Salesforce-Data-Cloud Reliable Braindumps Book | Salesforce-Data-Cloud Valid Test Guide

All points of questions are correlated with the newest and essential knowledge. The second one of Salesforce-Data-Cloud test guide is emphasis on difficult and hard-to-understand points. Experts left notes for your reference, and we believe with their notes things will be easier. In addition, the new supplementary will be sent to your mailbox if you place order this time with beneficial discounts at intervals. So our Salesforce-Data-Cloud Exam Questions mean more intellectual choice than other practice materials.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q27-Q32):

NEW QUESTION # 27

What is the maximum limit of the number of records for Full Refresh Extract Method?

- A. 40 million
- B. No hard limit
- C. 10 million
- D. 50 million

Answer: C

Explanation:

The maximum limit of the number of records for Full Refresh Extract Method is 10 million. Full Refresh Extract Method is an option for extracting data from Marketing Cloud to Data Cloud. It extracts all records from a data extension regardless of when they were created or modified. If the number of records exceeds 10 million, an error occurs and no records are extracted. References: Extract

Methods

NEW QUESTION # 28

Northern Trail Outfitters unifies individuals in its Data Cloud instance.

Which three features can a consultant use to validate the data on a unified profile?

Choose 3 answers

- A. Profile Explorer
- B. Query APL
- C. Data Explorer
- D. Data Actions
- E. Identity Resolution

Answer: A,C,E

Explanation:

To validate the data on a unified profile, the consultant can use the following features:

Identity Resolution: This feature allows the consultant to view and edit the identity resolution rulesets that determine how individuals are unified from different data sources¹.

Data Explorer: This feature allows the consultant to browse and filter the unified profiles and view their attributes, segments, and activities².

Profile Explorer: This feature allows the consultant to drill down into a specific unified profile and view its details, such as source records, identity graph, calculated insights, and data actions³. References:

1: Identity Resolution in Data Cloud

2: Data Explorer in Data Cloud

3: Profile Explorer in Data Cloud

NEW QUESTION # 29

Which match criteria is only available as custom in order to perform an exact match in Identity Resolution?

- A. Phone Number
- B. Party Identification Id
- C. Email Address
- D. Government Id

Answer: B

Explanation:

Party Identification Id is the only match criteria that is only available as custom in order to perform an exact match in Identity Resolution. Party Identification Id is a unique identifier for each Party Identification record in the data model. It is not one of the standard match criteria that Data Cloud provides out of the box, so it has to be created as a custom match criteria. Custom match criteria allow you to use any field from the data model as a match rule. Reference: Create Custom Match Criteria

NEW QUESTION # 30

Which two common use cases can be addressed with Data Cloud?

- A. Understand and act upon customer data to drive more relevant experiences
- B. Harmonize data from multiple sources with a standardized and extendable data model
- C. Safeguard critical business data by serving as a centralized system for backup and disaster recovery
- D. Govern enterprise data lifecycle through a centralized set of policies and processes

Answer: A,B

Explanation:

Data Cloud can address these two common use cases by providing a platform that allows customers to ingest, map, enrich, and activate data from various sources using the Customer 360 data model, and by enabling customers to create segments, insights, and activations based on their customer data. References: [Data Cloud Overview], [Customer 360 Data Model], [Data Activation]

NEW QUESTION # 31

Northern Trail Outfitters (NTO) wants to connect their B2C Commerce data with Data Cloud and bring two years of transactional history into Data Cloud.

What should NTO use to achieve this?

- A. B2C Commerce Starter Bundles plus a custom extract
- B. B2C Commerce Starter Bundles
- C. Direct Sales Product entity ingestion
- D. Direct Sales Order entity ingestion

Answer: A

Explanation:

The B2C Commerce Starter Bundles are predefined data streams that ingest order and product data from B2C Commerce into Data Cloud. However, the starter bundles only bring in the last 90 days of data by default. To bring in two years of transactional history, NTO needs to use a custom extract from B2C Commerce that includes the historical data and configure the data stream to use the custom extract as the source. The other options are not sufficient to achieve this because:

A). B2C Commerce Starter Bundles only ingest the last 90 days of data by default.

B). Direct Sales Order entity ingestion is not a supported method for connecting B2C Commerce data with Data Cloud. Data Cloud does not provide a direct-access connection for B2C Commerce data, only data ingestion.

C). Direct Sales Product entity ingestion is not a supported method for connecting B2C Commerce data with Data Cloud. Data Cloud does not provide a direct-access connection for B2C Commerce data, only data ingestion.
