

# Here's a Quick and Proven Way to Pass FCSS\_LED\_AR-7.6 Certification exam

BONUS!!! Download part of iPassleader FCSS\_LED\_AR-7.6 dumps for free: <https://drive.google.com/open?id=1tS6aJZJ6p5rYfwcTYCGlohwcS9DUXb73>

The data that come up with our customers who have bought our FCSS\_LED\_AR-7.6 actual exam and provided their scores show that our high pass rate is 98% to 100%. This is hard to find and compare with in the market. And numerous enthusiastic feedbacks from our worthy clients give high praises not only on our FCSS\_LED\_AR-7.6 study torrent, but also on our sincere and helpful 24 hours customer services on FCSS\_LED\_AR-7.6 exam questions online. All of these prove that we are the first-class vendor in this career and have authority to ensure your success in your first try on FCSS\_LED\_AR-7.6 exam.

## Fortinet FCSS\_LED\_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Central Management: This section addresses managing FortiSwitch via FortiManager over FortiLink, implementing zero-touch provisioning, configuring VLANs, ports, and trunks, and setting up FortiExtender and FortiAP devices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Authentication: This domain covers advanced user authentication using RADIUS and LDAP, two-factor authentication with digital certificates, and configuring syslog and RADIUS single sign-on on FortiAuthenticator.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Zero-Trust LAN Access: This domain covers machine authentication, MAC Authentication Bypass, NAC policies for wireless security, guest portal deployment, and advanced solutions like FortiLink NAC, dynamic VLAN, and VLAN pooling.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Monitoring and Troubleshooting: This section covers configuring quarantine mechanisms, managing FortiAIops, troubleshooting FortiGate communication with FortiSwitch and FortiAP, and using monitoring tools for wireless connectivity.</li></ul>

## FCSS\_LED\_AR-7.6 Test Cram | Pass FCSS\_LED\_AR-7.6 Test Guide

How our FCSS\_LED\_AR-7.6 study questions can help you successfully pass your coming FCSS\_LED\_AR-7.6 exam? The answer lies in the outstanding FCSS\_LED\_AR-7.6 exam materials prepared by our best industry professionals and tested by our faithful clients. Our exam materials own the most authentic and useful information in questions and answers. For our FCSS\_LED\_AR-7.6 practice material have been designed based on the format of real exam questions and answers that you would surely find better than the other exam vendors'.

## Fortinet FCSS - LAN Edge 7.6 Architect Sample Questions (Q51-Q56):

### NEW QUESTION # 51

When troubleshooting a captive portal issue, which POST parameter in the redirected HTTPS request can be used to track the user's session and ensure that the request is valid?

- A. `redir`
- B. `username`
- C. `email`
- **D. `magic`**

**Answer: D**

Explanation:

In FortiGate captive portal workflows (local or external):

- \* Client connects to SSID / interface that has captive portal enabled.
- \* Client makes an HTTP/HTTPS request.
- \* FortiGate intercepts and redirects to login page(local or external URL).
- \* The portal form is submitted via POSTback to FortiGate.

To prevent tampering and to tie the POST back to the correct user session, FortiGate includes a special hidden parameter in the redirect and expects it in the POST:

- \* The parameter is named `magic`.

The `magic` value:

- \* Is a unique token generated per captive-portal session.
- \* Encodes/session-links the user's IP, interface, and session info.
- \* Allows FortiGate to ensure that:
  - \* The POST comes from the user who initiated the original request.
  - \* The request is not a random or replayed submission.

When troubleshooting:

- \* If the external portal does not preserve and resend the `magic` parameter back to FortiGate exactly as received, authentication fails, and you'll see errors like "session not found" or "invalid magic".

Why the other fields are not used for this purpose

- \* A. `username`- Just the login ID; multiple users can use the same username from different locations, so it can't uniquely track the browser session.
- \* B. `redir`- Contains the URL the user originally requested, so they can be sent back there after login. It is not a session integrity token.
- \* D. `email`- Optional field used in some guest/registration flows; irrelevant to session validation.

### NEW QUESTION # 52

Which two actions must be completed before a FortiGate can be provisioned using ZTP?

(Choose two)

Response:

- **A. Assign a policy package to the device**
- B. Manually configure VLANs
- **C. Set up DNS server for resolving FortiManager**
- D. Configure local admin password

**Answer: A,C**

### NEW QUESTION # 53

You are configuring a new wireless network for your organization. The network requires users to authenticate through a RADIUS server for secure access. Which two security modes should you select when creating the SSID to ensure compatibility with the RADIUS server?

(Choose two.)

Response:

- A. WPA-Personal

- B. WPA3-Enterprise
- C. WPA2-Enterprise
- D. WPA/WPA2 Mixed Mode
- E. WEP

Answer: B,D

#### NEW QUESTION # 54

Which CLI automation action on FortiGate is used to define automatic quarantine based on event logs?

Response:

- A. config system automation-action → set action quarantine
- B. config user quarantine → set auto-log enable
- C. config automation-stitch → set action-type quarantine-host
- D. config log setting → set quarantine enable

Answer: C

#### NEW QUESTION # 55

When configuring a FortiSwitch trunk port, which actions are needed?

(Choose two)

Response:

- A. Set native VLAN ID
- B. Specify allowed VLANs
- C. Disable LLDP
- D. Enable RSTP

Answer: A,B

#### NEW QUESTION # 56

.....

Our desktop software also tracks your progress, and identifies your strengths and weaknesses, to ensure you're getting the best possible experience for the FCSS\_LED\_AR-7.6 Exam. All features of the web-based version are available in the desktop software. But the desktop software works offline and only on Windows computers.
