

# C-TS470-2412 Brain Dumps - C-TS470-2412 Training Solutions

2025 Latest Exam4Labs C-TS470-2412 PDF Dumps and C-TS470-2412 Exam Engine Free Share:  
<https://drive.google.com/open?id=1ECRmz2mNuFYS2adEeRhH2MmUFpdI2NTA>

It is a universally accepted fact that the C-TS470-2412 exam is a tough nut to crack for the majority of candidates, but there are still a lot of people in this field who long to gain the related certification so that a lot of people want to try their best to meet the challenge of the C-TS470-2412 exam. A growing number of people know that if they have the chance to pass the C-TS470-2412 Exam, they will change their present situation and get a more decent job in the near future. More and more people have realized that they need to try their best to prepare for the C-TS470-2412 exam.

## SAP C-TS470-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Service Order Management:</b> This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Managing Clean Core:</b> This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Organizational Data:</b> This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.</li> </ul>

## C-TS470-2412 Brain Dumps | Pass-Sure C-TS470-2412: SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service

Up to now, we have successfully issued three packages for you to choose. They are PDF version, online test engines and windows software of the C-TS470-2412 study materials. The three packages can guarantee you to pass the exam for the first time. Also, they have respect advantages. Modern people are busy with their work and life. You cannot always stay in one place. So the three versions of the C-TS470-2412 study materials are suitable for different situations. For instance, you can begin your practice of the C-TS470-2412 Study Materials when you are waiting for a bus or you are in subway with the PDF version. When you are at home, you can use the windows software and the online test engine of the C-TS470-2412 study materials. When you find it hard for you to learn on computers, you can learn the printed materials of the C-TS470-2412 study materials. What is more, you absolutely can afford for the three packages. The price is set reasonably.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q66-Q71):

### NEW QUESTION # 66

If two packages of a strategy plan are due on the same date, what determines which operations are assigned to a generated call object?

- A. The buffers of the packages
- **B. The hierarchy of the packages**
- C. The cycle length of each package
- D. The sequence number of the packages

**Answer: B**

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, a strategy plan uses a maintenance strategy with multiple packages (e.g., 3 months, 6 months) to schedule tasks. When two packages are due on the same date, the system must decide which operations from the associated task list are included in the generated call object (e.g., a service order). The correct answer is the hierarchy of the packages (A). Let's dive into this deeply.

Understanding Strategy Plans and Packages:

A strategy plan is linked to a maintenance strategy (e.g., "STR1") that defines packages with different intervals (e.g., Package 1: 3 months, Package 2: 6 months). Each package is assigned to specific operations in a task list (e.g., Operation 0010: oil change, Package 1; Operation 0020: full inspection, Package 2). The hierarchy refers to the priority or precedence of packages when their due dates overlap, as defined in the strategy's configuration.

Why Hierarchy?

When two packages (e.g., 3 months and 6 months) align on a date (e.g., after 6 months, both are due), the system uses the package hierarchy to determine which operations are included in the call object. In SAP, the hierarchy is typically based on the package with the longest cycle taking precedence, as it represents a more significant maintenance event. For example:

\* Task list: Operation 0010 (Package 1: 3M), Operation 0020 (Package 2: 6M).

\* On 2025-06-01 (6 months), both packages are due.

\* Hierarchy rule: Package 2 (6M) is higher, so Operation 0020 is included, and Operation 0010 might be skipped or combined based on settings.

Why Not the Others?

\* Sequence number (B): Sequence numbers order operations within a task list, not packages in a strategy.

\* Buffers (C): Buffers (e.g., tolerance) adjust call timing, not operation assignment.

\* Cycle length (D): Cycle length defines when packages are due, but hierarchy decides assignment.

Configuration Insight:

In SPRO # Plant Maintenance # Maintenance Plans # Define Maintenance Strategies, the hierarchy is implicitly set by package order or explicit rules (e.g., "highest cycle wins"). This ensures logical operation selection.

Practical Example:

Strategy: Package 1 (3M), Package 2 (6M). Task list: Op 0010 (P1), Op 0020 (P2). On 2025-06-01, Package 2's higher hierarchy assigns Op 0020 to the call object.

"When multiple packages in a strategy plan are due simultaneously, the hierarchy of the packages determines which operations are assigned to the generated call object."

### NEW QUESTION # 67

Which of the following can be assigned to a serial number profile?

- A. Equipment class
- B. Stock determination strategy
- **C. Equipment category**
- D. Configuration profile

**Answer: C**

Explanation:

A serial number profile in SAP S/4HANA defines how serial numbers are managed for materials or equipment. The correct answer is equipment category (C). Let's explore this deeply.

Serial Number Profile Purpose:

It controls serialization (e.g., mandatory entry, stock check) and links to objects like equipment or materials.

Why Equipment Category?

The equipment category (e.g., "M" for machines) determines the type of equipment created when a serialized material is installed or tracked. In customizing (SPRO # Plant Maintenance # Master Data # Technical Objects # Serial Number), the serial number profile is assigned to an equipment category to define how serial numbers generate equipment records (e.g., automatically upon goods receipt).

Why Not the Others?

\* Equipment class (A): Classes group equipment by characteristics, not assigned to serial profiles.

\* Configuration profile (B): This is for configurable products, unrelated to serial numbers.

\* Stock determination strategy (D): This controls stock selection, not serialization.

Example:

Serial profile "S001" is assigned to equipment category "M," ensuring that serialized pumps create equipment records of type "M."

"A serial number profile can be assigned to an equipment category to define the equipment type created for serialized objects."

### NEW QUESTION # 68

What is the purpose of a strategy plan in SAP S/4HANA Cloud Private Edition, Service?

- A. To support a service scenario where an activity is required every X months and Y kilometers
- B. To automatically generate Customer Service orders
- **C. To support the planning and scheduling of activities with different intervals**
- D. To document your company's direction in terms of service scenarios to be implemented

**Answer: C**

Explanation:

A strategy plan in SAP S/4HANA Cloud Private Edition, Service is a type of maintenance plan. The correct answer is C. Let's dive into this.

What is a Strategy Plan?

A strategy plan uses a maintenance strategy (e.g., time-based, performance-based cycles) to schedule tasks with varying intervals (e.g., 3 months, 6 months, 1,000 km). It's linked to a task list with operations tied to maintenance packages.

Why C?

The purpose is to support the planning and scheduling of activities with different intervals. For example, a strategy might include Package 1 (every 3 months) for an oil check and Package 2 (every 12 months) for a full inspection. The plan schedules these flexibly based on the strategy's rules.

Why Not the Others?

\* A: This is a business strategy, not a maintenance plan function.

\* B: This describes a multiple counter plan, not a strategy plan.

\* D: Orders are generated by scheduling, not the plan's purpose.

Example:

Strategy "STR1" has packages: 3M (oil) and 12M (inspection). The plan schedules calls accordingly.

"A strategy plan supports the planning and scheduling of maintenance activities with different intervals using a maintenance strategy."

### NEW QUESTION # 69

What are some customizing settings you need to maintain so that a repair confirmation (transaction type REPC) can be billed to a customer? Note: There are 3 correct answers to this question.

- A. You maintain what billing type needs to be used for a repair confirmation.
- B. You make sure each item category used in the repair confirmation corresponds to an item category from Sales that is assigned to the billing type.
- C. You assign a billing plan type to the sales document type used for the billing document request.
- D. You map the service item categories used in the repair confirmation to sales item categories for the billing document request.
- E. You assign a sales document type to transaction type REPC for the billing document request.

**Answer: B,D,E**

Explanation:

To bill a repair confirmation (REPC) in SAP S/4HANA Service:

\* You make sure each item category used in the repair confirmation corresponds to an item category from Sales that is assigned to the billing type: Item categories (e.g., REPI) must map to sales item categories (e.g., TAN) with billing relevance.

\* You assign a sales document type to transaction type REPC for the billing document request: A sales document type (e.g., F2 for invoice) is linked to REPC in Customizing to generate billing requests.

\* You map the service item categories used in the repair confirmation to sales item categories for the billing document request: This ensures seamless transition from service to sales processes.

\* Billing plan type: Optional and not mandatory for basic billing.

\* Maintain billing type: Defined globally, not specific to REPC. This is part of in-house repair billing setup. "Map service item categories to sales item categories and assign a sales document type to REPC for billing" (SAP Help Portal, Repair Confirmation Billing).

### NEW QUESTION # 70

In the Event-Based Revenue Recognition - Service Documents app, which of the following can you review?

- A. Billed margin
- B. Billed revenue
- C. Actual revenue
- D. Planned margin

**Answer: C**

Explanation:

The Event-Based Revenue Recognition - Service Documents app tracks revenue based on events (e.g., confirmation). The correct answer is actual revenue (B).

Why Actual Revenue?

The app shows revenue posted to the general ledger as events occur (e.g., \$500 from a confirmation), reflecting real-time financials.

"The Event-Based Revenue Recognition app allows review of actual revenue from service documents."
