Easy to Use and Compatible Test4Sure SAP C_SEC_2405 Exam Questions Formats

The exam will be vanquished smoothly this time by the help of valid latest C_SEC_2405 exam torrent. Written by meticulous and professional experts in this area, their quality has reached to the highest level compared with others' similar C_SEC_2405 test prep and concord with the syllabus of the exam perfectly. Their questions points provide you with simulation environment to practice. In that case, when you sit in the Real C_SEC_2405 Exam room, you can deal with almost every question with ease.

SAP Certified Associate - Security Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50

Your developer has created a new custom transaction for your SAP S/4HANA on-premise system and has provided you a list of the authorizations needed to execute the new ABAP program. What must you do to ensure that each required authorization is automatically created every time this new custom transaction is added to a PFCG role?

- A. Maintain each authorization object in transaction SU22 and set the Default Status to "Yes".
- B. Maintain each authorization in transaction SU24 and set the Default Status to "Yes".
- C. Maintain each authorization in transaction SU22 and set the Check Indicator value to "Check".
- **D. Maintain each authorization object in transaction SU24 and set the Default Status to "Yes".**

Answer: D

Explanation:

* Context: Transaction SU24 is used to maintain the link between transactions and authorization objects, ensuring automated role generation.

* Solution Explanation:

* By setting the Default Status to "Yes" in SU24, the system automatically includes required authorizations when the custom transaction is added to a role in PFCG.

SAP Security References:

* SAP SU24 Maintenance Guide

* SAP Custom Transaction Authorization Guidelines

NEW QUESTION # 51

Which object type is assigned to activated OData services in transaction SU24?

- A. IWSG
- B. G4BA
- C. HTTP
- **D. IWSV**

Answer: D

Explanation:

In SAP systems, activated OData services are assigned the object type IWSV (SAP Gateway Business Suite Enablement-Service) in transaction SU24. SU24 is used to maintain authorization defaults for transactions and services, and for OData services, which power SAP Fiori apps, the IWSV object type represents the service definitions required for front-end and back-end communication. When an OData service is activated, its authorization requirements, such as the S_SERVICE authorization object with the SRV_NAME field, are linked to the IWSV type in SU24, ensuring that these are proposed when the service is added to a PFCG role.

The HTTP object type is not used for OData services, G4BA relates to OData V4 services, and IWSG represents service group metadata, not activated services. By associating OData services with IWSV in SU24, SAP ensures that authorization maintenance is streamlined, enabling secure and efficient access to Fiori apps while aligning with the system's authorization framework.

NEW QUESTION # 52

Which solution analyzes an SAP system's administrative areas to safeguard against potential threats?

- **A. SAP Security Optimization Services**
- B. SAP Enterprise Threat Detection
- C. SAP Code Vulnerability Analyzer
- D. SAP EarlyWatch Alert

Answer: A

NEW QUESTION # 53

Where can you find SAP Fiori tiles and target mappings according to segregation of duty?

- A. Assigned Technical Catalogs
- **B. Business Catalogs**
- C. Assigned Spaces
- D. Assigned Pages

Answer: B

Explanation:

In SAP S/4HANA, SAP Fiori tiles and target mappings relevant to segregation of duties (SoD) are found in Business Catalogs. Business Catalogs group Fiori apps, tiles, and target mappings that correspond to specific business processes or roles, ensuring that authorizations are aligned with functional requirements. These catalogs are designed to support SoD by organizing applications and their associated authorizations in a way that prevents conflicting access, such as separating financial and procurement duties. By assigning Business Catalogs to business roles, administrators can enforce SoD principles, ensuring users only access apps relevant to their responsibilities. Assigned Pages and Assigned Spaces are related to the Fiori Launchpad's user interface organization, not directly to SoD or authorization management. Assigned Technical Catalogs contain technical objects, not business-specific tiles or mappings. Business Catalogs are thus the primary mechanism for maintaining SoD-compliant access, providing a structured approach to authorization management in SAP Fiori environments, ensuring security and compliance across business processes.

NEW QUESTION # 54

Which of the following user types are excluded from some general password-related rules, such as password validity or initial password? Note: There are 2 correct answers to this question.

- **A. Service**
- B. Dialog
- C. Communication
- **D. System**

Answer: A,D

NEW QUESTION # 55

.....

We never give up the sustainable development, so we revamp our C_SEC_2405 practice materials' versions constantly. Nowadays, the market softens because of oversupply, but the demand of our C_SEC_2405 learning braindumps are increasing all the time.
