C_CPI_2506 Exam Dumps Provider & C_CPI_2506 Exam Bootcamp

Business Applications C_CPI_2506 certification exam with our braindumps, just send us your failed score report. After we confirm your C_CPI_2506 score report and we can give full refund of the C_CPI_2506 Exam to you in time. Meanwhile, if you also need to take other related exams you also can choose passing another exam instead of the failed exam.

SAP Certified Associate - Integration Developer Sample Questions (Q20-Q25):

NEW QUESTION # 20

You call the following URL in your browser: [https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet\('HT-1000'\)/ToSalesOrderLineItems](https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet('HT-1000')/ToSalesOrderLineItems). What file type is displayed?

- A. PHP
- B. Java
- C. XML

- D. HTML

Answer: C

Explanation:

The URL shown is an OData service endpoint exposed from the SAP ES5 Gateway demo system:

[https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet\('HT-1000'\)/ToSalesOrderLineItems](https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet('HT-1000')/ToSalesOrderLineItems)

OData services in SAP Gateway return XML responses by default when called in a browser, unless otherwise specified by request headers (like JSON format).

The structure follows AtomPub/Atom XML representation, showing entity details and navigation properties.

Therefore, the file type displayed in the browser is XML, not HTML, Java, or PHP.

NEW QUESTION # 21

You want to send messages over an SOAP adapter to an integration flow. Which method do you use to send the messages?

- A. GET
- **B. POST**
- C. PATCH
- D. UPDATE

Answer: B

Explanation:

When sending messages to an integration flow via SOAP adapter:

The request follows standard SOAP protocol semantics.

Messages are sent using HTTP POST, since SOAP messages are enclosed in an XML envelope carried in the HTTP request body.

GET, UPDATE, PATCH are not applicable for SOAP operations.

Thus, the correct method is POST.

NEW QUESTION # 22

Which of the following API modeling languages can you use to describe APIs? Note: There are 2 correct answers to this question.

- A. CXML
- **B. RAML**
- C. HTML
- **D. OpenAPI**

Answer: B,D

Explanation:

In SAP API Management, supported API description languages include:

RAML (RESTful API Modeling Language)

OpenAPI Specification (OAS, formerly Swagger)

Both are industry-standard languages for modeling REST APIs.

Other options:

A). HTML # A markup language for UI, not an API modeling language.

D). CXML (Commerce XML) # A B2B procurement standard, not for API modeling.

NEW QUESTION # 23

Which expression language can you use to access the content of a message in an integration flow?

- A. XML expression language
- **B. Simple expression language**
- C. JavaScript expression language
- D. Spring expression language

Answer: B

Explanation:

In SAP Cloud Integration, the runtime message content, headers, and properties can be accessed using the Camel Simple Expression Language.

Examples:

`${body}` # Accesses the message payload.

`${header.<headerName>}` # Accesses message headers.

`${property.<propertyName>}` # Accesses integration properties.

Other options:

XML expression language # Not supported directly.

Spring expression language # Used in Spring apps, not in SAP CPI.

JavaScript expression language # Not used; JavaScript/Groovy scripts exist, but not for message expressions.

Thus, the correct language is Simple expression language.

NEW QUESTION # 24

What is the most crucial factor for ensuring robust security in the integration of this SAP landscape, while maintaining optimal performance and scalability?

- A. Prioritizing the latest SAP security patches above all other considerations.
- B. Employing a highly skilled security team with extensive SAP experience.
- C. Implementing a well-defined security architecture that encompasses authentication, authorization, and data encryption.
- D. Centralizing all SAP system administration to a single, highly secure data center.

Answer: C

Explanation:

For robust security in SAP integration landscapes:

A security architecture must cover:

Authentication # Verifying the identity of users/systems (OAuth 2.0, SAML, certificates).

Authorization # Role-based access control.

Encryption # TLS/SSL for data in transit, strong encryption for data at rest.

This ensures end-to-end security without sacrificing performance or scalability.

Other options:

Skilled teams and security patches are important but are operational measures, not the foundation of integration security.

Centralizing system administration is organizational, not architectural.

Thus, the key is a well-defined security architecture.

NEW QUESTION # 25

.....

We will continue to pursue our passion for better performance and human-centric technology of latest C_CPI_2506 quiz prep. And we guarantee you to pass the exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the C_CPI_2506 certification. We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods to deal with. According to the statistics shown in the feedback chart, the general pass rate for Latest C_CPI_2506 Test Prep is 98%, which is far beyond that of others in this field. In recent years, our C_CPI_2506 exam guide has been well received and have reached 99% pass rate with all our dedication.
