Because the registration fee is expensive, you have to win your Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator to make all the spending worth it. Failing on your Fortinet NSE7_SSE_AD-25 exam will not only cause you to lose money but also time and energy. On the other hand, winning a Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator will open up so many doors that can bring you much forward on your career path. Of all the preparation resources for the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator NSE7_SSE_AD-25 Exam available in the market, this Fortinet NSE7_SSE_AD-25 braindumps are one of the most reliable materials. The development of these NSE7_SSE_AD-25 question dumps involves feedback from hundreds of Fortinet professionals around the world. They also revise the Fortinet NSE7_SSE_AD-25 exam questions regularly to keep them relevant to the latest Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator exam.

With NSE7_SSE_AD-25 test training materials of DumpExam, you can put away with disorder emotion and clean up them. NSE7_SSE_AD-25 test training materials of DumpExam are the most accurate training materials in the current market. Using it, the passing rate of NSE7_SSE_AD-25 Exam is 100%. Choose DumpExam is equal to choose success.

Our technician will check the update of NSE7_SSE_AD-25 exam questions every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the NSE7_SSE_AD-25 exam questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our NSE7_SSE_AD-25 Exam Materials and the professional personnel can help you solve your issue about using NSE7_SSE_AD-25 study materials.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions

(Q89-Q94):

NEW QUESTION # 89

Refer to the exhibits. Jumpbox and Windows-AD are endpoints from the same remote location.

Jumpbox can access the internet through FortiSASE, while Windows-AD can no longer access the internet.

Based on the information in the exhibits, which reason explains the outage on Windows-AD?

Managed Endpoints				
Endpoint	ZTNA Tags (Detailed)	Management Connection	Software OS	FortiClient Versi
<input type="checkbox"/> Jumpbox	FortiSASE-Compliant	Online	Microsoft Windows 11 Professional Edition, 64-bit (build 26100)	7.2.8.1140
<input type="checkbox"/> Windows-AD	FortiSASE-Compliant FortiSASE-Non-Compliant	Online	Microsoft Windows Server 2019 Datacenter Edition, 64-bit (build 17763)	7.2.6.1076

ZTNA Tagging Rules

Name: FortiSASE_Compliant

Enabled:

When the following rules match

+ Create Edit Delete

Type	Parameters	Matching Criteria
Windows	<ul style="list-style-type: none"> OS Version <ul style="list-style-type: none"> Windows 11 Windows Server 2019 	At least one parameter must pass

Apply the following tag

Tag Name: FortiSASE-Compliant

Name: FortiSASE-Non-Compliant

Enabled:

When the following rules match

+ Create Edit Delete

Type	Parameters	Matching Criteria
Windows		
AntiVirus	<ul style="list-style-type: none"> AV Software is installed and running 	All parameters must pass

Apply the following tag

Tag Name: FortiSASE-Non-Compliant

Secure Internet Access Policy

Name	Profile Group	Source	Destination	Action	User
System defined					
Custom					
Non-Compliant		FortiSASE-Non-Compliant	All Internet Traffic	Deny	All VPN Users
Web Traffic	SIA	FortiSASE-Compliant	All Internet Traffic	Accept	Remote_SIA_Users

User Group: Remote_SIA_Users

Members:

- user1@fortinettraining lab
- user2@fortinettraining lab

Edit

- A. The remote VPN user on Windows-AD no longer matches any VPN policy.
- **B. The device posture for Windows-AD has changed.**
- C. Windows-AD is excluded from FortiSASE management.
- D. The FortiClient version installed on Windows AD does not match the expected version on FortiSASE.

Answer: B

Explanation:

The Windows-AD endpoint now has both "FortiSASE-Compliant" and "FortiSASE-Non-Compliant" tags due to failing the antivirus software check. As a result, the Secure Internet Access Policy matches the "Non-Compliant" rule, which is set to Deny, causing the device to lose internet access.

NEW QUESTION # 90

Refer to the exhibit. Which type of information or actions are available to a FortiSASE administrator from the following output?

Name	Vendor	Version	First Detected	Last Installed	Endpoint
7-Zip 25.00 (x64)	Igor Pavlov	25.00	2025/08/07 03:17:26	2025/07/05	1
Add Folder Suggestions dialog	Microsoft Corporation	10.0.17763.1	2025/08/07 03:17:26	2018/09/15	1
Add Folder Suggestions dialog	Microsoft Corporation	10.0.19041.4239	2025/08/29 11:35:59	2025/08/29	1
Adobe Acrobat DC (64-bit)	Adobe	22.001.20117	2025/08/28 11:18:27	2025/05/11	1
Adobe Refresh Manager	Adobe Systems Incorporated	1.8.0	2025/08/28 11:18:27	2025/08/28	1
App Installer	Microsoft Corporation	1.26.430.0	2025/08/20 06:01:00	2025/08/28	1
Application Verifier x64 External Package (DesktopEditions)	Microsoft	10.1.26100.4188	2025/08/07 03:17:26	2025/07/04	1
Application Verifier x64 External Package (OnecoreUAP)	Microsoft	10.1.26100.4188	2025/08/07 03:17:26	2025/07/04	1

Captive Portal Flow	Microsoft Corporation	10.0.17763.1	2025/08/07 03:17:26	2018/09/15	1
Captive Portal Flow	Microsoft Corporation	10.0.19041.4239	2025/08/29 11:35:59	2025/08/29	1
CapturePicker	Microsoft Corporation	10.0.17763.1	2025/08/07 03:17:26	2018/09/15	1

- A. Administrators can view latest application version available and push updates to managed endpoints.
- B. Administrators can view and configure automatic patching of endpoints, and first detected date for applications.
- **C. Administrators can view application details, such as vendor, version, and installation dates to identify unwanted or outdated software.**
- D. Administrators can view and configure endpoint profiles and ZTNA tags.

Answer: C

Explanation:

The software installations page provides detailed information about applications on endpoints, including vendor, version, and installation dates. This allows administrators to identify unwanted or outdated software. It does not allow direct patching, updates, or configuration of endpoint profiles or ZTNA tags from this view.

NEW QUESTION # 91

Refer to the exhibit. An endpoint profile configured by a customer is shown.

A workstation user reports that after installing and connecting the FortiSASE client, they no longer have access to their local home network printers. The customer On-net rule set is mapped to the office public IP address.

What the customer needs to enable so the user can use the local network printer at home?

Endpoint profile configuration

ENDPOINT PROFILE

Profile Configuration

Connection Protection Sandbox ZTNA FSSO Groups & AD Users FortiClient GUI settings

Endpoint connects to security PoP **Automatically** **Manually**

FortiSASE Cloud Security tunnel is automatically initiated on device logon and after network status resets.

Show option to disconnect from security PoP

On/off-net Settings

On/off-net detection **Enable** **Disable**

On-net rule set CERT-PUBLIC-IP

Exempt endpoint from FortiSASE auto-connect when endpoint is on-net

Allow local LAN access when endpoint is on-net

Allow local LAN access when endpoint is off-net

Lockdown endpoint when off-net

Unless the endpoint is connected to a tunnel, all traffic is blocked after a grace period. Define exemptions for essential destinations.
The endpoint is permitted a specified number of tunnel authentication attempts. This limit is reset when the endpoint reboots.

Grace period seconds

- A. The customer must create a new firewall policy to give the user access to the local subnet.
- **B. The customer should enable Allow local LAN access when endpoint is off-net.**
- C. The customer should increase the Grace period to allow the user to print immediately after booting the computer.
- D. The customer should disable Lockdown endpoint when off-net.

Answer: B

Explanation:

When "Lockdown endpoint when off-net" is enabled, all traffic is blocked unless explicitly allowed, which includes access to local network resources such as home printers. To restore access to local LAN devices while still maintaining FortiSASE protection, the administrator must enable the option that permits local LAN communication when the endpoint is off-net.

NEW QUESTION # 92

Which policy type is used to control traffic between the FortiClient endpoint to FortiSASE for secure internet access?

- A. VPN policy
- B. private access policy
- C. secure web gateway (SWG) policy
- D. thin edge policy

Answer: C

Explanation:

The Secure Web Gateway (SWG) policy is used to control traffic between the FortiClient endpoint and FortiSASE for secure internet access. SWG provides comprehensive web security by enforcing policies that manage and monitor user access to the internet.

* Secure Web Gateway (SWG) Policy:

* SWG policies are designed to protect users from web-based threats and enforce acceptable use policies.

* These policies control and monitor user traffic to and from the internet, ensuring that security protocols are followed.

* Traffic Control:

* The SWG policy intercepts all web traffic, inspects it, and applies security rules before allowing or blocking access.

* This policy type is crucial for providing secure internet access to users connecting through FortiSASE.

References:

FortiOS 7.6 Administration Guide: Details on configuring and managing SWG policies.

FortiSASE 23.2 Documentation: Explains the role of SWG in securing internet access for endpoints.

NEW QUESTION # 93

A customer wants to ensure secure access for private applications for their users by replacing their VPN. Which two SASE technologies can you use to accomplish this task? (Choose two.)

- A. secure web gateway (SWG) and cloud access security broker (CASB)
- B. SD-WAN on-ramp
- C. zero trust network access (ZTNA)
- D. secure SD-WAN

Answer: C,D

Explanation:

Zero Trust Network Access provides secure, identity-based access to private applications as a VPN replacement by enforcing strict authentication and least-privilege access. Secure SD-WAN complements this by enabling optimized, secure connectivity from branch or remote users to SASE points of presence and private resources.

NEW QUESTION # 94

.....

To do this you just need to enroll in Fortinet NSE7_SSE_AD-25 exam and strive hard to pass the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) exam with good scores. However, you should keep in mind that the Fortinet NSE7_SSE_AD-25 certification exam is different from the traditional exam and always gives taught time to their candidates. But with proper Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) exam preparation, planning, and firm commitment can enable you to pass the challenging Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) exam.
