Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q75-Q80):

NEW QUESTION # 75

When synchronizing users from Active Directory, which two criteria should be considered to ensure all required users are synchronized correctly? (Select two)

- A. User role in Qlik Sense
- B. Organizational unit (OU) filters
- C. User location in the domain
- D. Application ownership

Answer: B,C

NEW QUESTION # 76

A system administrator is installing and configuring a new Qlik Sense deployment. The system administrator completes the following steps:

- Makes sure the IT-provisioned server, named Server1, meets the required specifications
 - Installs Qlik Sense on Server1
 - Tests the installation by opening Qlik Sense from the server desktop shortcut
 - Modifies default virtual proxy prefix to "qliksense"
 - Creates a new virtual proxy for users with a prefix of "QSE"
 - Links the new virtual proxy to the central proxy
 - Configures the new virtual proxy to load balance with the central node
 - Configures the new virtual proxy host white list with the server name, FQDN, and server IP address
- When the system administrator tests the new virtual proxy using the URL, `http://Server1/sense/hub`, this error message displays: Error 404 The requested resource cannot be found. What is causing this error?

- A. The new virtual proxy is configured incorrectly
- B. The incorrect virtual proxy was used in the test
- C. The new central proxy was NOT created
- D. The central proxy was NOT configured correctly

Answer: A

NEW QUESTION # 77

A system administrator has a multi-node Qlik Sense environment with a consumer node and a scheduler node. Reload task occurs every 20 minutes, 24 hours a day, 7 days a week. The reload tasks cause poor performance for the users.

The system administrator reviews the configuration in the Qlik Management Console. The consumer node runs the Engine, Scheduler, Repository, and Proxy services. The scheduler node runs the Engine, Scheduler, and Repository services.

What is the most efficient method to improve performance?

- A. Configure the reloads to run only during non-business hours
- B. Remove the Scheduler from the consumer node
- C. Change the scheduler node to "Master" only
- D. Increase the number of reloads in the scheduler node

Answer: C

NEW QUESTION # 78

A system administrator needs to automate the Qlik Sense Enterprise upgrade process.

Which syntax should the administrator use?

- A. `Qlik_Sense_setup.exe -s skipstarts-services=0`
- B. `Qlik_Sense_setup.exe -s install-dir="c:\mycustompath" rimnode=1`
- C. `Qlik_Sense_setup.exe -s rimnode=1 rimnodetype=complete`
- D. `Qlik_Sense_setup.exe -s spc="V:\configpath\spc.cfg"`

Answer: A

NEW QUESTION # 79

A new Qlik Sense deployment is planned for use by 100 users. The area manager believes that in the next two years, it will grow to 1500, with more than 70 applications. Most current users work from within the company itself. In relation to user growth, a plan is due for sales reps to access externally, outside the network, and the local firewall.

What are the two secure ways to maintain external access to the server? (Choose two)

- A. Configure Qlik Sense in "off-line mode" for external users and allow them to access apps locally
- B. Deploy Qlik Sense in the DMZ and open all required ports to internal and external users
- C. Deploy Qlik Sense in the corporate network, open all required firewall ports, and allow external users to access apps directly
- D. Enable all external users to connect to the corporate network via a secure VPN to access Qlik Sense apps

- Answer: C,D**
