

NS0-528 test braindumps: Implementation Engineer - Data Protection Exam & NS0-528 exam dumps materials

BTW, DOWNLOAD part of ExamCost NS0-528 dumps from Cloud Storage: https://drive.google.com/open?id=1AdD04tDkDz5LTl9eEAIzkJMRMumz96_

Our NS0-528 study braindumps are designed in the aim of making the study experience more interesting and joyful. Through pleasant learning situation and vivid explanation of our NS0-528 exam materials, you will become more interested in learning. Please accept our NS0-528 learning prep and generate a golden bowl for yourself. We are waiting for your wise decision to try on or buy our excellent NS0-528 training guide.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 2	• NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 3	• NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
Topic 4	• Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.

Topic 5	• NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.

Valid NS0-528 Exam Testking, Dumps NS0-528 Questions

This is the online version of the Implementation Engineer - Data Protection Exam (NS0-528) practice test software. It is also very useful for situations where you have free time to access the internet and study. Our web-based Implementation Engineer - Data Protection Exam (NS0-528) practice exam is your best option to evaluate yourself, overcome mistakes, and pass the Network Appliance NS0-528 Exam on the first try. You will see the difference in your preparation after going through NS0-528 practice exams.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

A volume on a FabricPool-enabled aggregate is consuming 10 TB of the performance tier and 90 TB of the cloud tier. A SnapMirror copy needs to be created on a FabricPool-enabled peer cluster at a disaster recovery location. In this scenario, how much data is transferred when the SnapMirror relationship is initialized?

- A. 100 TB
- B. 200 TB
- C. 90 TB
- D. 10 TB

Answer: A

NEW QUESTION # 47

What are the requirements for installing NetApp data protection software?

- A. A high-speed internet connection and a powerful processor
- B. A compatible operating system and sufficient storage space
- C. A specialized network and firewall configuration
- D. A dedicated server and a database management system

Answer: B

NEW QUESTION # 48

You are asked to implement a NetApp solution that has high availability with transparent failover between two data centers. Which two solutions satisfy this requirement? (Choose two.)

- A. ONTAP Select
- B. SnapMirror Sync
- C. MetroCluster
- D. SnapVault

Answer: C,D

NEW QUESTION # 49

How can you ensure regulatory compliance in a data protection solution?

- Answer: C**

- [illegible]
