## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q19-Q24):

### NEW QUESTION # 19

You requested Joule to draft meeting talking points. Which way of interacting with Joule does this represent?

- A. Chat talk
- B. Be creative
- C. Transactional
- D. Informational

**Answer: C**

### NEW QUESTION # 20

What are some advantages for businesses using Joule Agents? Note: There are 3 correct answers to this question.

- A. Unrivaled process mining and applications
- B. Integration and collaboration across business functions
- C. Unmatched extensibility and built-in security
- D. Agile business transformation and sustainable value chains

**Answer: B,C,D**

Explanation:

Joule Agents provide significant advantages for businesses, as outlined in SAP Business AI documentation. Unmatched extensibility and built-in security allow businesses to customize AI solutions while maintaining robust data protection and compliance. Agile business transformation and sustainable value chains enable rapid adaptation to market changes and environmentally conscious operations through AI-driven insights. Integration and collaboration across business functions ensure seamless connectivity between departments, enhancing operational efficiency. While process mining is a feature of SAP Signavio, unrivaled process mining and applications is not a primary advantage of Joule Agents. These capabilities make Joule Agents a cornerstone of SAP's intelligent enterprise strategy.

### NEW QUESTION # 21

What are some benefits of AI agents? Note: There are 3 correct answers to this question.

- A. Boost productivity
- B. Reduce costs
- C. Facilitate collaboration
- D. Replace managers

**Answer: A,B,C**

Explanation:

AI agents, as described in SAP Business AI documentation, offer significant benefits to organizations. Facilitate collaboration by enabling seamless interaction between business functions, such as integrating procurement and finance processes. Boost productivity by automating repetitive tasks and providing actionable insights, allowing employees to focus on strategic activities. Reduce costs through efficient resource utilization and streamlined workflows, minimizing manual effort and operational expenses. While AI agents enhance decision-making, they do not replace managers, as their role is to augment human capabilities rather than supplant leadership. Ensuring privacy is a safeguard but not a primary benefit highlighted in the documentation. These benefits align with SAP's goal of delivering intelligent, cost-effective solutions.

### NEW QUESTION # 22

(What are some unique selling propositions of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Robust partner ecosystem with synergistic collaboration
- B. Direct access to pertinent customer business data
- C. Development of SAP-specific large language models
- D. Focus on the technology stack
- E. In-depth knowledge of business processes across various industries

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Unique selling propositions of SAP Business AI include direct access to pertinent customer business data for grounding AI in enterprise contexts, a robust partner ecosystem enabling synergistic collaborations with industry leaders for innovation, and in-depth knowledge of business processes across industries to deliver domain-specific AI solutions. These propositions emphasize SAP's strengths in data integration, partnerships, and process expertise over generic AI technologies.

Exact extracts supporting this:

Direct access to business data: "SAP's main differentiators are - it's access to business data, understanding of the context of complex business processes, and deep domain and industry expertise."community.sap.com Robust partner ecosystem: "SAP Business AI serves as a key differentiator for Service Partners and offers a wide range of business opportunities."sap.com "Unparalleled collaborations with leading general-purpose AI technology providers."news.sap.com In-depth knowledge of business processes: "Understanding of the context of complex business processes, and deep domain and industry expertise."community.sap.com Other options are incorrect because:

Option B: While SAP has a strong technology stack, the focus is on business outcomes rather than the stack itself as a unique proposition; differentiators are data, processes, and ecosystem.

Option D: SAP does not develop its own large language models but partners with providers like Microsoft, Google, and Cohere for LLMs, emphasizing integration over proprietary development.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," unit "Articulating the Value of SAP Business AI," and SAP Community blog "Generative AI with SAP - Part 1." These highlight access to data, process knowledge, and partnerships as USPs, per C\_BCBAI\_2502 materials.

### NEW QUESTION # 23

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Tenant isolation
- B. Sustainability
- C. Consent-based model training
- D. SAP-hosted AI infrastructure
- E. Clean core maintenance

Answer: A,C,D
