## Pass Guaranteed Quiz 2026 ISQI CPRE-FL\_Syll\_3.0: IREB Certified Professional for Requirements Engineering. Foundation Level Authoritative Test Practice

We have livechat to wipe out your doubts about our CPRE-FL\_Syll\_3.0 exam materials. You can ask any question about our IREB Certified Professional for Requirements Engineering. Foundation Level study materials. All of our online workers are going through special training. They are familiar with all details of CPRE-FL\_Syll\_3.0 practice guide. Also, you have easy access to IREB Certified Professional for Requirements Engineering. Foundation Level free demo, and you are available for our free updated version of the CPRE-FL\_Syll\_3.0 Real Exam. Whenever you have problems about our CPRE-FL\_Syll\_3.0 study materials, you can contact our online workers via email. We warmly welcome you to experience our considerate service.

## ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q45-Q50):

### NEW QUESTION # 45

To get maximum value from validation activities, which practices should be followed? (Select 2 answers.)

- A. Ensure independence between those eliciting and those validating requirements.
- B. Identify the most important view and perform validation only from it.
- C. Ensure identification and correction of defects are done by different workers.
- D. Choose a single ideal milestone to perform all validation activities.

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Good validation practice includes separating responsibilities: reviewers focus on detecting defects, while others propose and implement corrections, reducing bias and conflicts of interest-supporting A.

Independence between elicitation and validation roles increases objectivity and helps expose assumptions missed during elicitation, so C is also recommended. Validation should incorporate multiple views (business, technical, test, operations), not just one, making B incorrect. Validation is not a one-off event; it should be repeated at successive milestones as requirements evolve, so D conflicts with guidance. Therefore A and C are the correct practices.

#### NEW QUESTION # 46

Which of the following is a major task in Requirements Engineering?

- A. Validation of requirements
- B. Requirements writing
- C. Tool support
- D. Verification of requirements

Answer: A

#### NEW QUESTION # 47

In requirements engineering, the use of model-based documentation is very helpful. Behaviour, functions and the structures of the entity being considered can be represented with diagrams. Which two of the following diagrams help to represent the structural perspective of the requirements model? (1 Point)

- A. Deployment diagram
- B. Data diagram
- C. State diagram
- D. Entity-relationship diagram
- E. Class diagram

Answer: D,E

#### NEW QUESTION # 48

It is INCORRECT to say that:

- A. The stakeholders of a system are its main source of requirements.
- B. Opponents and competitors are examples of stakeholders.
- C. Even persons/organizations that do not have relevant relationships with the system are considered stakeholders.
- D. Developers and operators are examples of stakeholders.

Answer: C

#### NEW QUESTION # 49

Which of the following are principles of Requirements Engineering? (Select 2 answers.)

- A. Requirements Engineering is about satisfying only users' needs.
- B. Changing requirements are the exception, not the normal case.
- C. Systems should be isolated from proper understanding.
- D. Requirements should be viewed as means to an end, not the end in itself.
- E. Non-validated requirements are worthless.

Answer: D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

IREB defines a set of RE principles. Principle 1 states that requirements are a means to an end (such as reduced risk and successful systems), not an end in themselves; they support achieving project and business goals. Principle 6 states that non-validated requirements are worthless because unvalidated statements may be incorrect, incomplete, inconsistent or misaligned with stakeholder
