

PCNSE Real Questions & PCNSE Test Dumps Demo

PCNSE questions with complete solutions 2023 updated graded A+

AutoFocus - correct answer The AutoFocus threat intelligence service enables security teams to prioritize their response to unique, targeted attacks and gain the intelligence, analytics and context needed to protect your organization. It provides context around an attack spotted in your traffic and threat logs, such as the malware family, campaign, or malicious actor targeting your organization. AutoFocus correlates and gains intelligence from:

- o WildFire® service - the industry's largest threat analysis environment
- o PAN-DB URL filtering service
- o MineMeld application for AutoFocus, enabling aggregation and correlation of any third-party threat intelligence source directly in AutoFocus
- o Traps advanced endpoint protection
- o Aperture SaaS-protection service
- o Unit 42 threat intelligence and research team
- o Intelligence from technology partners
- o Palo Alto Networks global passive DNS network

GlobalProtect Secure Mobile Workforce - correct answer GlobalProtect cloud service reduces the operational burden associated with securing your remote networks and mobile users by leveraging a cloud-based security infrastructure managed by Palo Alto Networks. Uses client software to build secure personal VPN tunnels to the firewall.

URL Filtering Web Security - correct answer A firewall subscription/license. Most attacks and exposure to malicious content occurs during the normal course of web browsing activities, which requires the ability to allow safe, secure web access for all users. URL Filtering with PAN-DB automatically prevents attacks that leverage the web as an attack vector, including phishing links in emails, phishing sites, HTTP-based command and control, malicious sites and pages that carry exploit kits. Focuses on preventing access to PHISHING WEBSITES!!!

Active/Active HA - correct answer Both Active, used in specific circumstances, such as asynchronous routing setups. Both individually maintain routing and session tables, sync'd to the other. HIGHER RISK!

Active/Passive HA - correct answer One active, one standby firewall. Easiest to manage. Network, Objects, Policies Certificates and Session Table changes are synced.

Single Pass Architecture (SP3) - correct answer How a Palo Alto FW processes a packet with different variables which include: SRC/DST Zones, SRC/DST IPs, App-ID, User-ID, Content ID.
