

# Top AIGP Preparation Store–The Newest Latest Test Preparation Providers for IAPP AIGP

What's more, part of that DumpTorrent AIGP dumps now are free: <https://drive.google.com/open?id=1Bze4JI6YpG4II3L0ZPMXlmgCmqZGND2Z>

You can also set the number of IAPP AIGP dumps questions to attempt in the practice test and time as well. The web-based IAPP AIGP practice test software needs an active internet connection and can be accessed through all major browsers like Chrome, Edge, Firefox, Opera, and Safari. Our Desktop-based IAPP AIGP Practice Exam Software is very suitable for those who don't have an internet connection. You can download and install it within a few minutes on Windows-based PCs only and start preparing for the IAPP Certified Artificial Intelligence Governance Professional exam.

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Deployment and Use:</b> This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Development:</b> This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li> </ul>

## Realistic AIGP Preparation Store for Real Exam

If you want to know our AIGP exam questions before your coming exam, you can just visit our website. And it is easy and convenient to free download the demos of our AIGP study guide, you just need to click on it. Then you will find that all points of the AIGP Learning Materials are predominantly related with the exam ahead of you. Every page is full of well-turned words for your reference related wholly with the AIGP training prep.

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q122-Q127):

### NEW QUESTION # 122

Each of the following actors are typically engaged in the AI development life cycle EXCEPT?

- A. Data architects.
- **B. Government regulators.**
- C. Legal and privacy governance experts.
- D. Socio-cultural and technical experts.

**Answer: B**

Explanation:

Typically, actors involved in the AI development life cycle include data architects (who design the data frameworks), socio-cultural and technical experts (who ensure the AI system is socio-culturally aware and technically sound), and legal and privacy governance experts (who handle the legal and privacy aspects).

Government regulators, while important, are not directly engaged in the development process but rather oversee and regulate the industry. Reference: AIGP BODY OF KNOWLEDGE and AI development frameworks.

### NEW QUESTION # 123

All of the following issues are unique for proprietary AI model deployments EXCEPT:

- A. The necessity of performing conformity assessments.
- B. The acquisition of training data.
- **C. The potential for bias.**
- D. The cost of AI chips.

**Answer: C**

Explanation:

The potential for bias is not unique to proprietary AI models; it applies to all AI systems regardless of ownership or deployment type.

### NEW QUESTION # 124

#### CASE STUDY

A company is considering the procurement of an AI system designed to enhance the security of IT infrastructure. The AI system analyzes how users type on their laptops, including typing speed, rhythm and pressure, to create a unique user profile. This data is then used to authenticate users and ensure that only authorized personnel can access sensitive resources.

All of the following are obligations of the company as a data controller when implementing its AI system EXCEPT?

- A. Implementing technical and organizational measures
- **B. Ensuring that third-party processors are based in the same country as the company**
- C. Allowing data subject access requests (DSARs)
- D. Conducting a Data Protection Impact Assessment (DPIA) / Privacy Impact Assessment (PIA)

**Answer: B**

Explanation:

The correct answer is A. While location of processors may have implications (such as for data transfers under GDPR), there is no absolute requirement that third-party processors be based in the same country.

From the AI Governance in Practice Report 2025 and ILT Guide:

"Data controllers are responsible for ensuring that third-party processors have adequate protections, but not necessarily that they reside in the same jurisdiction. What is required is legal safeguards (e.g., SCCs) for international transfers, not same-country location." In contrast, DPIAs, DSARs, and implementation of technical/organizational safeguards are explicitly required under GDPR and responsible AI frameworks.

### NEW QUESTION # 125

What is the 1956 Dartmouth summer research project on AI best known as?

- A. A research project to create a test for machine intelligence.
- **B. A meeting focused on the founding of the AI field.**
- C. A research project on the impacts of technology on society.
- D. A meeting focused on the impacts of the launch of the first mass-produced computer.

**Answer: B**

Explanation:

The 1956 Dartmouth summer research project on AI is best known as a meeting focused on the founding of the AI field. This conference is historically significant because it marked the formal beginning of artificial intelligence as an academic discipline. The term "artificial intelligence" was coined during this event, and it laid the foundation for future research and development in AI. Reference: The AIGP Body of Knowledge highlights the importance of the Dartmouth Conference as a pivotal moment in the history of AI, which established AI as a distinct field of study and research.

### NEW QUESTION # 126

Which of the following AI uses is best described as human-centric?

- A. Machine learning is used for demand forecasting and inventory management, ensuring that consumers can find products they want when they want them.
- **B. Virtual assistants are used to adapt educational content and teaching methods to individuals, offering personalized recommendations based on ability and needs.**
- C. Pattern recognition algorithms are used to improve the accuracy of weather predictions, which benefits many industries and everyday life.
- D. Autonomous robots are used to move products within a warehouse, allowing human workers to reduce physical strain and alleviate monotony.

**Answer: B**

Explanation:

Human-centric AI focuses on improving the human experience by addressing individual needs and enhancing human capabilities. Option D exemplifies this by using virtual assistants to tailor educational content to each student's unique abilities and needs, thereby supporting personalized learning and improving educational outcomes. This use case directly benefits individuals by providing customized assistance and adapting to their learning pace and style, aligning with the principles of human-centric AI. Reference: AIGP BODY OF KNOWLEDGE, sections on trustworthy AI and human-centric AI principles.

## NEW QUESTION # 127

.....

In today's competitive IT industry, passing IAPP certification AIGP exam has a lot of benefits. Gaining IAPP AIGP certification can increase your salary. People who have got IAPP AIGP certification often have much higher salary than counterparts who don't have the certificate. But IAPP Certification AIGP Exam is not very easy, so DumpTorrent is a website that can help you grow your salary.
