## Associate AD0-E124 Level Exam - Certification AD0-E124 Torrent

AD0-E124 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, AD0-E124 test answers will be your best choice. For office workers, AD0-E124 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but AD0-E124 Study Materials will help you to solve this problem perfectly. All the language used in AD0-E124 study materials is very simple and easy to understand. With AD0-E124 test answers, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. AD0-E124 test dumps can help you solve all the problems in your study.

## Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q16-Q21):

### NEW QUESTION # 16

A DevOps engineer wants to migrate a project code base into Cloud Manager. Which two actions must the DevOps engineer take to make sure the migration is successful? (Choose two.)

- A. Run the source code through a local static code quality checker and analyze the report to identify any potential issues.
- B. Review the source code and make sure it meets the required standards and that all the classes have unit tests.
- C. Run the Dispatcher validator to make sure there are no errors in the Dispatcher configuration.

- **D. Build and deploy the source code repository to a local environment using the latest version of the SDK.**

**Answer: C,D**

Explanation:

When migrating an existing AEM code base to AEM as a Cloud Service (AEMaaS), the structure and rules are strictly enforced by the Cloud Manager pipeline. Before pushing code, a DevOps engineer must validate the code locally against the AEM as a Cloud Service SDK to ensure OSGi bundles resolve and mutable /immutable content separations are respected (Option B). Additionally, the Dispatcher configuration has migrated from an Apache-based structure to a strict AEMaaS format. Running the local Dispatcher Validator CLI tool (Option C) is mandatory to ensure there are no syntax or structural errors in the dispatcher configurations, which would otherwise immediately fail the Cloud Manager build pipeline.

#### **NEW QUESTION # 17**

Which tools can be used to collect performance metrics in AEM? (Choose two)

- A. Dispatcher Flush Agent
- **B. Cloud Manager Log Analyzer**
- C. CRXDE Lite
- **D. AEM Web Console (/system/console/status)**

**Answer: B,D**

#### **NEW QUESTION # 18**

A DevOps engineer needs to perform initial onboarding of users who need to have admin privileges to the AEM as a Cloud Service instances.

What must the DevOps engineer do?

- **A. Add users to the AEM Administrators-xxx product profile via the Admin Console**
- B. Configure admin privileges in the Dispatcher configuration
- C. Add users to the Administrators group via the Oak LDAP synchronization
- D. Add users to the Administrators group on the AEM instances

**Answer: A**

#### **NEW QUESTION # 19**

Which monitoring practices help ensure AEM's long-term stability? (Choose three)

- A. Using multiple package managers for redundancy
- B. Enabling automatic updates for all OSGi configurations
- **C. Tracking error rates in logs**
- **D. Monitoring system health metrics**
- **E. Regularly reviewing Cloud Manager reports**

**Answer: C,D,E**

#### **NEW QUESTION # 20**

A DevOps engineer is managing an AEM as a Cloud Service Sites environment for a customer. They are in the final stages of going live and only have a couple of release candidates to go. During regular testing using an on-premise code quality check, all requirements were passed. Running the pipeline and a deployment to the AEM as a Cloud Service instances shows that the code quality check did not pass.

The code flagged, which produces the following issue:

```
@Property(label = "Service Password", value = "mysecretpassword")  
private static final String PROP_SERVICE_PASSWORD = "password";
```

What should the DevOps engineer do?

- A. Inform the development team and ask them to remove the password
- B. Modify the pipeline configuration to allow static passwords
- C. Contact support to bypass the pipeline step in Cloud Manager
- D. Suppress the warning in Cloud Manager using @SuppressWarnings("squid:S2068")

Answer: A

## NEW QUESTION # 21

.....

For most users, access to the relevant qualifying examinations may be the first, so many of the course content related to qualifying examinations are complex and arcane. According to these ignorant beginners, the AD0-E124 exam questions set up a series of basic course, by easy to read, with corresponding examples to explain at the same time, the AD0-E124 study question let the user to be able to find in real life and corresponds to the actual use of AD0-E124 learned knowledge. And it will only takes 20 to 30 hours for them to pass the AD0-E124 exam.
