

# H35-211\_V2.5 Valid Cram Materials | H35-211\_V2.5 Free Study Material

BONUS!!! Download part of TroytecDumps H35-211\_V2.5 dumps for free: <https://drive.google.com/open?id=1F6GTGJLYhyqX9pVfgVhgffIKQOE1YSwe>

After continuous improvement for years, H35-211\_V2.5 test questions have built a complete set of quality service system. First of all, H35-211\_V2.5 test torrent is compiled by experts and approved by experienced professionals. This allows our data to make you more focused on preparation. At the same time, H35-211\_V2.5 latest torrents provide a free download trial of the PDF version, so that you can understand our products in advance. And according to your needs, you can make the most correct purchase decision without regretting. If there is an update, our system will be automatically sent to you. Secondly, you don't need to worry about any after-sales issues when purchasing H35-211\_V2.5 Test Torrent.

Huawei H35-211\_V2.5 Certification Exam consists of 60 multiple-choice questions and has a duration of 90 minutes. The passing score for H35-211\_V2.5 exam is 600 out of 1000 points. H35-211\_V2.5 exam is available in both English and Chinese languages, and candidates can take it at any of the Huawei authorized test centers worldwide.

The HCIP-Access V2.5 certification is designed to provide professionals with the knowledge and skills required to plan, design, and deploy network access solutions. It covers a wide range of topics such as access network technologies, network access security, access network planning and design, and access network maintenance and troubleshooting. HCIP-Access V2.5 certification helps professionals to build their expertise in network access technologies and become specialists in the field.

## Pass Guaranteed Quiz 2026 Perfect Huawei H35-211\_V2.5 Valid Cram Materials

As far as we know, our H35-211\_V2.5 exam prep have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently. Our H35-211\_V2.5 practice materials will not let your down. To lead a respectable life, our experts made a rigorously study of professional knowledge about this exam. We can assure you the proficiency of our H35-211\_V2.5 Exam Prep. So this is a definitive choice, it means our H35-211\_V2.5 practice materials will help you reap the fruit of success.

Huawei H35-211\_V2.5 (HCIP-Access V2.5) Exam is a certification program designed for professionals who wish to demonstrate their expertise in network access technologies. H35-211\_V2.5 exam is part of the Huawei Certified ICT Professional (HCIP) certification, which is a globally recognized program that verifies the knowledge and skills of professionals in the ICT industry. The HCIP-Access V2.5 exam focuses on topics related to network access technologies, including network security, access control, wireless LAN, and authentication technologies.

## Huawei HCIP-Access V2.5 Sample Questions (Q63-Q68):

### NEW QUESTION # 63

The (radio) prerequisites for eSight to automatically discover OLT and MXU devices by IP address are not included

- A. The SNMP parameters on the eSight side have been configured and are aligned with the device side SNMP parameters.

- B. You already have the operation permission of "Resource Access".
- C. eSight and the device need to be on the same network segment, otherwise the device cannot be discovered using the ARP broadcast protocol.
- D. eSight and the device can be routed to communicate (ping each other).

**Answer: C**

Explanation:

In IP address discovery mode, eSight does not require L2 same-subnet adjacency; it only requires IP reachability/routing, proper SNMP credentials/alignment, and the operator's Resource Access permission to poll and add devices. The "same network segment" prerequisite applies to ARP broadcast discovery mode, not to IP address discovery.

References: HCIP-Access V2.5 Study Guide - Network Management & Maintenance (eSight discovery methods: IP, ARP, routing) and eSight Device Management Configuration - Auto Discovery prerequisites (permissions, SNMP parameters, IP connectivity).

#### NEW QUESTION # 64

If the ONT zero touch provisioning function is enabled on the eSight, you can configure multiple service profiles. Which parameters can be set on the multi-service profile management tab page?

- A. VLAN
- B. Voice VLAN
- C. Default VLAN
- D. Number of Ethernet ports
- E. ONU type

**Answer: A,B,C**

#### NEW QUESTION # 65

The Class D multicast address range is from 224.0.0.0 to 238.255.255.255.

- A. False
- B. True

**Answer: A**

Explanation:

IPv4 multicast (historically "Class D") occupies the address block 224.0.0.0 through 239.255.255.255. Any upper bound of 238.255.255.255 is incorrect because it excludes the full 239/8 administratively scoped range.

This is standardized in the IANA IPv4 Multicast Address Space registry and reflected in foundational multicast specifications.

#### NEW QUESTION # 66

The auto-discovery methods provided by sight are by network segment mode, ARP mode and routing mode. At the same time, you can create a network segment or IP address of a device that does not need to be connected as an exclusion list. Automatically skips the network segment or IP address configured in the exclusion list during self-discovery of devices.

- A. False
- B. True

**Answer: B**

#### NEW QUESTION # 67

In Huawei U2000, when adding network elements, you can only add them one-by-one while accessing each network element.

- A. Right
- B. Wrong

**Answer: B**

Explanation:

This statement is wrong. In U2000, network elements (NEs) can be added by multiple methods, including batch addition/import and automatic discovery, not just one-by-one during a live access session. U2000 supports template-based onboarding and batch operations to improve efficiency for large-scale deployments.

References: HCIP-Access V2.5-Network Management chapter (U2000 NE addition methods, discovery, and batch import); Huawei U2000 Administrator Guide (NE management and batch operations).
