## VMware 3V0-32.23 Practical Information & 3V0-32.23 Exam Topic

Choose 3V0-32.23 premium files, you will pass for sure. Each questions & answers of 3V0-32.23 free training pdf are edited and summarized by our specialist with utmost care and professionalism. The VMware 3V0-32.23 latest online test is valid and really trustworthy for you to rely on. The highly relevant content & best valid and useful 3V0-32.23 Exam Torrent will give you more confidence and help you pass easily.

VMware 3V0-32.23 Certification Exam is a valuable credential for IT professionals who are looking to advance their skills and expertise in cloud management and automation. By earning this certification, professionals demonstrate their ability to design and implement advanced cloud-based solutions using VMware technology, making them valuable assets to any organization looking to adopt cloud-based solutions.

## VMware Cloud Management and Automation Advanced Design Sample Questions (Q97-Q102):

NEW QUESTION # 97

What role is responsible for defining and managing policies within vRealize Automation?

- A. Business Group Manager
- **B. Fabric Administrator**
- C. Infrastructure Architect
- D. Tenant Administrator

**Answer: B**

#### NEW QUESTION # 98

What are some of the key components and capabilities you would find in a VMware Cloud Management solution? (Select all that apply)

- A. Integration with legacy mainframe systems.
- **B. Automated scaling of virtual machines based on resource usage.**
- **C. Real-time performance monitoring and reporting.**
- **D. Multi-cloud management, allowing management of resources across various cloud providers.**
- E. Built-in antivirus and firewall functionalities.

**Answer: B,C,D**

#### NEW QUESTION # 99

What is the key role of VMware Identity Manager (Workspace ONE Access) in a physical design?

- **A. Enabling secure user authentication and access management**
- B. Streamlining HR processes
- C. Managing physical security
- D. Designing office floor plans

**Answer: A**

#### NEW QUESTION # 100

An architect is designing an Aria Automation for Secure Host for configuration management and Security operations with the following requirements:

The network has more than 500 nodes to be managed.

The number of nodes can scale up to 5000 as the network grows.

There is a need for load balancing.

What two aspects does the architect need to include when designing the solution? (Choose two.)

- **A. Deploy Aria Automation for Secure Host with Aria Suite Lifecycle Manager**
- B. Deploy Aria Automation for Secure Host with standard installation
- **C. Prepare four nodes with different functions such as RaaS, the Salt master, PostgreSQL and Redis**
- D. Prepare two nodes with the RaaS function
- E. Prepare three nodes with a Databases function

**Answer: A,C**

Explanation:

For large, scalable, and load-balanced environments, deploy Aria Automation for Secure Host using Suite Lifecycle Manager and architect the solution with dedicated nodes for each core function (RaaS, Salt master, PostgreSQL, Redis) to ensure performance and reliability.

#### NEW QUESTION # 101

An architect has been asked about migrating a client's solution from vRealize Automation 7.x to VMware Aria Automation 8.x. One of the requirements is to continue to build custom cloud templates.

Which component of a VMware Aria Automation solution will fulfill this requirement?

- A. Aria Automation Consumption
- B. Aria Automation Assembler
- C. Cloud-Init
- D. Cloud Zones

**Answer: B**

Explanation:

Aria Automation Assembler is the component in VMware Aria Automation 8.x used to create, edit, version, and publish custom cloud templates, fulfilling the requirement to continue building custom templates after migrating from vRealize Automation 7.x.
