- C. Update the Role picklist on the Account-(?ontact Relationship object with new value.
- D. Create a new Contact Reciprocal Role for the required value.

Answer: B

Explanation:
Explanation
To configure Financial Services Cloud to allow users to relate two business accounts, the administrator should update the Role picklist on the Account-Account Relationship object with new value. The Role picklist is a field on the Account-Account Relationship object that defines the type of relationship between two accounts, such as Household Member, Business Owner, Trustee, or Friend. The Role picklist is used to filter and display the account-account relationships in the Actionable Relationship Center (ARC). To update the Role picklist, you need to go to Setup > Object Manager > Account-Account Relationship > Fields & Relationships > Role and add or remove values according to your business needs.
