To understand our AgilePM-Foundation learning questions in detail please look at the introduction of our product on the website pages.

APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

What role is responsible for interpreting the needs of the Business Sponsor and communicating these to the team?

- A. Technical Coordinator
- B. Team Leader
- C. Business Analyst
- **D. Business Visionary**

Answer: D

Explanation:

The Business Visionary is responsible for interpreting the needs of the Business Sponsor and communicating these to the team. This role represents the Business Sponsor by communicating the vision of the project and ensuring that the team understands the sponsor's requirements.

NEW QUESTION # 51

Who is responsible for the application of Principle 8, Demonstrate Control?

- A. The project-level roles
- **B. Collectively applied by the whole team**
- C. Team Leader
- D. Project Manager

Answer: B

Explanation:

The application of Principle 8, Demonstrate Control, is collectively applied by the whole team⁴. This principle ensures that there are proper levels of planning, progress measurement, and reporting in place.

NEW QUESTION # 52

What DSDM product describes how the benefits have actually accrued following a period in live operation?

- A. Project Review Report
- B. Delivery Plan
- C. Prioritized Requirement List
- **D. Benefits Assessment**

Answer: D

Explanation:

The DSDM product that describes how the benefits have actually accrued following a period in live operation is the Benefits Assessment³. This product is used to assess the actual benefits realized after the solution has been in use³.

NEW QUESTION # 53

What event can be added to the structure of a Sprint to help facilitate cross-team planning?

- A. Project Sprint Planning
- B. Sprint Retrospective
- C. Sprint Planning
- **D. Project planning event**

Answer: D

Explanation:

Comprehensive and Detailed Explanation (concise, policy-compliant):

Scrum defines four events within the Sprint: Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective. When multiple teams collaborate on a common outcome, coordination frequently benefits from an additional, project-level planning event layered around (not replacing) Scrum's core events. In Agile project environments, a lightweight project planning event brings Product Owner(s), key stakeholders, and representatives from each team together to align intentions, dependencies, and release objectives across teams before teams finalize their own Sprint Plans. This complements, rather than duplicates, each team's Sprint Planning by creating a shared understanding of priorities and cross-team impacts, enabling teams to enter Sprint Planning with clearer constraints and collaboration points. The Sprint Retrospective focuses on improvement, not forward planning. Hence, the add-on that facilitates cross-team planning is a Project planning event.

NEW QUESTION # 54

What is defined as 'Working together towards a shared goal'?

- **A. Collaboration**
- B. Governance
- C. Communication
- D. Scrum

Answer: A

Explanation:

Agile Project Management places a premium on collaboration-the act of different roles (business, product, and technical) working together toward a shared goal. While communication is the exchange of information, collaboration goes further: it is joint problem-solving and decision-making that aligns perspectives to deliver value. AgilePM/DSDM principles explicitly promote active business involvement and empowered teams, creating an environment where collaboration is the default for refining requirements, planning increments, resolving trade-offs, and assuring quality. Ceremonies such as backlog refinement, Sprint Planning, daily coordination, and reviews exist to reinforce collaborative behavior, shorten feedback loops, and surface constraints early. Scrum itself (option C) is a framework that enables collaboration, but the definition given-"working together towards a shared goal"-is the definition of collaboration, not the framework or governance mechanisms. Governance (option D) concerns oversight and control structures rather than the cooperative behaviors that produce outcomes. Consequently, the statement most accurately and directly defines Collaboration.

NEW QUESTION # 55

• • • • •

You cannot pass the AgilePM-Foundation exam if you do not have real Agile Project Management (AgilePM) Foundation Exam (AgilePM-Foundation) exam questions. It is the foremost thing that everyone should have to nail the APMG-International AgilePM-Foundation Exam.
