

Latest Juniper - JN0-1103 - New Design - Associate (JNCIA-Design) Braindumps Files

2026 Latest ExamBoosts JN0-1103 PDF Dumps and JN0-1103 Exam Engine Free Share: <https://drive.google.com/open?id=1ni-lcqE5-l6a77wEdsGCssvCBi2kr5GF>

"ExamBoosts" created a demo version for customer satisfaction so candidates can evaluate the JN0-1103 exam questions before purchasing. Also, "ExamBoosts" has made this Juniper JN0-1103 practice exam material budget-friendly with many benefits that make it the best choice. Our team of experts who designed this JN0-1103 Exam Questions assures that whoever prepares with it adequately, there is no doubt of failure and they will pass the Juniper CERTIFICATION EXAM on the first attempt. Purchase our "ExamBoosts" study material now and get free updates for up to 1 year.

Our company is thoroughly grounded in our values. They begin with a prized personal and organizational quality--Integrity--and end with a shared concern for the candidates who are preparing for the JN0-1103 exam. Our values include Innovation, Teamwork, Customer Focus, and Respect for Customers. These JN0-1103 values guide every decision we make, everywhere we make them. As you can sense by now, and we really hope that you can be the next beneficiary of our JN0-1103 training materials. You can just free download the demo of our JN0-1103 training materials to check.

Exam JN0-1103 Book & JN0-1103 Valid Exam Dumps

Time is life, time is speed, and time is power. You have to spend less time reaching your goals before you can walk ahead and seize more opportunities. Now, if you use our JN0-1103 preparation materials, you only need to learn twenty to thirty hours to go to the exam. And this data is provided and tested by our worthy customers. For they have passed the exam with the help of our JN0-1103 Exam Questions in such a short time and as 98% to 100% of them passed. The pass rate is also unmatched in the market!

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Securing the Network: This section of the exam measures the skills of Security Architects and covers essential security design principles. It encompasses general security considerations, strategies for securing data centers and campus WANs, and the implementation of zero-trust security models. Additionally, it delves into Secure Access Service Edge (SASE) frameworks to enhance network security posture.
Topic 2	<ul style="list-style-type: none"> Customer Network Design Requirements: This section of the exam measures skills of Network Design Engineers and covers the foundational aspects of network design. It includes understanding Juniper's life-cycle service approach, defining proposal boundaries, and considerations for both greenfield and brownfield deployments. The section also addresses top-down network design methodologies and capacity planning to ensure scalable and efficient network infrastructures.
Topic 3	<ul style="list-style-type: none"> Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active <ul style="list-style-type: none"> active and active passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.
Topic 4	<ul style="list-style-type: none"> Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.
Topic 5	<ul style="list-style-type: none"> Data Center Network Design: This section of the exam measures skills of Data Center Network Engineers and covers considerations for general data center network design. Topics include data center design best practices, understanding traffic patterns, virtual chassis implementation, and environmental considerations. The section also delves into data center fabric architectures, benefits of IP fabric over traditional architectures, spine-and-leaf device placement, underlay and overlay design, routing protocol selection, and best practices for IP fabric scaling.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q251-Q256):

NEW QUESTION # 251

What are two issues that affect the uptime of a network? (Choose two.)

- A. planned outages
- B. WAN failure
- C. power current used
- D. packet loss

Answer: A,B

Explanation:

Planned outages (for maintenance or upgrades) and WAN failures (due to carrier or link issues) both directly impact network uptime by causing service disruptions, either scheduled or unexpected.

NEW QUESTION # 252

What information is included in an RFP issuance?

- A. design requirements
- B. COGS pricing
- C. product positioning
- D. product features

Answer: A

NEW QUESTION # 253

Which two features does Secure Web Gateway provide? (Choose two.)

- A. name resolution services
- B. application queuing services
- C. proxy services
- D. firewall services

Answer: C,D

Explanation:

A Secure Web Gateway (SWG) provides proxy services to inspect and filter web traffic and includes firewall capabilities to enforce security policies, block threats, and control access to internet resources.

NEW QUESTION # 254

Which two statements are correct about using BGP as the underlay routing protocol in an IP fabric? (Choose two.)

- A. Using an IGP is required for an EBGp underlay.
- B. Static routes are required for EBGp neighbors to establish.
- C. EBGp underlay requires the multipath multiple-as parameter with the corresponding load-balancing policy.
- D. Route Reflection can be used in an IBGP underlay to increase control plane scalability.

Answer: C,D

Explanation:

BGP multipath with multiple-as is required in an EBGp underlay to enable ECMP across multiple autonomous system paths. In an IBGP underlay, Route Reflectors help scale the control plane by reducing the need for a full mesh of BGP sessions among all fabric nodes.

NEW QUESTION # 255

Which tool in a Juniper Networks SDSN solution is responsible for telling Juniper and third-party network switches to block a threat in real time?

- A. Policy Enforcer
- B. Sky ATP
- C. Juniper Secure Analytics
- D. SRX Series device

Answer: B

NEW QUESTION # 256

.....

The three versions of our JN0-1103 training materials each have its own advantage, now I would like to introduce the advantage of the software version for your reference. On the one hand, the software version can simulate the real JN0-1103 examination for all of the users in windows operation system. By actually simulating the real test environment, you will have the opportunity to learn and correct your weakness in the course of study. So that you can get your best pass percentage by our JN0-1103 Exam Questions.
