SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q11-Q16):

NEW QUESTION # 11

What can a warehouse order include? Note: There are 2 correct answers to this question.

- A. Physical inventory items
- B. Warehouse tasks
- C. Wave items
- D. Warehouse requests

Answer: A,D

Explanation:

Warehouse Orders

* A warehouse order groups operations to be performed in the warehouse, such as putaway or picking. It can include:

* Warehouse Requests (A): These are requests for inbound, outbound, or internal operations.

* Physical Inventory Items (B): Items flagged for counting during physical inventory processes.

Excluded Options

* Warehouse Tasks (C): Tasks are detailed operations but are not directly part of a warehouse order.

* Wave Items (D): Wave items are part of planning waves, not directly included in orders.

SAP S/4HANA Cloud Private Edition Reference

* Refer to Warehouse Order Management and Structure in SAP EWM Help documentation for comprehensive details.

NEW QUESTION # 12

What is required to perform explicit counting using the Quality Inspection Engine? Note: There are 2 correct answers to this question.

- A. Work center
- B. QM integration
- C. Inspection rule
- D. Sampling procedure

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Explicit counting in the Quality Inspection Engine (QIE) in SAP EWM involves a deliberate count of stock during an inspection, often triggered by quality requirements. Option B ("Sampling procedure") is correct because it defines how many items are inspected (e.g., percentage or fixed number), configured in the quality management (QM) system and linked to EWM. Option C ("Inspection rule") is correct as it specifies the inspection process, including whether explicit counting is required, and is maintained in EWM under SPRO: SCM Extended Warehouse Management > Quality Management > Inspection Rules. Work center (A) is relevant for production processes, not QIE counting, and QM integration (D) is a prerequisite for QIE but not a direct requirement for explicit counting itself.

NEW QUESTION # 13

What can a warehouse order include? Note: There are 2 correct answers to this question.

- A. Physical inventory items
- B. Warehouse tasks
- C. Wave items
- D. Warehouse requests

Answer: A,D

NEW QUESTION # 14

How are warehouse orders sorted for automatic assignment to a resource? Note: There are 2 correct answers to this question.

- A. By execution priority
- B. By latest starting date
- C. By activity area sorting
- D. By mode

Answer: A,C

NEW QUESTION # 15

Which of the following actions are possible based on a value-added service (VAS) order? Note: There are 3 correct answers to this question.

- A. Assemble a kit.
- B. Perform quality inspection
- C. Capture costs.
- D. Capture time required.
- E. Consume auxiliary products.

Answer: A,D,E

Explanation:

A Value-Added Service (VAS) order in SAP Extended Warehouse Management (EWM) enables enhanced activities for goods that go beyond the standard warehouse operations. Here's how the selected actions are supported:

* Capture Time Required (A):

* VAS orders allow for tracking the time spent on specific value-added services.

* The time can be recorded and used for subsequent costing or reporting purposes.

* This is configured in the VAS activity details in EWM.

* Assemble a Kit (C):

* VAS orders facilitate kitting processes, where individual products are combined into a kit as part of warehouse operations.

* The system supports creating and managing kits via predefined VAS templates and work instructions.

* Consume Auxiliary Products (D):

* Auxiliary products, such as packaging materials or additional items used during the value-added service, can be consumed and accounted for through the VAS order process.

* This consumption is defined in the VAS template, which specifies materials and quantities.
