## Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q113-Q118):

### NEW QUESTION # 113

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Windows Virtual Desktop host pool that contains five session hosts. The session hosts run Windows 10 Enterprise multi-session.

You need to prevent users from accessing the internet from Windows Virtual Desktop sessions. The session hosts must be allowed to access all the required Microsoft services.

Solution: You modify the IP configuration of each session host.

Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

## Topic 1, Litware, Inc

### Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the button to return to the question.

### Overview

Litware, Inc. is a pharmaceutical company that has a main office in Boston, United States, and a remote office in Chennai, India.

#### Existing Environment. Identity Environment

The network contains an on-premises Active Directory domain named litware.com that syncs to an Azure Active Directory (Azure AD) tenant named litware.com.

The Azure AD tenant contains the users shown in the following table.

□ All users are registered for Azure Multi-Factor Authentication (MFA).

#### Existing Environment. Cloud Services

Litware has a Microsoft 365 E5 subscription associated to the Azure AD tenant. All users are assigned Microsoft 365 Enterprise E5 licenses.

Litware has an Azure subscription associated to the Azure AD tenant. The subscription contains the resources shown in the following table.

□ Litware uses custom virtual machine images and custom scripts to automatically provision Azure virtual machines and join the virtual machines to the on-premises Active Directory domain.

### Network and DNS

The offices connect to each other by using a WAN link. Each office connects directly to the internet.

All DNS queries for internet hosts are resolved by using DNS servers in the Boston office, which point to root servers on the internet. The Chennai office has caching-only DNS servers that forward queries to the DNS servers in the Boston office.

### Requirements. Planned Changes

Litware plans to implement the following changes:

- \* Deploy Windows Virtual Desktop environments to the East US Azure region for the users in the Boston office and to the South India Azure region for the users in the Chennai office.
- \* Implement FSLogix profile containers.
- \* Optimize the custom virtual machine images for the Windows Virtual Desktop session hosts.
- \* Use PowerShell to automate the addition of virtual machines to the Windows Virtual Desktop host pools.

### Requirements. Performance Requirements

Litware identifies the following performance requirements:

- \* Minimize network latency of the Windows Virtual Desktop connections from the Boston and Chennai offices.
- \* Minimize latency of the Windows Virtual Desktop host authentication in each Azure region.
- \* Minimize how long it takes to sign in to the Windows Virtual Desktop session hosts.

### Requirements. Authentication Requirements

Litware identifies the following authentication requirements:

- \* Enforce Azure MFA when accessing Windows Virtual Desktop apps.
- \* Force users to reauthenticate if their Windows Virtual Desktop session lasts more than eight hours.

### Requirements. Security Requirements

Litware identifies the following security requirements:

- \* Explicitly allow traffic between the Windows Virtual Desktop session hosts and Microsoft 365.
- \* Explicitly allow traffic between the Windows Virtual Desktop session hosts and the Windows Virtual Desktop infrastructure.
- \* Use built-in groups for delegation.
- \* Delegate the management of app groups to CloudAdmin1, including the ability to publish app groups to users and user groups.
- \* Grant Admin1 permissions to manage workspaces, including listing which apps are assigned to the app groups.
- \* Minimize administrative effort to manage network security.
- \* Use the principle of least privilege.

### Requirements. Deployment Requirements

Litware identifies the following deployment requirements:

- \* Use PowerShell to generate the token used to add the virtual machines as session hosts to a Windows Virtual Desktop host pool.
- \* Minimize how long it takes to provision the Windows Virtual Desktop session hosts based on the custom virtual machine images.
- \* Whenever possible, preinstall agents and apps in the custom virtual machine images.

#### NEW QUESTION # 114

You have a Windows Virtual Desktop host pool that has a max session limit of 15. Disconnected sessions are signed out immediately.

The session hosts for the host pool are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-scaling-script>

#### NEW QUESTION # 115

You have an Azure subscription that contains the resources shown in the following table.

You have a virtual machine named Server1 that runs Windows Server and is connected to VNet3.

You need to deploy the Azure Virtual Desktop host pools shown in the following table.

The solution must meet the following requirements:

- \* The session hosts in Pool1 must access Server1 via the Microsoft backbone network.
- \* The session hosts in Pool2 must access storage1 via the Microsoft backbone network.

What should you configure on the virtual networks? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 116

You have an Azure Virtual Desktop deployment.

You need to secure administrative access to session hosts. The solution must require that administrators use the Azure portal to access the session hosts.

What should you include in the solution?

- **A. Azure Firewall**
- B. Microsoft Defender for Cloud
- C. Conditional Access policies
- D. Azure Bastion

**Answer: A**

#### NEW QUESTION # 117

You have an Azure subscription that contains the resources shown in the following table.

You need to ensure that users can restore files saved to their FSLogix profile.

What should you do?

- **A. From the Volume1 blade in the Azure portal, create a snapshot policy.**
- B. From the Azure portal, create a Recovery Services vault and a backup policy.
- C. From the Azure portal, create an Azure Backup vault and a backup policy.
- D. From the CPool1 blade in the Azure portal, create a new volume.

**Answer: A**

Explanation:

From the docs: Azure Files Premium tier integrates with Azure Backup and is supported in conjunction with FSLogix. Azure NetApp Files offers a similar snapshot mechanism to make copies of your FSLogix profile containers.
