## Vce ISO-IEC-27001-Lead-Implementer Test Simulator & Valid ISO-IEC-27001-Lead-Implementer Study Notes

In today's competitive technology sector, the PECB ISO-IEC-27001-Lead-Implementer certification is a vital credential. Many

applicants, however, struggle to obtain up-to-date and genuine PECB ISO-IEC-27001-Lead-Implementer exam questions in order to successfully prepare for the exam. If you find yourself in this circumstance, don't worry since Exams-boost has you covered with their real PECB ISO-IEC-27001-Lead-Implementer Exam Questions. Let's look at the characteristics of these PECB PECB Certified ISO/IEC 27001 Lead Implementer Exam test Questions and how they can help you pass the PECB ISO-IEC-27001-Lead-Implementer certification exam on the first try.

## **PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions (Q171-Q176):**

### **NEW QUESTION # 171**

Scenario 8: SunDee is a biopharmaceutical firm headquartered in California, US. Renowned for its pioneering work in the field of human therapeutics, SunDee places a strong emphasis on addressing critical healthcare concerns, particularly in the domains of cardiovascular diseases, oncology, bone health, and inflammation. SunDee has demonstrated its commitment to data security and integrity by maintaining an effective information security management system (ISMS) based on ISO/IEC 27001 for the past two years.

In preparation for the recertification audit, SunDee conducted an internal audit. The company's top management appointed Alex, who has actively managed the Compliance Department's day-to-day operations for the last six months, as the internal auditor. With this dual role assignment, Alex is tasked with conducting an audit that ensures compliance and provides valuable recommendations to improve operational efficiency.

During the internal audit, a few nonconformities were identified. To address them comprehensively, the company created action plans for each nonconformity, working closely with the audit team leader.

SunDee's senior management conducted a comprehensive review of the ISMS to evaluate its appropriateness, sufficiency, and efficiency. This was integrated into their regular management meetings. Essential documents, including audit reports, action plans, and review outcomes, were distributed to all members before the meeting. The agenda covered the status of previous review actions, changes affecting the ISMS, feedback, stakeholder inputs, and opportunities for improvement. Decisions and actions targeting ISMS improvements were made, with a significant role played by the ISMS coordinator and the internal audit team in preparing follow-up action plans, which were then approved by top management.

In response to the review outcomes, SunDee promptly implemented corrective actions, strengthening its information security measures. Additionally, dashboard tools were introduced to provide a high-level overview of key performance indicators essential for monitoring the organization's information security management. These indicators included metrics on security incidents, their costs, system vulnerability tests, nonconformity detection, and resolution times, facilitating effective recording, reporting, and tracking of monitoring activities. Furthermore, SunDee embarked on a comprehensive measurement process to assess the progress and outcomes of ongoing projects, implementing extensive measures across all processes. The top management determined that the individual responsible for the information, aside from owning the data that contributes to the measures, would also be designated accountable for executing these measurement activities.

Based on the scenario above, answer the following question:

Is Alex suitable for the position of internal auditor within the company?

- **A. No, the internal audit can be conducted only by individuals who have not had operational roles**
- B. No, Alex should wait for a reasonable period of time to pass before transitioning to the internal auditor position
- C. Yes, Alex's recent experience in the day-to-day operations of the Compliance Department would benefit the internal auditor role

**Answer: A**

### **NEW QUESTION # 172**

Scenario 2: Beauty is a cosmetics company that has recently switched to an e-commerce model, leaving the traditional retail. The top management has decided to build their own custom platform in-house and outsource the payment process to an external provider operating online payments systems that support online money transfers.

Due to this transformation of the business model, a number of security controls were implemented based on the identified threats and vulnerabilities associated to critical assets. To protect customers' information. Beauty's employees had to sign a confidentiality agreement. In addition, the company reviewed all user access rights so that only authorized personnel can have access to sensitive files and drafted a new segregation of duties chart.

However, the transition was difficult for the IT team, who had to deal with a security incident not long after transitioning to the e-commerce model. After investigating the incident, the team concluded that due to the out-of-date anti-malware software, an attacker gamed access to their files and exposed customers' information, including their names and home addresses.

The IT team decided to stop using the old anti-malware software and install a new one which would automatically remove malicious code in case of similar incidents. The new software was installed in every workstation within the company. After installing the new software, the team updated it with the latest malware definitions and enabled the automatic update feature to keep it up to date at all

times. Additionally, they established an authentication process that requires a user identification and password when accessing sensitive information.

In addition, Beauty conducted a number of information security awareness sessions for the IT team and other employees that have access to confidential information in order to raise awareness on the importance of system and network security.

Based on the scenario above, answer the following question:

After investigating the incident, Beauty decided to install a new anti-malware software. What type of security control has been implemented in this case?

- A. Corrective
- **B. Preventive**
- C. Detective

**Answer: B**

Explanation:

In the scenario described, Beauty's decision to install new anti-malware software after a security incident is a Preventive control. This type of control is aimed at preventing future security incidents by removing malicious code and protecting against malware infections. The purpose of the new anti-malware software is to proactively protect the company's systems and data from potential threats, thus it falls under the category of preventive measures.

### NEW QUESTION # 173

What is the difference between training and awareness<sup>9</sup> Refer to scenario 6.

- A. Training helps transfer a message with the intent of informing, whereas awareness helps change the behavior toward the message
- **B. Training helps acquire certain skills, whereas awareness develops certain habits and behaviors.**
- C. Training helps acquire a skill, whereas awareness helps apply it in practice

**Answer: B**

### NEW QUESTION # 174

Based on scenario 6, when should Colin deliver the next training and awareness session?

- A. After he determines the employees' availability and motivation
- B. After he ensures that the group of employees targeted have satisfied the organization's needs
- **C. After he conducts a competence needs analysis and records the competence related issues**

**Answer: C**

### NEW QUESTION # 175

Scenario 7: InfoSec is a multinational corporation headquartered in Boston, MA, which provides professional electronics, gaming, and entertainment services. After facing numerous information security incidents, InfoSec has decided to establish teams and implement measures to prevent potential incidents in the future Emma, Bob, and Anna were hired as the new members of InfoSec's information security team, which consists of a security architecture team, an incident response team (IRT) and a forensics team Emma's job is to create information security plans, policies, protocols, and training to prepare InfoSec to respond to incidents effectively Emma and Bob would be full-time employees of InfoSec, whereas Anna was contracted as an external consultant. Bob, a network expert, will deploy a screened subnet network architecture This architecture will isolate the demilitarized zone (DMZ) to which hosted public services are attached and InfoSec's publicly accessible resources from their private network Thus, InfoSec will be able to block potential attackers from causing unwanted events inside the company's network. Bob is also responsible for ensuring that a thorough evaluation of the nature of an unexpected event is conducted, including the details on how the event happened and what or whom it might affect.

Anna will create records of the data, reviews, analysis, and reports in order to keep evidence for the purpose of disciplinary and

legal action, and use them to prevent future incidents. To do the work accordingly, she should be aware of the company's information security incident management policy beforehand. Among others, this policy specifies the type of records to be created, the place where they should be kept, and the format and content that specific record types should have. According to scenario 7, a demilitarized zone (DMZ) is deployed within InfoSec's network. What type of control has InfoSec implemented in this case?

- A. Corrective
- **B. Preventive**
- C. Detective

**Answer: B**
