## Amazon AWS Certified Cloud Practitioner Sample Questions (Q227-Q232):

### NEW QUESTION # 227

Which component of the AWS global infrastructure provides low-latency access to content in multiple geographic areas by storing copies of data close to end users?

- **A. Local Zones**
- B. Availability Zones
- C. AWS Regions
- D. Edge locations

**Answer: A**

Explanation:

AWS Local Zones allow you to use select AWS services, like compute and storage services, closer to more end-users, providing them very low latency access to the applications running locally.

#### **NEW QUESTION # 228**

A startup is working on a new application that needs to go to market quickly. The application requirements may need to be adjusted in the near future.

Which of the following is a characteristic of the AWS Cloud that would meet this specific need?

- A. Agility
- **B. Reliability**
- C. Elasticity
- D. Performance

**Answer: B**

Explanation:

Agile is a time boxed, iterative approach to software delivery that builds software incrementally from the start of the project, instead of trying to deliver it all at once near the end.

#### **NEW QUESTION # 229**

A company wants a cost-effective option when running its applications in an Amazon EC2 instance for short time periods. The applications can be interrupted. Which EC2 instance type will meet these requirements?

- **A. Spot Instances**
- B. On-Demand Instances
- C. Dedicated Instances
- D. Reserved Instances

**Answer: A**

Explanation:

Spot Instances - Spot Instances are the most cost-effective choice if you are flexible about when your applications run and if your applications can be interrupted.

#### **NEW QUESTION # 230**

A company needs to deploy an Amazon EC2 instance and attach a storage mount for the operating system and application files. Which AWS service will meet these requirements?

- **A. Amazon S3**
- B. AWS Backup
