No matter you are a student, a working staff, or even a house wife, you will find the exact version of your NCP-US Exam Materials to offer you a pleasant study experience.

## Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q77-Q82):

### NEW QUESTION # 77

Which tool allows a report on file sizes to be automatically generated on a weekly basis?

- A. File Analytics
- B. Files view in Prism Central
- C. Data Lens
- D. Files Console via Prism Element

**Answer: C**

### NEW QUESTION # 78

An administrator has received an alert AI60068 - ADSDuplicationIPDetected details of alert as follows:

Which error log should the administrator review to determine the related Duplicate IP address involved?

- A. Minerva\_cvm.log

- B. Solver.log
- **C. Minerva.nvm.log**
- D. Tcpkill.log

**Answer: C**

#### NEW QUESTION # 79

When hardening the network for Nutanix Objects, which is the only network endpoint that should be exposed to users?

- **A. S3**
- B. virbr0
- C. OOB
- D. eth0

**Answer: A**

#### NEW QUESTION # 80

An administrator needs to configure a Files share with these requirements:

Supports 100 virtual desktop users

Share would host user data

Share is limited to 1 TB, evenly distributed across users

Optimized for best I/O performance within the current environment

Which two configuration actions should the administrator take to meet these requirements? (Choose two.)

- A. Configure a standard share.
- **B. Create a distributed share.**
- C. Enable ABE on the share.
- **D. Add a quota policy to the share.**

**Answer: B,D**

Explanation:

According to Nutanix Files SMB Share Default Permission<sup>1</sup>, a standard share is created with default permissions for three built-in groups: Administrators, Users, and Backup Operators. This may not be suitable for hosting user data that needs to be evenly distributed across users.

According to Nutanix Support & Insights<sup>2</sup>, a distributed share is a type of SMB share that allows you to distribute files across multiple file servers for better performance and scalability. This can help optimize the I/O performance within the current environment.

According to Nutanix File and NFS Mount Examples<sup>3</sup>, a quota policy is a way to limit the amount of space that a user or group can consume on a share. This can help enforce the 1 TB limit on the share and ensure that each user gets an equal amount of space.

#### NEW QUESTION # 81

An administrator is tasked with deploying a Microsoft Server Failover Cluster for a critical application that uses shared storage.

The failover cluster instance will consist of VMs running on an AHV-hosted cluster and bare metal servers for maximum resiliency.

What should the administrator do to satisfy this requirement?

- A. Provision a new Storage Container.
- B. Create a Bucket with Objects.
- **C. Provision a Volume Group with Volume.**
- D. Create an SMB Share with Files.

**Answer: C**

#### NEW QUESTION # 82
