

CDFOM専門トレーニング、CDFOM合格対策

2026年Topexamの最新CDFOM PDFダンプおよびCDFOM試験エンジンの無料共有: <https://drive.google.com/open?id=1jgC6nFJhGXByXAx5MUfy48bHqURISCL>

成功する方法を見つけるだけで、失敗する口実をしない。Topexamの EXINのCDFOM試験トレーニング資料は問題と解答を含めて、高度に認証されたIT領域の専門家の経験と創造を含めているものです。うちのEXINのCDFOM試験トレーニング資料は正確性が高く、カバー率も広いで、君がEXINのCDFOM認定試験に合格するのに大変役に立ちます。

EXIN CDFOM 認定試験の出題範囲:

トピック	出題範囲
トピック 1	施設管理: メンテナンス プログラム、アウトソーシング、契約、スケジュール、スベア パーツ、汚染制御などのインフラストラクチャ メンテナンスをカバーします。
トピック 2	監視 レポート 制御: 監視、エスカレーション手順、レポート、傾向分析を通じてパフォーマンス監視に対処します。
トピック 3	サービス レベル管理: 測定可能なメトリックを含む SLA、サービス レポート、顧客満足度の測定、継続的な改善プロセスなどのサービス契約の作成と管理について説明します。
トピック 4	環境の持続可能性: 電力効率、廃棄物管理、再生可能エネルギーの統合を通じて環境への影響を最小限に抑えることに重点を置いています。
トピック 5	プロジェクト管理: 管理原則、組織構造、プロジェクトフェーズを含むプロジェクト実行をカバーします。
トピック 6	ガバナンス、リスク、コンプライアンス: コンプライアンス、リスク管理、文書管理、財務管理、ベンダー監視などの管理フレームワークをカバーします。
トピック 7	物理的セキュリティの管理: セキュリティ ポリシー、スタッフ管理、インシデント処理、セキュリティ 監査を通じて施設の保護に対処します。
トピック 8	データ センターの運用: 施設の継続的な機能をサポートする日常の運用活動と手順に重点を置きます。
トピック 9	安全性と法的要件の管理: 安全ポリシー、トレーニング、作業許可システム、PPE、緊急事態への備え、安全性監査など、職場の安全性コンプライアンスに重点を置いています。

- 組織の復元力: ビジネスの継続性、施設の冗長性、ビジネス影響分析、災害復旧への備えに対処します。

CDFOM 合格対策 & CDFOM 資格認定試験

なぜみんなが順調に EXIN の CDFOM 試験に合格できることに対する好奇心がありますか。EXIN の CDFOM 試験に合格したいんですか。実は、彼らが試験に合格したコツは我々 Topexam の提供する EXIN の CDFOM 試験ソフトを利用したんです。豊富な問題集、専門的な研究と購入の後の一年間の無料更新、ソフトで復習して、自分の能力の高めを感じられます。EXIN の CDFOM 試験に合格することができます。

EXIN Certified Data Center Facilities Operations Manager 認定 CDFOM 試験問題 (Q34-Q39):**質問 # 34**

Key Performance Objectives (KPOs) need to be defined.

What is a suitable time period for KPOs?

- A. Only yearly
- B. Only weekly
- C. Only monthly
- **D. Weekly, monthly and yearly**

正解: D

解説:

KPOs are strategic and operational performance objectives that must support:

- * Daily operations
- * Weekly operational control
- * Monthly service reporting
- * Quarterly reviews
- * Annual strategic planning

EPI emphasizes that performance objectives must be measurable across multiple timeframes, depending on the operational layer:

- * Weekly# short-term operational checks
- * Monthly# service-level analysis and trend review
- * Yearly# strategic improvement and long-term performance planning

Therefore, weekly, monthly, and yearly intervals are all suitable for KPOs.

Thus, Dis correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Performance measurement occurs across multiple time horizons.
- * KPOs must be aligned to operational, tactical, and strategic levels.

質問 # 35

Of the below, which can be used to optimize succession planning?

- A. Relationship with manager
- B. Disciplinary program
- **C. Career development program**
- D. External recruitment

正解: C

解説:

Succession planning ensures organizational continuity by preparing internal staff to step into key roles when needed.

EPI's organizational management framework emphasizes:

* Structured Skill Growth A Career Development Program provides:

- * targeted training
- * competency building
- * job rotation

- * professional certification pathways
- * mentorship and development planning

* Identification of Future Leaders Through career development planning, individuals are tracked, evaluated, and groomed for future responsibilities.

* Internal Capability Strengthening Succession planning focuses on internal development first, before external hiring options.

Why the other options are not correct:

* B. Disciplinary program Used for performance or behavioral issues; it does not contribute to succession planning.

* C. Relationship with manager While helpful, it is not a formal tool for succession planning and is not an EPI-recognized structural process.

* D. External recruitment This is a remedy when internal succession strength is insufficient-not a tool for optimizing succession planning.

Thus, A - Career development program is the correct choice.

EPI DCFOM-Aligned Reference Concepts (Paraphrased, Not Verbatim)

* Succession planning depends on structured skill development.

* Training, assessment, and career development form the foundation of succession pipelines.

* Job rotation and development programs are integral to organizational continuity.

質問 # 36

According to the World Economic Forum, which of the below is the largest global risk of the next decade?

- A. Air quality in large cities
- B. Earthquakes
- C. Global climate change
- D. Water scarcity

正解: C

解説:

While not strictly internal to EPI's core domain (which deals with data centre operations), this question refers to the external risk landscape, as identified by the World Economic Forum (WEF). The WEF's Global Risks Report 2025 shows that environmental risks dominate the 10-year horizon, with extreme weather, ecosystem collapse, and climate-related disruption ranking highest.

Specifically, global climate change (or extreme weather/climate-related events) is rated as the most severe risk over the next decade.

While water scarcity and air quality are significant, the WEF ranks climate change / extreme weather as the top long-term threat.

Therefore, option A is the most correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

* Environmental sustainability forms a major component of data centre operations risk and resilience planning.

* External macro-risks such as climate change must be integrated into facility resilience, power planning, cooling design, and business continuity strategies.

質問 # 37

During lock-out/tag-out, which of the below is the most recommended procedure?

- A. Operator locking out the equipment and the same operator removing the lock-out
- B. Operator locking out the equipment and the facilities manager removing the lock-out
- C. Operator locking out the equipment and the safety manager removing the lock-out
- D. Operator locking out the equipment and another operator removing the lock-out

正解: A

解説:

In the EPI Facilities Operations Manager body of knowledge, the Lock-Out/Tag-Out (LOTO) procedure is a mandatory safety control to ensure that electrical or mechanical equipment cannot be energized while work is being performed. A core principle emphasized in EPI safety training is:

"The person who applies the lock must be the same person who removes it." This aligns with international best practices for occupational health and safety, where LOTO ensures that the individual performing maintenance or repair has full control of the

energy isolation device.

Why this is required:

- * Personal Safety Responsibility The lock identifies the technician directly working on the equipment.

Only they can confirm whether work is complete and the area is safe for re-energizing.

- * Risk Prevention If someone else removes the lock (another operator, safety manager, or facilities manager), they may incorrectly assume that the equipment is ready to be restored, which can lead to severe injury or fatality.

- * Compliance With EPI Safety Guidelines EPI emphasizes the principle of "single-person control" over hazardous energy. No supervisor or colleague may remove another technician's lock unless a formal, documented emergency override procedure is followed - which is not considered standard practice.

- * Clear Accountability Chain LOTO prevents ambiguity or miscommunication. The technician who placed the lock is the only one with full knowledge of the work status and hazards involved.

Why other options are incorrect:

- * A, B, and C violate the fundamental LOTO rule because they involve someone other than the applying operator removing the lock.

- * Oversight personnel (safety manager, facilities manager) monitor and audit the process, but they should not remove another person's lock except under rare, emergency, escalation-approved situations.

EPI DCFOM-Aligned Reference Concepts

- * LOTO must ensure the isolation device is locked and tagged by the person performing the work.

- * Only the same individual may remove their own lock.

- * Removal by another party is only permitted under controlled, documented emergency protocols.

- * The process prevents accidental energization and protects worker safety.

質問 # 38

The needs analysis has been completed and the data center organization is tasked with the capability assessment.

Which of the below is a mandatory activity as part of the capability assessment?

- A. Review the security needs
- **B. Create inventory of skills, knowledge and capacity**
- C. Determine the availability requirements
- D. Identify applicable safety requirements

正解: B

解説:

A capability assessment evaluates whether the data center organization is capable of delivering the defined services.

The mandatory activity is to:

Create an inventory of skills, knowledge, and capacity of the workforce and resources.

This includes:

- * Current staff technical skills

- * Certifications

- * Experience

- * Availability (capacity)

- * Backup and contingency roles

- * Alignment with service demands and SLAs

Why other options are incorrect:

- * A: Security needs are part of service requirements, not capability assessment.

- * C: Availability requirements are determined during needs analysis, not capability assessment.

- * D: Safety requirements belong to statutory and compliance analysis, not capability assessment.

Thus, B is the correct answer.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Capability assessment requires determining skills, competencies, and available capacity.

- * Ensures the organization can meet defined services and SLAs.
