zertifizierungsprüfung schon eine der einflussreichsten Zertifizierungsprüfung in Bezug auf das Computer geworden. Aber wie kann man die Cisco 800-150 Zertifizierungsprüfung mühlos bestehen? Unser DeutschPrüfung kann Ihnen immer helfen, dieses Problem schnell zu lösen, indem wir Ihnen die 800-150 Schulungsunterlagen zu 800-150 Zertifizierungsprüfung anbieten. Die Inhalte der 800-150 Zertifizierungsprüfung bestehen aus den neuesten Prüfungsmaterialien von den IT-Fachleuten.

## Cisco 800-150 Prüfungsplan:

Thema	Einzelheiten

Thema 1	<ul style="list-style-type: none"> <li>• Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>• Networking Foundations: This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP</li> <li>• IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>• Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.</li> </ul>

## 800-150 Trainingsunterlagen, 800-150 Vorbereitung

Wenn Sie die Unterlagen von DeutschPrüfung kaufen, bekommen Sie einjährigen kostenlosen Aktualisierungsservice. Wenn die Dumps aktualisiert sind, werden wir DeutschPrüfung Ihnen die neuesten Versionen per E-Mail senden. Sie können auch an uns E-Mails schreiben, die neuesten Prüfungsunterlagen zur Cisco 800-150 Zertifizierung zu fordern. Und DeutschPrüfung kann Ihnen die Aktualisierungsservice innerhalb einem Jahr kostenlos bieten, obwohl Sie diese Cisco 800-150 Prüfung erfolgreich machen.

## Cisco Supporting Cisco Devices for Field Technicians 800-150 Prüfungsfragen mit Lösungen (Q67-Q72):

### 67. Frage

Which command is used to determine if there is sufficient space in the memory of a device before installing a new Cisco IOS image?

- A. show memory
- B. show storage
- C. show flash:
- D. show file-system

**Antwort: C**

Begründung:

The show flash: command is used to display the contents of the device's flash memory, which is where the Cisco IOS image is typically stored. By issuing this command, a technician can verify available space and determine whether there is enough capacity to accommodate a new IOS image before initiating an upgrade or image replacement process.

This command provides a detailed listing of files, their sizes, and the total and available memory space within the flash file system. show file-system lists all available file systems but doesn't detail their content.

show memory shows runtime memory usage (RAM), not flash memory.

show storage is not a standard IOS command.

### 68. Frage

Which mode must the console terminal of the device be in before a prewritten configuration is pasted to transfer the configuration from an old device to a new one?

- A. Privileged EXEC mode
- B. Interface configuration mode
- C. User EXEC mode
- D. Global configuration mode

**Antwort: D**

Begründung:

To apply a prewritten configuration to a new Cisco device, the console terminal must be in Global Configuration Mode. This mode allows administrators to enter configuration commands that affect the device's overall operation. To access Global Configuration Mode, one must first enter Privileged EXEC Mode by typing enable, and then enter configure terminal. Once in Global Configuration Mode, the prewritten configuration can be pasted, and the device will accept the commands accordingly.

### 69. Frage

Which cable type should be used when installing replacement hardware and connecting two devices of the same type, like two DTEs or two DCEs?

- A. RJ-45 Ethernet crossover patch cable
- B. USB Type A to Type B cable
- C. Rolled RJ-45 to RJ-45 console cable
- D. RJ-45 Ethernet straight-through patch cable

**Antwort: A**

Begründung:

When connecting two devices of the same type (e.g., two routers, two switches, or two DTEs), a crossover cable is required. This cable swaps the transmit and receive pairs to allow direct communication between devices without the need for an intermediate device like a switch.

Straight-through cables are used to connect different types of devices (e.g., PC to switch).

Rolled cables are used for console access.

USB Type A to B cables are typically used for peripheral device connections, not networking.

### 70. Frage

Drag and drop the Cisco collaboration components from the left onto the corresponding descriptions on the right.

**Antwort:**

Begründung:

□ Explanation:

These components are part of the Cisco Collaboration System Architecture (CSA), and are reviewed in the FLDTEC training under Cisco Equipment and Collaboration Basics:

\* Call Control: Managed by services like Cisco Unified Communications Manager (CUCM), it routes and connects calls.

\* Collaboration Applications: Provide added value services such as voicemail (Unity), messaging (IM&P), presence, and more.

\* Edge Devices: Include Cisco Expressway and CUBE (Cisco Unified Border Element), offering secure access and traversal for mobile/remote endpoints.

\* Conferencing: Powered by platforms like Cisco Meeting Server or Webex, enabling multi-party conferencing.

\* Endpoints: Include both hardware (IP phones, video units) and software (Webex app) that users interact with directly.

### 71. Frage

Which scenario would result in a speed mismatch when configuring Ethernet devices with different speed settings?

- A. One end is manually set to 100 Mbps, and the other end is set to auto-negotiation
