You only need 20-30 hours to learn NSE7_SSE_AD-25 exam torrent and prepare the NSE7_SSE_AD-25 exam. Many people, especially the in-service staff, are busy in their jobs, learning, family lives and other important things and have little time and energy to learn and prepare the NSE7_SSE_AD-25 exam. But if you buy our NSE7_SSE_AD-25 Test Torrent, you can invest your main energy on your most important thing and spare 1-2 hours each day to learn and prepare the exam. Our NSE7_SSE_AD-25 exam questions and answers are based on the real exam and conform to the popular trend in the candidates.

Our NSE7_SSE_AD-25 real exam can be downloaded for free trial before purchase, which allows you to understand our NSE7_SSE_AD-25 sample questions and software usage. It will also enable you to make a decision based on your own needs and will not regret. If you encounter any problems in the process of purchasing or using NSE7_SSE_AD-25 Study Guide you can contact our customer service by e-mail or online at any time, we will provide you with professional help.

Study NSE7_SSE_AD-25 Material - NSE7_SSE_AD-25 Valid Test Question

A lot of things can't be tried before buying or the product trial will charge a certain fee, but our NSE7_SSE_AD-25 exam questions are very different, you can try it free before you buy it. It's like buying clothes, you only know if it is right for you when you try it on. In the same way, in order to really think about our customers, we offer a free trial version of our NSE7_SSE_AD-25 study prep for you, so everyone has the opportunity to experience a free trial version of our NSE7_SSE_AD-25 learning materials.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q15-Q20):

NEW QUESTION # 15

Refer to the exhibit.

Endpoint profile

ENDPOINT PROFILE

Name: Default

Profile Configuration

Connection Protection **Sandbox** ZTNA FSSO Settings

Sandbox Mode: Disabled **FortiSASE** Standalone FortiSandbox

Region: Global

Time Offset: UTC+00:00

Wait for FortiSandbox Results before Allowing File Access: ☒

Timeout in seconds: 300

File Submission Options

All Files Executed from Removable Media: ☒

All Files Executed from Mapped Network Drives: ☒

All Web Downloads: ☒

All Email Downloads: ☒

Remediation Actions

Action: Quarantine Alert & Notify

Sandbox Detection Verdict Level: Clean Low **Medium** High Malicious

Based on the configuration shown, in which two ways will FortiSASE process sessions that require FortiSandbox inspection? (Choose two answers)

- A. All files executed on a USB drive will be sent to FortiSandbox for analysis.
- B. FortiClient quarantines only infected files that FortiSandbox detects as medium level.
- C. All files will be sent to an on-premises FortiSandbox for inspection.
- D. Only endpoints assigned a profile for sandbox detection will be processed by the sandbox feature.

Answer: A,D

Explanation:

The exhibit (image_595357.jpg) illustrates the Sandbox configuration tab within a FortiSASE Endpoint Profile. This profile dictates how the managed FortiClient agent handles suspicious files and interacts with the sandbox service.

* Profile-Based Enforcement: In the FortiSASE architecture, security features are not applied globally by default; they are enabled through specific profiles assigned to endpoints. Therefore, the sandbox inspection and remediation logic will only be active for endpoints that have been assigned a profile where the Sandbox feature is enabled.

* Removable Media Protection: Under the File Submission Options in the exhibit, the setting All Files Executed from Removable Media is toggled on. This ensures that any file executed from a USB drive or other external storage is sent to the FortiSandbox for analysis before being permitted to run on the endpoint.

* Sandbox Mode: The Sandbox Mode is set to FortiSASE, indicating that files are sent to the integrated cloud-native sandbox rather than an on-premises appliance. This makes Option A incorrect.

* Quarantine Threshold: The Remediation Actions show that the Action is set to Quarantine for files meeting the Sandbox Detection Verdict Level of Medium. This acts as a minimum threshold; FortiClient will quarantine files identified as Medium, High, or

Malicious. Option B is incorrect because it implies only medium-level files are quarantined, whereas higher-risk levels would also be blocked.

NEW QUESTION # 16

Your FortiSASE customer has a small branch office in which ten users will be using their personal laptops and mobile devices to access the internet.

Which deployment should they use to secure their internet access with minimal configuration?

- **A. Deploy FortiAP to secure internet access.**
- B. Deploy FortiClient endpoint agent to secure internet access.
- C. Deploy FortiGate as a LAN extension to secure internet access.
- D. Deploy SD-WAN on-ramp to secure internet access.

Answer: A

Explanation:

Deploying FortiAP enables secure internet access for unmanaged personal devices in small branch offices with minimal configuration by automatically directing traffic through FortiSASE, eliminating the need for endpoint installation or complex setup.

NEW QUESTION # 17

Refer to the exhibits. Antivirus is installed on a Windows 10 endpoint, but the windows application firewall is stopping it from running.

What will the endpoint security posture check be?

FortiSASE Non-Compliant

EDIT RULE SET

Name FortiSASE-Non-Compliant

Enabled ☒

When the following rules match

+ Create Edit Delete		
Type	Parameters	Matching Criteria
Windows		
<input checked="" type="checkbox"/> AntiVirus	<input checked="" type="checkbox"/> NOT AV Software is installed and running	All parameters must pass

Apply the following tag

Tag Name  FortiSASE-Non-Compliant

[Activate Windows](#)

FortiSASE Compliant

EDIT RULE SET

Name: FortiSASE-Compliant

Enabled: ☒

When the following rules match

<input type="checkbox"/>	Type	Parameters	Matching Criteria
<input checked="" type="checkbox"/>	Windows		
<input type="checkbox"/>	OS Version	<input checked="" type="checkbox"/> Windows Server 2019 <input checked="" type="checkbox"/> Windows 10	At least one parameter must pass
<input type="checkbox"/>	AntiVirus	AV Software is installed and running	All parameters must pass

Apply the following tag

Tag Name:

- A. FortiClient will trigger network lockdown on the endpoint.
- **B. FortiClient will tag the endpoint as FortiSASE-Non-Compliant.**
- C. FortiClient will prompt the user to enable antivirus.
- D. FortiClient will be unmanaged from FortiSASE due to failed compliance.

Answer: B

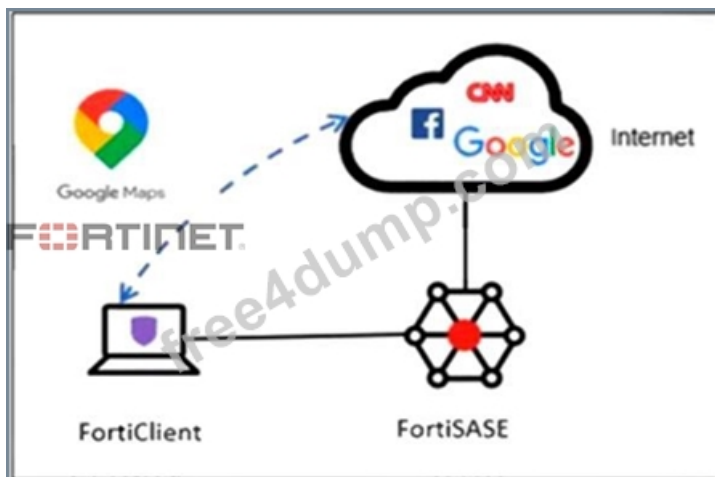

Explanation:

Although the antivirus is installed, it is not running due to the Windows application firewall blocking it. According to the FortiSASE-Non-Compliant rule, antivirus software must be both installed and running. Since this condition fails, FortiClient assigns the FortiSASE-Non-Compliant tag to the endpoint.

NEW QUESTION # 18

Refer to the exhibit. An organization must inspect all the endpoint internet traffic on FortiSASE, and exclude Google Maps traffic from the FortiSASE VPN tunnel and redirect it to the endpoint physical interface.

Which configuration must you apply to achieve this requirement?

- A. Configure a steering bypass tunnel firewall policy using Google Maps FQDN to exclude and redirect the traffic.
- B. Exempt Google Maps in URL filtering in the web filter profile.
- **C. Add the Google Maps URL as a steering bypass destination in the endpoint profile.**
- D. Add the Google Maps URL in the zero trust network access (ZTNA) TCP access proxy forwarding rule.

Answer: C

Explanation:

To exclude specific internet traffic (such as Google Maps) from being tunneled through FortiSASE and instead direct it out the local endpoint interface, you must configure it as a steering bypass destination in the FortiClient endpoint profile. This ensures traffic matching the URL bypasses the FortiSASE tunnel.

NEW QUESTION # 19

You are designing a new network for Company X and one of the new cybersecurity policy requirements is that all remote user endpoints must always be connected and protected Which FortiSASE component facilitates this always-on security measure?

- A. thin-branch SASE extension
- B. inline-CASB
- **C. unified FortiClient**
- D. site-based deployment

Answer: C

Explanation:

The unified FortiClient component of FortiSASE facilitates the always-on security measure required for ensuring that all remote user endpoints are always connected and protected.

* Unified FortiClient:

* FortiClient is a comprehensive endpoint security solution that integrates with FortiSASE to provide continuous protection for remote user endpoints.

* It ensures that endpoints are always connected to the FortiSASE infrastructure, even when users are off the corporate network.

* Always-On Security:

* The unified FortiClient maintains a persistent connection to FortiSASE, enforcing security policies and protecting endpoints against threats at all times.

* This ensures compliance with the cybersecurity policy requiring constant connectivity and protection for remote users.

References:
