NEW QUESTION # 31

What does Cloud ALM Integration & Exception Monitoring track?

- A. Communication failures between systems
- B. Cloud API Changes
- C. Business partner roles
- D. Cross-system process adherence

Answer: A

NEW QUESTION # 32

Which of the following are strategies used in the Design phase to enable effective business process transformation with SAP Signavio? Note: There are 3 correct answers to this question.

- A. Involving the stakeholders
- B. Collaborating with IT
- C. Value discovery
- D. Process Performance benchmarking
- E. Using best practice content

Answer: A,C,E

NEW QUESTION # 33

Which of the following are strategies used in the Design phase to enable effective business process transformation with SAP Signavio?

(3 correct answers)

- A. Using best practice content
- B. Involving the stakeholders
- C. Collaborating with IT
- D. Value discovery
- E. Process performance benchmarking

Answer: B,D,E

Explanation:

In the Design phase of a transformation project, SAP Signavio plays a central role in shaping how business processes are evaluated, redesigned, and aligned to organizational objectives. Value discovery is one of the fundamental strategies used during this phase. It involves identifying improvement opportunities by analyzing existing processes, determining where inefficiencies occur, and uncovering areas where automation, optimization, or standardization can bring measurable business benefits. SAP Signavio provides process insights and performance indicators that support this discovery work.

Another essential strategy is involving stakeholders. Effective process transformation requires input from business users, process owners, managers, and IT teams to ensure that redesigned processes reflect operational realities and strategic priorities. Signavio's collaboration features—such as commenting, sharing models, and approving workflows—facilitate this engagement. Stakeholder involvement helps ensure alignment and increases adoption success after deployment.

Process performance benchmarking is also a critical strategy. SAP Signavio allows organizations to compare their internal process performance with industry standards or peer benchmarks. This evaluation highlights underperforming areas and guides prioritization in the design phase. While collaborating with IT and best practice use are helpful activities, they are not formalized as the three primary strategies emphasized in the Signavio design methodology.

NEW QUESTION # 34

SAP LeanIX Fact Sheets can represent which of the following?

- A. Survey forms
- B. RACI matrices
- C. Audit logs
- **D. Applications, interfaces, and capabilities**

Answer: D

Explanation:

Fact Sheets are the central information objects used in SAP LeanIX. They document key architectural components such as applications, interfaces, and business capabilities. Each Fact Sheet provides lifecycle details, ownership, dependencies, and relationships to other IT and business elements. This structure enables organizations to maintain a clear and consistent representation of their enterprise architecture. Survey forms, audit logs, or RACI matrices are not core Fact Sheet types.

NEW QUESTION # 35

.....

TestkingPDF provides a clear and superior solutions for each SAP C-SIGVT-2506 Exam candidates. We provide you with the SAP C-SIGVT-2506 exam questions and answers. Our team of IT experts is the most experienced and qualified. Our test questions and the answer is almost like the real exam. This is really amazing. More importantly, the examination pass rate of TestkingPDF is highest in the worldwide.
