

# DASCA SDS Training Solutions | Pass SDS Guarantee

It is very necessary for candidates to get valid SDS dumps collection because it can save your time and help you get succeed in IT filed by clearing SDS actual test. Passing real exam is not easy task so many people need to take professional suggestions to prepare SDS Practice Exam. The reason that we get good reputation among dump vendors is the most reliable SDS pdf vce and the best-quality service.

Our Senior Data Scientist SDS questions PDF is a complete bundle of problems presenting the versatility and correlativity of questions observed in past exam papers. These questions are bundled into Senior Data Scientist PDF questions following the official study guide. DASCA SDS PDF Questions are a portable, printable document that simultaneously plays on multiple devices. Our DASCA SDS PDF questions consists of problems in all aspects, whether theoretical, practical, or analytical.

## Authoritative SDS Training Solutions - Pass SDS Exam

It is all due to the top features of Senior Data Scientist SDS exam dumps. These features are three Senior Data Scientist exam questions formats, free exam dumps download facility, three months updated Salesforce SDS exam dumps download facility, affordable price and 100 exams passing money back guarantee. All these Senior Data Scientist dumps features are designed to assist you in Senior Data Scientist SDS Exam Preparation and enable you to pass the exam with flying colors.

## DASCA Senior Data Scientist Sample Questions (Q36-Q41):

### NEW QUESTION # 36

Which of the following is a "thinking like a data scientist" decomposition process?

- A. Business Stakeholder
- B. Strategic Nouns
- **C. All of the above**
- D. Both B and C
- E. Business Initiative

**Answer: C**

Explanation:

The "Thinking Like a Data Scientist" (TLADS) decomposition process is a structured approach to align data science projects with business goals. It breaks complex business problems into smaller, analyzable parts:

Business Initiative (Option A): Defines the overarching organizational challenge or objective (e.g., reduce churn, increase revenue).

Business Stakeholder (Option B): Identifies decision-makers and end users whose requirements shape the use cases.

Strategic Nouns (Option C): Focuses on the entities (e.g., customer, product, supplier) that generate and consume data, serving as anchors for analytics design.

Since all three are valid elements of the TLADS decomposition, the correct answer is Option E (All of the above).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Data Science Fundamentals: Thinking Like a Data Scientist Process.

### NEW QUESTION # 37

Which of the following is NOT a cluster management tool?

- A. Apache Mesos
- B. Apache Ambari
- C. Zettaset Orchestrator
- D. Apache Hadoop

**Answer: D**

Explanation:

Cluster management tools help in orchestrating and monitoring large-scale distributed computing environments.

Zettaset Orchestrator (A): Commercial tool for Hadoop cluster management.

Apache Mesos (B): A cluster manager that abstracts CPU, memory, and storage to enable fault-tolerant distributed systems.

Apache Ambari (C): An open-source tool for provisioning, managing, and monitoring Hadoop clusters.

Apache Hadoop (D): Not a cluster management tool. Hadoop is a framework for distributed storage and processing (HDFS + MapReduce), not a management tool.

Thus, the correct answer is Option D (Apache Hadoop).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Big Data Ecosystem: Hadoop Tools & Cluster Management.

### NEW QUESTION # 38

Which of the following is NOT a part of Internal Process Optimization?

- A. Business Metamorphosis
- B. Business Optimization
- C. Business Monitoring
- D. None of the above
- E. Business Insights

**Answer: A**

Explanation:

Internal Process Optimization (IPO) is one of the core applications of data science in business operations. It focuses on improving internal efficiency, reducing costs, and enhancing productivity using data-driven insights.

Typical components of IPO include:

Business Monitoring (Option A): Tracking performance metrics and KPIs in real time.

Business Insights (Option C): Identifying trends, anomalies, and inefficiencies through analytics.

Business Optimization (Option D): Applying data models to optimize workflows, resource utilization, or supply chains.

However:

Business Metamorphosis (Option B): Refers to fundamental transformational change or reinvention of a business model, not process-level optimization. This is more aligned with strategic transformation, not internal process optimization.

Therefore, the correct answer is Option B (Business Metamorphosis).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Business Applications of Data Science: Internal Process Optimization.

### NEW QUESTION # 39

Which of the following phases is NOT a Big Data Business Model Maturity Index?

- A. Business Metamorphosis
- B. Business Strategy
- C. Data Monetization
- D. Business Optimization
- E. Business Monitoring

**Answer: B**

Explanation:

The Big Data Business Model Maturity Index (BDBMMI) defines phases organizations pass through in leveraging data strategically:  
Business Monitoring (A): Tracking metrics and reporting.  
Business Insights (not listed in options but part of the framework).  
Business Optimization (B): Using analytics to improve efficiency.  
Data Monetization (D): Creating new revenue streams with data.  
Business Metamorphosis (E): Transforming the business model through data.  
Business Strategy (Option C): While strategy is essential, it is not one of the defined phases of BDBMMI.  
Thus, the correct answer is Option C (Business Strategy).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Big Data Business Model Maturity Index (BDBMMI).

#### NEW QUESTION # 40

The spokes of the "Hub and Spoke" analytics architecture are the analytic use cases or applications that help the organization to optimize:

- A. Both A and B
- **B. All of the above**
- C. Deliver a more compelling customer experience
- D. Key business processes
- E. Uncover new monetization opportunities

**Answer: B**

Explanation:

In the Hub and Spoke analytics architecture:

The hub is the central data platform (data lake, warehouse, or unified data hub).

The spokes are the analytic use cases or applications that leverage this data to create business value.

These spokes typically help the organization:

Optimize key business processes (Option A).

Deliver improved customer experiences (Option B).

Uncover monetization opportunities (Option C).

Since all three are valid, the correct answer is Option E (All of the above).
