

LEED-Green-Associate최신버전시험덤프공부 & LEED-Green-Associate시험난이도

그리고 ITDumpsKR LEED-Green-Associate 시험 문제집의 전체 버전을 클라우드 저장소에서 다운로드할 수 있습니다: <https://drive.google.com/open?id=1PqhxaHdJ4IrVO0kzTTR4uLCWgsIQAhH4>

ITDumpsKR의USGBC LEED-Green-Associate교육 자료는 고객들에게 높게 평가 되어 왔습니다. 그리고 이미 많은 분들이 구매하셨고USGBC LEED-Green-Associate시험에서 패스하여 검증된 자료임을 확신 합니다. USGBC LEED-Green-Associate시험을 패스하여 자격증을 취득하면IT 직종에 종사하고 계신 고객님의 성공을 위한 중요한 요소들 중의 하나가 될 것이라는 것을 잘 알고 있음으로 더욱 믿음직스러운 덤프로 거듭나기 위해 최선을 다해드리겠습니다.

USGBC LEED-Green-Associate 시험요강:

주제	소개
주제 1	• LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.
주제 2	• Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.
주제 3	• Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
주제 4	• Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.

LEED-Green-Associate최신버전 시험덤프공부 시험 최신 덤프

자기한테 딱 맞는 시험준비공부자료 마련은 아주 중요한 것입니다. ITDumpsKR는 LEED-Green-Associate업계에 많이 알려져있는 덤프제공 사이트입니다. ITDumpsKR덤프자료가 여러분의 시험준비자료로 부족한 부분이 있는지는 구매사이트에서 무료샘플을 다운로드하여 덤프의일부분 문제를 우선 체험해보시면 됩니다. ITDumpsKR에서

LEED-Green-Associate제공해드리는 퍼펙트한 덤프는 여러분이 한방에 시험에서 통과하도록 최선을 다해 도와드립니다.

최신 USGBC LEED LEED-Green-Associate 무료샘플문제 (Q123-Q128):

질문 # 123

A project team receives advice from a LEED AP about reducing a building footprint in order to increase the potential area of a botanical garden. Which impact category does this design recommendation support?

- A. Protect, Enhance and Restore Biodiversity and Ecosystem Services
- B. Promote Access to Neighborhood Completeness Resources
- C. Enhance Human Health Globally and Across the Entire Built Environment Life Cycle
- D. Build a Greener Economy

정답: A

질문 # 124

The general contractor for a project located in a dense urban area attempts to gain a credit in Materials and Resources. Which of the following is considered a local material?

- A. Vinyl flooring manufactured 500 mi (805 km) away but is sold at a warehouse 2 mi (3.2 km) from the project site
- B. Stone that is harvested and processed 80 mi (128.7 km) from the project site and purchased 75 mi. (121 km) away
- C. Quarry tile that is extracted 370 mi (595 km) away and manufactured in a city 1.600 mi (2 575 km) away
- D. Bamboo flooring that is harvested 2.350 mi. (3 782 km) away and manufactured 200 mi. (322 km) away from the project site

정답: B

설명:

Stone that is harvested and processed 80 mi (128.7 km) from the project site and purchased 75 mi (121 km) away is considered a local material because it meets the criteria of being extracted, harvested, recovered, or manufactured within 100 mi (160 km) of the project site. Local materials can help reduce environmental impacts associated with transportation, such as greenhouse gas emissions, air pollution, and energy consumption. Local materials can also support the local economy and community. LEED projects can earn credits for using local materials under the Materials and Resources category. References: Local Materials in India³; LEED v4 BD+C Reference Guide, Materials and Resources, page 65

질문 # 125

To attain the Integrative Process Credit, a project team must identify

- A. order of phase completion
- B. synergies between systems
- C. tenant design and construction guidelines
- D. community outreach strategies

정답: B

설명:

The Integrative Process Credit in LEED v4 requires the project team to implement an integrative process that enables them to discover unique opportunities for enhancing project performance and environmental benefits¹. The project team should identify and use opportunities to achieve synergies across disciplines and building systems².

질문 # 126

When instituting a construction waste management plan, which of the following should be tracked?

- A. Amount of site soils reused on the site
- B. Number Of dumpsters used
- C. Amount of post-consumer recycled content

- D. Volume/weight of materials diverted

정답: D

설명:

Explanation

a construction waste management plan is a document that outlines how the project will reduce, reuse, recycle, or dispose of the construction and demolition waste generated on site. One of the key components of a construction waste management plan is to track and document the volume or weight of materials that are diverted from landfills or incinerators by redirecting them to other destinations, such as recycling facilities, salvage yards, donation centers, or reuse on site¹².

Tracking and documenting the volume or weight of materials diverted is important for several reasons, such as:

It helps measure the performance and effectiveness of the waste management plan and identify areas for improvement.

It provides evidence and verification for LEED certification, as LEED v4 requires projects to divert at least 50% or 75% of construction and demolition waste (by weight or volume) from disposal in landfills or incineration facilities for one or two points, respectively³.

It demonstrates the environmental and economic benefits of waste diversion, such as reducing greenhouse gas emissions, conserving natural resources, saving disposal costs, and creating jobs¹².

The number of dumpsters used is not a relevant metric for tracking a construction waste management plan, as it does not indicate how much waste is generated or diverted. The amount of site soils reused on the site is also not a valid indicator, as site soils are not considered construction and demolition waste by LEED v4³. The amount of post-consumer recycled content is not related to a construction waste management plan, as it refers to the percentage of material in a product that was previously used by consumers and diverted from landfills or incinerators before being incorporated into a new product.

질문 # 127

A wood product that is certified by the Forest Stewardship Council (FSC) is guaranteed to be

- A. harvested from a well-managed source
- B. grown in a tropical forest
- C. purchased from a LEED AP
- D. packaged with environmentally friendly materials

정답: A

질문 # 128

.....

요즘같이 시간인즉 금이라는 시대에, 우리 ITDumpsKR선택으로 USGBC LEED-Green-Associate인증시험응시는 아주 좋은 일입니다. 우리는 100%시험패스를 보장하고 또 일년무료 업데이트서비스를 제공합니다. 그리고 시험에서 떨어지셨다고 하시면 우리는 덤프비용전액 환불을 약속 드립니다.
