What are you waiting for? Quickly use our E_S4CPE_2405 study materials.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q17-Q22):

NEW QUESTION # 17

Where can you find pre-delivered integration content? Note: There are 3 correct answers to this question.

- A. SAP Cloud ALM
- B. SAP Discovery Center
- C. SAP Help Portal
- D. Cloud Integration Automation service
- E. SAP Business Accelerator Hub

Answer: B,C,E

NEW QUESTION # 18

In a new implementation of SAP S/4HANA Cloud Private Edition, what tool is used for the initial one- time deployment of SAP Best Practices content?

- A. SAP Cloud ALM
- B. SAP Central Business Configuration
- C. SAP Signavio Process Navigator
- D. SAP Solution Builder

Answer: B

Explanation:

In a new implementation of SAP S/4HANA Cloud Private Edition, the initial one-time deployment of SAP Best Practices content is facilitated by the following tool:

Option A: SAP Central Business Configuration

This option is correct. SAP Central Business Configuration is designed to streamline the configuration of SAP S/4HANA Cloud solutions, including the deployment of SAP Best Practices content.

Option B: SAP Cloud ALM

This option is incorrect. SAP Cloud ALM primarily focuses on application lifecycle management and is not used for the initial deployment of Best Practices content.

Option C: SAP Signavio Process Navigator

This option is incorrect. SAP Signavio Process Navigator is utilized for process modeling and analysis, not for deploying Best Practices content.

Option D: SAP Solution Builder

This option is incorrect. SAP Solution Builder is typically associated with on-premise implementations and is not the recommended tool for SAP S/4HANA Cloud Private Edition.

Therefore, for the initial deployment of SAP Best Practices content in SAP S/4HANA Cloud Private Edition, SAP Central Business Configuration is the appropriate tool to use.

NEW QUESTION # 19

Which of the following is SAP's recommended Human Capital Management (HCM) system?

- A. SAP Ariba
- **B. SAP SuccessFactors**
- C. SAP Concur
- D. SAP Fieldglass

Answer: B

Explanation:

SAP recommends SAP SuccessFactors as its Human Capital Management (HCM) system. SAP SuccessFactors is a comprehensive, cloud-based HCM suite that supports core HR and payroll, talent management, HR analytics, workforce planning, and employee experience management. It is designed to provide individualized experiences that keep employees engaged and productive.

SAP

Option A: SAP Concur

This option is incorrect. SAP Concur is a travel and expense management solution, not an HCM system.

Option C: SAP Ariba

This option is incorrect. SAP Ariba is a procurement and supply chain management solution, not related to HCM.

Option D: SAP Fieldglass

This option is incorrect. SAP Fieldglass is a vendor management system for managing external workforce and services procurement, not a comprehensive HCM system.

In summary, SAP SuccessFactors is SAP's recommended solution for Human Capital Management, offering a wide range of HR functionalities in a cloud-based suite.

SAP recommends a best-of-breed approach for Human Capital Management (HCM) as part of its cloud strategy, particularly in conjunction with SAP S/4HANA Cloud Private Edition implementations under RISE with SAP. Let's evaluate the options:

* A. SAP Concur: This is a travel and expense management solution, not an HCM system. It focuses on automating expense reporting and travel processes, making it irrelevant to this question.

* B. SAP SuccessFactors: This is the correct answer. SAP SuccessFactors is SAP's recommended cloud-based HCM solution, offering modules for core HR, payroll, talent management, employee experience, and workforce analytics. It integrates seamlessly with SAP S/4HANA Cloud Private Edition for end-to-end business processes, replacing the on-premise SAP ERP HCM module as SAP shifts customers to cloud HCM under its "People" pillar. SAP actively promotes SuccessFactors as its strategic HCM system.

* C. SAP Ariba: This is a procurement and supplier management solution, focusing on sourcing, contracts, and spend management. It has no HCM functionality, so it is incorrect.

* D. SAP Fieldglass: This solution manages contingent workforce and services procurement (e.g., temporary workers, contractors). While it complements HCM in workforce management, it is not a full HCM system and is not SAP's recommended core HCM offering.

In summary, SAP SuccessFactors is SAP's recommended Human Capital Management system, widely adopted and integrated with SAP S/4HANA Cloud Private Edition.

NEW QUESTION # 20

Which tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. SAP Cloud SDK
- **C. SAP Fiori extensibility apps**
- **D. SAP Build**

Answer: C,D

Explanation:

SAP provides tools that enable non-developers to create low-code/no-code extensions, facilitating customization without extensive programming knowledge.

Option A: SAP Business Application Studio

This option is incorrect. SAP Business Application Studio is a development environment designed for professional developers,

offering comprehensive coding capabilities.

Option B: SAP Build

This option is correct. SAP Build is a suite of low-code/no-code tools that allow business users to create applications, automate processes, and design business sites with minimal coding. It includes SAP Build Apps, SAP Build Process Automation, and SAP Build Work Zone.

Option C: SAP Fiori extensibility apps

This option is correct. SAP Fiori extensibility apps are key user tools embedded in SAP S/4HANA that enable non-developers to adapt and extend SAP applications, such as adding custom fields or creating custom business objects, using a low-code/no-code approach.

Option D: SAP Cloud SDK

This option is incorrect. SAP Cloud SDK is intended for professional developers to build extensions and applications on SAP Cloud Platform, requiring coding expertise.

In summary, SAP Build and SAP Fiori extensibility apps empower non-developers to create low-code/no-code extensions within SAP S/4HANA Cloud Private Edition.

NEW QUESTION # 21

Which tool is included in SAP Enterprise Support for all customers that enables comprehensive integration monitoring?

- **A. SAP Cloud ALM**
- B. SAP Business Technology Platform
- C. SAP Analytics Cloud
- D. SAP Signavio Process Manager

Answer: A
