질문 # 51

As an Administrator you are planning a new course that combines online modules with live workshops. The course's online modules include various content objects, assessment objects, and folder objects. How would you structure this course to implement a blended learning approach and ensure content objects are properly assigned?

- A. Create individual online items that include content objects, assessment objects, and folder objects, and schedule instructor-led sessions independently of the online material.
- B. Assign each content object independently to users, allowing them to access both the online and live components at their convenience.
- C. Offer the course entirely online, with content objects and assessment objects freely accessible at any time, while providing optional live sessions without fixed schedules.
- D. Group the online content objects into an assignable unit or item, and schedule specific dates and times for the instructor-led sessions, restricting access to online content based on the class schedule.

정답: D

설명:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

* Understanding Blended Learning:

* A blended learning approach combines online and instructor-led components, requiring structured content and scheduling.

* Correct Approach (D):

* Grouping online content into an assignable unit (item) and scheduling instructor-led sessions with restricted online access ensures a cohesive blended learning experience.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Blended Learning Configuration):

"For blended learning, group online content objects (e.g., SCORM, assessments) into an item, and create a class for instructor-led sessions with specific dates and times. Restrict online content access based on the class schedule to align with the blended learning path."

* How to Implement:

* Create an item for online content, schedule a class for instructor-led sessions, and use settings to control access (e.g., prerequisites or time-based restrictions).

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Course Management):

"To structure a blended course, create an item for online components and a class for instructor-led sessions.

Use access restrictions, such as class enrollment or completion dependencies, to control when online content is available."

* Why Other Options are Incorrect:

* Option A (Independent scheduling):Independent scheduling lacks integration between online and instructor-led components.

"Independent scheduling of online and instructor-led components does not ensure a cohesive blended learning experience" (SAP SuccessFactors Learning Admin Guide).

* Option B (Independent assignment):Assigning content independently lacks structure and control.

"Independent assignment of content objects does not align with a structured blended learning approach" (SAP SuccessFactors Learning Admin Guide).

* Option C (Fully online with optional sessions):This does not represent a true blended approach.

"A fully online course with optional sessions is not a blended learning structure" (SAP SuccessFactors Learning Admin Guide).

* Conclusion:

* The best approach is to group online content into an item, schedule instructor-led sessions, and restrict online access based on the class schedule, as specified in option D.
