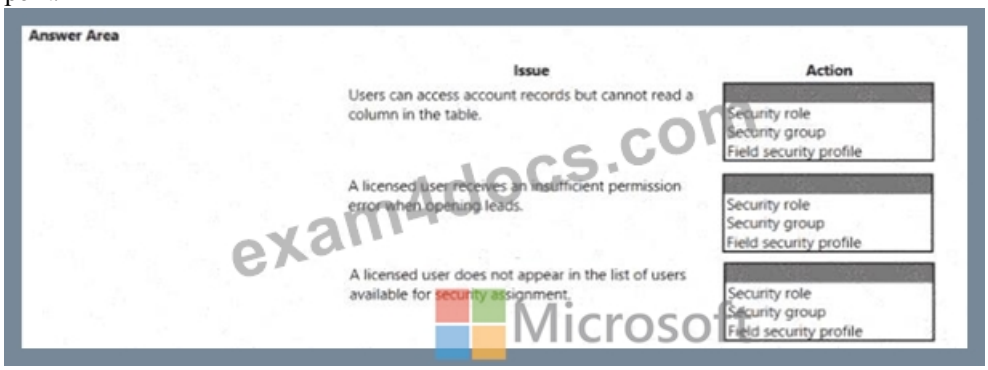
Microsoft Power Platform Solution Architect Sample Questions (Q49-Q54):

NEW QUESTION # 49
A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.
The company reports the following access issues:
* Users can access account records but cannot read a column m the table.
* A licensed user receives an insufficient permission error when opening leads.
* A licensed user does not appear in the list of users available for security assignment.
You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.



Answer:

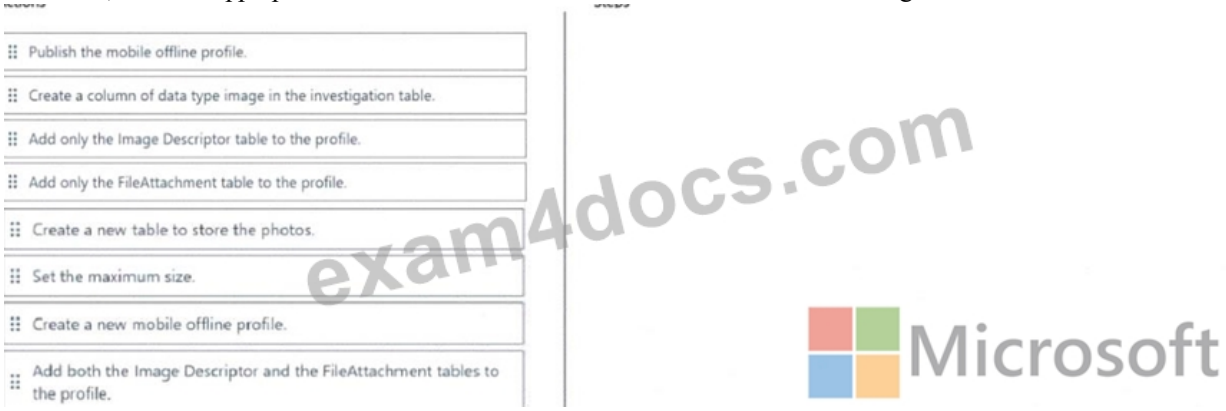
NEW QUESTION # 50
A police department uses apps deployed in Microsoft Power Platform to capture investigation information using a custom table. The apps run in offline mode in areas with poor data signals.
The department identified a need for photos to be captured during the investigation and stored in Microsoft Dataverse for easy access.
You need to implement the photo-capturing functionality.
Which four actions should you perform in sequence?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:

Explanation:

NEW QUESTION # 51
A company has a website that contains a form named Contact Us. Data from completed forms is saved to a shared document. An office administrator periodically reviews the document. The office administrator sends new submissions to another employee who creates contacts or updates existing contacts.
You need to recommend a solution to automate the process.
What should you recommend?

- A. Dynamics 365 Marketing

- B. Dynamics 365 Customer Service
- C. Excel Online Connector
- D. Dynamics 365 Customer Insights

Answer: D

Explanation:
Microsoft designed Customer Insights to allow organizations to map, match, merge, and enrich customerbased data from different sources. A classic scenario would be to merge data from customer service software, like Freshdesk, and online sales, such as Shopware, into one source for reporting and further data analysis.

NEW QUESTION # 52
A company uses Power Pages for article submissions. The article properties are stored in a table in Microsoft Dataverse and the content of the article is stored in a related Microsoft SharePoint library. The company invites different experts outside its organization to review an article before publishing it. The reviewers are granted access to the articles in Microsoft Dataverse. The company has the following requirements:
* Provide a app to canvas the reviewers that exposes both the article properties and content in read-only mode.
* Once the review is completed, the reviewer saves the review data, and the article and the review no longer appear in the app.
You need to recommend the components to be used for each requirement.
Which options should you use?
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
