If you have purchased our LEED-Green-Associate exam braindumps, you are advised to pay attention to your emails. Our system will automatically send you the updated version of the LEED-Green-Associate preparation quiz via email. If you do not receive our email, you can directly send an email to ask us for the new version of the LEED-Green-Associate Study Materials. We will soon solve your problems at the first time. And according to our service, you can enjoy free updates for one year.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.

Topic 2	<ul style="list-style-type: none"> • Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
Topic 3	<ul style="list-style-type: none"> • Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
Topic 4	<ul style="list-style-type: none"> • Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.
Topic 5	<ul style="list-style-type: none"> • Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
Topic 6	<ul style="list-style-type: none"> • Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.

LEED-Green-Associate Online Version & LEED-Green-Associate Reliable Braindumps

The price for LEED-Green-Associate study materials is convenient, and no matter you are a student or an employee, you can afford the expense. Moreover, LEED-Green-Associate exam materials are high-quality, and you can pass your exam just one time by using them. We offer you free demo to have a try before buying LEED-Green-Associate exam materials, and you can have a try before purchasing, so that you can have a better understanding of what you are going to buy. We are pass guarantee and money back guarantee if you fail to pass the exam. We have online and offline service, if you have any questions for LEED-Green-Associate Exam Dumps, you can contact us, we will give you reply as soon as possible.

USGBC LEED Green Associate Exam Sample Questions (Q236-Q241):

NEW QUESTION # 236

In the commercial LEED rating systems, which point range will achieve the Silver level of certification?

- A. 30-39 points
- B. 60-69 points
- C. 40-49 points
- D. 50-59 points

Answer: C

Explanation:

Explanation

In the commercial LEED rating systems, achieving 40-49 points will result in Silver level certification. The points are awarded based on how well the project meets various sustainability criteria set out in the LEED rating system. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 237

Which strategy can be used to reduce the amount of construction waste?

- A. Encourage recycling
- B. Increase the use of recycled content

- C. Specify regional materials
- D. Institute an off-site composting program

Answer: A

Explanation:

Recycling is a strategy that can be used to reduce the amount of construction waste that is sent to landfills or incinerators. Recycling involves collecting, sorting, processing, and reusing or selling materials that would otherwise be discarded as waste. Recycling can save natural resources, reduce greenhouse gas emissions, create jobs, and lower disposal costs¹. References: LEED v4 Green Associate Candidate Handbook¹, EPA's Recycling Basics

NEW QUESTION # 238

Which strategy is an example of permanent entryway systems used to reduce dust, dirt and contaminants brought into a facility?

- A. Conducting a thermal comfort survey
- B. Installing outdoor air monitoring equipment
- C. Providing sensors at all entrances
- **D. Placing grilles, grates or mats at all major entrances**

Answer: D

Explanation:

Explanation

Placing grilles, grates or mats at all major entrances is an example of permanent entryway systems used to reduce dust, dirt and contaminants brought into a facility. Permanent entryway systems are designed to capture dirt and particulates from people's shoes and prevent them from entering the indoor environment. This improves the indoor air quality and reduces the need for cleaning and maintenance. The LEED Green Associate Candidate Handbook states that one of the strategies for achieving indoor environmental quality is to "use permanent entryway systems (grilles, grates, mats) to reduce particulate matter being brought into buildings at regular entryways" [1, p. 16]. References: LEED Green Associate Candidate Handbook, [Indoor Environmental Quality | U.S. Green Building Council]

NEW QUESTION # 239

Which type of water should be considered an alternative water source?

- A. Blackwater
- B. Dirty water
- C. Potable water
- **D. Rainwater**

Answer: D

Explanation:

Rainwater is considered an alternative water source because it is a sustainable source of water that is not supplied from fresh surface water or groundwater. Rainwater can be harvested from roofs or other surfaces and stored for later use. Rainwater can offset the demand for freshwater and reduce the pressure on water resources. Rainwater can be used for various purposes, such as irrigation, toilet flushing, cooling, and cleaning. LEED projects can earn credits for using alternative water sources under the Water Efficiency category. Reference: Best Management Practice #14: Alternative Water Sources¹; LEED v4 BD+C Reference Guide, Water Efficiency, page 51

NEW QUESTION # 240

LEED Online can be used:

- A. To purchase reference guides
- **B. To monitor the entire project certification process**
- C. By the public to look at projects used for case studies
- D. To register for the LEED AP exam

Answer: B

Explanation:

LEED Online is the official platform provided by the U.S. Green Building Council (USGBC) for managing the entire LEED project certification process. It is used for:

- * Project registration
- * Credit documentation submission
- * Team collaboration
- * Tracking review comments
- * Final certification decisions

As stated in LEED study resources and USGBC documentation:

"LEED Online is the primary tool for managing the LEED certification process. Project teams use it to upload documentation, track progress, and communicate with reviewers." Let's review the incorrect options:

- * Option A: LEED AP exams are registered through Prometric or the USGBC website, not LEED Online.
- * Option C: Public project data is viewed via the USGBC project directory, not LEED Online (which is private to project teams).
- * Option D: Reference guides are purchased through the USGBC online store, not LEED Online.

Therefore, the correct answer is B.

NEW QUESTION # 241

.....

Though there are three versions of the LEED-Green-Associate practice braindumps: the PDF, Software and APP online, i love the PDF version the most for its printable advantage which is unique and special. After printing, you not only can bring the LEED-Green-Associate study materials with you wherever you go, but also can make notes on the paper at your liberty, which may help you to understand the contents of our LEED-Green-Associate Learning Materials. Do not wait and hesitate any longer, your time is precious!
