NEW QUESTION # 32

MyCo, a telecom company, recently introduced a new mobile handset offer, MyFone 14 Pro, for its premium customers. As the bank has financial targets to meet, the business decides to boost the MyFone 14 Pro offer.

As a decisioning architect, how can you ensure that the MyFone 14 Pro offer is prioritized over other offers?

- A. Increase the business value of the MyFone 14 Pro offer.
- **B. Increase the business weight of the MyFone 14 Pro offer.**
- C. Increase the context weight of the MyFone 14 Pro offer.
- D. Increase the starting propensity of the MyFone 14 Pro offer.

Answer: B

Explanation:

The business weight is a parameter that allows you to manually adjust the priority of an offer based on your business objectives and preferences. The business weight is multiplied by the business value and the propensity to calculate the final priority score of an offer. A higher business weight means a higher priority score, making the offer more likely to be selected and presented to the customer. Therefore, if you want to boost an offer, you can increase its business weight. Verified References: Pega Decisioning Consultant | Pega Academy
