Using New LEED-Green-Associate Mock Exam - No Worry About LEED Green Associate Exam

Many candidates test again and again since the LEED-Green-Associate test cost for is not cheap. Why not choose to pass exam certainly with exam study guide materials? You are under great pressure before passing the real test without USGBC LEED-Green-Associate Study Guide Pdf. It may have a big impact on your career and life. Why not take a shortcut while facing difficulties? Why not trust latest version of Lead1Pass LEED-Green-Associate study guide PDF and give you a good chance?

USGBC LEED Green Associate Exam Sample Questions (Q232-Q237):

NEW QUESTION # 232

LEED for Neighborhood Development encourages

- A. development on federally regulated wetlands
- B. employment of Fair Trade Certified day laborers
- C. development within and near existing communities or public transportation infrastructure
- D. development in rural areas within 1 mi. (1.60 km) of public transportation, and 3/4 mi. (1.20 km) from a school, medical facility, park and shopping center

Answer: C

Explanation:

LEED for Neighborhood Development (LEED ND) is a rating system that aims to inspire and help create better, more sustainable, well-connected neighborhoods¹. It looks beyond the scale of buildings to consider entire communities¹. One of the main goals of LEED ND is to reduce vehicle miles traveled (VMT) and greenhouse gas emissions by promoting the location and design of neighborhoods that are accessible by foot or public transportation²³⁴. Therefore, LEED ND encourages development within and near existing communities or public transportation infrastructure, which is option C.

NEW QUESTION # 233

The project area defined by the perimeter of a building plan is referred to as the building's

- A. footprint
- B. envelope
- C. shell
- D. density

Answer: A

NEW QUESTION # 234

Which of the following is a measure of energy use intensity?

- A. Daylighting and views
- B. Energy consumed per unit of floor space
- C. The amount of electricity a wind turbine can produce
- D. Systems with ENERGY STAR" requirements

Answer: B

Explanation:

Energy use intensity (EUI) is a measure of energy use per unit of floor space. It is calculated by dividing the total energy consumed by the building in one year (measured in kilowatt-hours or kilo-British Thermal Units) by the total gross floor area of the building (measured in square feet or square meters). EUI is a useful metric for comparing the energy performance of different buildings or benchmarking against national averages. EUI can vary depending on building type, climate, occupancy, and other factors. Generally, a lower EUI indicates better energy efficiency and lower environmental impact. Reference: What is Energy Use Intensity (EUI)?²; Energy Use Intensity (EUI)³

NEW QUESTION # 235

In which of the following common building applications are chlorofluorocarbons (CFCs) found?

- A. Roof-top vents
- B. Insulation agents
- C. Fire hydrants
- D. Centrifugal chillers

Answer: D

NEW QUESTION # 236

Which of the following credit categories does not have a prerequisite?

- A. Water Efficiency
- B. Indoor Environmental Quality
- C. Location and Transportation
- D. Materials and Resources

Answer: A

Explanation:

Explanation

Water Efficiency is the only credit category that does not have a prerequisite in LEED v4 for Building Design and Construction.

Prerequisites are the minimum requirements that all projects must meet to be eligible for LEED certification. They are mandatory and non-weighted, meaning they do not contribute to the project's score. The other credit categories have at least one prerequisite each, as shown in the table below:
