## Cisco Pass4sure 200-901 Study Materials: DevNet Associate Exam - Exam-Killer Easy to Pass

You can open the Cisco PDF questions file from any location and go through actual 200-901 exam questions without time restrictions. The DevNet Associate Exam 200-901 practice test is ideal for intensive preparation. You can attempt our DevNet Associate Exam 200-901 Practice Exam multiple times to review and enhance your test preparation. The real 200-901 exam environment of desktop and web-based practice exams will help you counter DevNet Associate Exam 200-901 pass anxiety.

## Cisco DevNet Associate Exam Sample Questions (Q297-Q302):

### NEW QUESTION # 297

Which statement describes the benefit of using functions in programming?

- A. Functions create the implementation of secret and encrypted algorithms.
- B. Functions ensure that a developer understands the inner logic contained before using them as part of a script or application.
- C. Functions allow problems to be split into simpler, smaller groups, and reduce code repetition, which makes the code easier to read.
- D. Functions store mutable values within a script or application.

**Answer: C**

Explanation:

Functions in programming are a fundamental concept that provide several key benefits:

Modularity: By breaking down a program into smaller, manageable functions, it becomes easier to understand, debug, and maintain.

Reusability: Functions allow code to be reused across the program, reducing redundancy.

Abstraction: Functions can abstract complex operations into a simple function call, making the code easier to read and understand.

Testing: Functions can be tested individually, which simplifies the process of testing the overall program.

### NEW QUESTION # 298

Refer to the exhibit.

An engineer wants to create a Bash script to automate a workflow that is related to a machine learning-based application. The engineer wants to use the application as a container and use an image from the open-source public repository. What is accomplished by the script?

- A. Install a software package
- B. Create a new software package.
- C. Install and remove files.
- D. Update an existing software package.

**Answer: A**

Explanation:

The Bash script shown in the exhibit performs the following actions:

\* Updates the list of available packages using brew update.

\* Installs Docker using brew install docker.

\* Upgrades pip and installs tensorflow and pytorch using pip install.

\* Pulls the latest TensorFlow Docker image using docker pull tensorflow/tensorflow:latest.

This script is designed to install the necessary software packages (Docker, TensorFlow, PyTorch) required for a machine learning-based application. It does not create or remove any software packages but installs them.

\* Homebrew Documentation

\* Pip Documentation

### NEW QUESTION # 299

Refer to the exhibit.

Given the API documentation for the UCS SDK python class, UcsHandle, which code snippet creates a handle instance?

- A. Option A
- B. Option D
- C. Option C
- D. Option B

**Answer: A**

Explanation:

Option A correctly creates a handle instance using the UcsHandle class from the UCS SDK in Python. The correct instantiation requires providing the IP address, username, password, port number, and secure connection parameters as per the documented API.

The correct code snippet is:

```
from ucsm.sdk.ucshandle import UcsHandle
handle = UcsHandle("10.1.2.254", "admin", "password", port="443", secure=True)
```

This snippet matches the API documentation requirements:

- \* ip: The IP or hostname of the UCS Server.
- \* username: The username as configured on the UCS Server.
- \* password: The password as configured on the UCS Server.
- \* port: The port number to be used during the connection.
- \* secure: True for a secure connection.

References:

- \* UCS Python SDK Documentation (provides details on how to use UcsHandle)
- \* Cisco DevNet Associate Exam Topics: Infrastructure and Automation (understanding how to use APIs and SDKs for automation)

### NEW QUESTION # 300

Which two items are Cisco DevNet resources? (Choose two.)

- **A. API Documentation**
- **B. Sandbox**
- C. Software Research
- D. TAC Support
- E. Bitbucket

**Answer: A,B**

Explanation:

Explanation/Reference: <https://developer.cisco.com/>

### NEW QUESTION # 301

A 401 HTTP response code is returned when calling a REST API. What is the error state identified by this response code?

- **A. The request has not been accepted because it requires authentication.**
- B. The server cannot process the request as it has detected an issue in the request syntax or body.
- C. The server cannot find the requested resource because the path specified is incorrect.
- D. The server accepted the request but the client is not authorized for this content.

**Answer: A**

Explanation:

401 = No or wrong authentication (which means not accepted)

403 = authentication good but client is not authorised (which means accepted but wont go through)

### NEW QUESTION # 302

.....

You are so busy that you have to save your time on the exam. Using our 200-901 study torrent, you will find you can learn about the knowledge of your 200-901 exam in a short time. Because you just need to spend twenty to thirty hours on the 200-901 practice exams, our 200-901 Study Materials will help you learn about all knowledge, you will successfully pass the 200-901 exam and get your certificate. So if you think time is very important for you, please try to use our 200-901 study materials, it will help you save your time.
