

Reliable Oracle 1Z0-1109-25 Test Notes & Exam 1Z0-1109-25 Study Solutions

P.S. Free 2026 Oracle 1Z0-1109-25 dumps are available on Google Drive shared by DumpsValid: https://drive.google.com/open?id=1WDg00LgDYtcDMYLHf_VNi_vtrGbKEZ2

Usually, the questions of the real exam are almost the same with our 1Z0-1109-25 exam questions. So you just need to memorize our correct questions and answers of the 1Z0-1109-25 study materials. You absolutely can pass the exam. Also, we will offer good service to add you choose the most suitable 1Z0-1109-25 Practice Braindumps since we have three different versions of every exam product. And you can free download the demos of the 1Z0-1109-25 learning quiz.

Oracle 1Z0-1109-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Managing Containers Using Container Orchestration Engine: This part assesses the abilities of Kubernetes Administrators and Containerization Specialists in managing Oracle Container Engine for Kubernetes (OKE). It covers cluster creation, scaling, upgrades, networking, storage, and security configurations to optimize containerized applications in OCI environments.
Topic 2	<ul style="list-style-type: none">Enabling DevSecOps: This domain measures the skills of Security Engineers and DevSecOps Practitioners in integrating security into DevOps workflows. It includes managing encryption keys with OCI Vault, securing CICD pipelines, and ensuring container image security to align with DevSecOps best practices.
Topic 3	<ul style="list-style-type: none">Using Code and Templates for Provisioning and Configuring Infrastructure: This domain evaluates the expertise of DevOps Engineers and Infrastructure Architects in deploying infrastructure using Infrastructure as Code (IaC) tools like Terraform. It focuses on automating resource provisioning with OCI Resource Manager to ensure consistent and efficient infrastructure setups.

Exam 1Z0-1109-25 Study Solutions, 1Z0-1109-25 Study Materials Review

Just look at the text version of the introduction, you may still be unable to determine whether this product is suitable for you, or worth your purchase. We are very fond of preparing a trial version of 1Z0-1109-25 study materials: Oracle Cloud Infrastructure 2025 DevOps Professional for you. After you have used a trial version, you will have an overview of the content of the 1Z0-1109-25 simulating exam. This is enough to convince you that this is a product with high quality. We hope that you are making a choice based on understanding the products. We will respect your decision. 1Z0-1109-25 really wants to be your long-term partner.

Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q37-Q42):

NEW QUESTION # 37

A small company is moving to a DevOps framework to better accommodate their intermittent workloads, which are dynamic and irregular. They want to adopt a consumption-based pricing model.

Which Oracle Cloud Infrastructure service can be used as a target deployment environment?

- A. Bare metal compute instance
- B. Virtual machine compute instance
- **C. Functions**
- D. Oracle Kubernetes (OKE)

Answer: C

Explanation:

Oracle Cloud Infrastructure Functions is a serverless compute service that supports a consumption-based pricing model. This means that you are only charged for the compute resources when your function is invoked. This is ideal for intermittent, dynamic, and irregular workloads since the company does not need to provision infrastructure in advance, and costs are directly tied to usage.

NEW QUESTION # 38

Which of the following is NOT considered a DevOps resource in the context of the OCI DevOps project service?

- **A. API integrations**
- B. Code repositories
- C. Build pipelines
- D. Environments

Answer: A

Explanation:

In the context of OCI DevOps project service, the key DevOps resources include:

Environments: These are used to represent deployment targets, such as Kubernetes clusters, compute instances, or functions.

Build pipelines: These automate the building, testing, and packaging of software.

Code repositories: These store source code for the application being built, providing version control and collaboration.

API integrations are not directly considered a DevOps resource in OCI DevOps projects. Instead, they facilitate communication and integration with other tools or services but do not represent a core component of DevOps projects like environments, build pipelines, or code repositories.

NEW QUESTION # 39

While adding variables to your build_spec.yaml file, you made a mistake that resulted in a failed build pipeline.

What is the error you could have made?

- A. Defined variables as exportedVariables to make them available in subsequent stages of the same pipeline
- B. Used vaultVariable to hold the content of the vault secrets in Base64 format
- **C. Defined parameters such as the \${VARIABLE_NAME} file and later assigned their values in the Parameters tab of the build pipeline**
- D. Defined a field such as type: DOCKER_IMAGE in the outputArtifacts: section to specify the docker image produced by the Build stage

Answer: C

Explanation:

In build_spec.yaml for OCI DevOps, variables must be correctly defined and used according to the specification. If you defined parameters using \${VARIABLE_NAME} and then attempted to assign their values through the Parameters tab in the build pipeline, you may have introduced an error. The syntax and usage of parameters must be properly defined in both the build_spec.yaml and the build pipeline interface.

NEW QUESTION # 40

As a DevOps engineer at XYZ Corp, you have been assigned the task of setting up a new OKE (Oracle Kubernetes Engine) cluster to manage the organization's Kubernetes applications hosted on Oracle Cloud Infrastructure (OCI). Your goal is to ensure a smooth

and efficient process while preparing for the cluster creation.

Which of the following statements is false regarding the preparation process for setting up a new OKE cluster?

- A. Container Engine for Kubernetes automatically creates and configures new network resources for the new cluster.
- B. It is necessary to ensure sufficient quota on different resource types in your OCI tenancy for the cluster setup.
- **C. Container Engine for Kubernetes cannot utilize existing network resources for the creation of the new cluster.**
- D. Access to an Oracle Cloud Infrastructure tenancy is required to set up the new OKE cluster.

Answer: C

Explanation:

This statement is false because Container Engine for Kubernetes (OKE) can utilize existing network resources such as Virtual Cloud Networks (VCNs), subnets, security lists, and route tables for the creation of a new cluster. You can either use pre-existing network resources or let OKE create new network resources automatically.

NEW QUESTION # 41

As a DevOps engineer working with OCI DevOps, you are managing artifacts for a microservices application. Based on your understanding of working with DevOps projects and artifacts, which statement is true?

- A. Artifacts can be used directly by OCI DevOps without the need for them to be located or mirrored in an OCI Artifact or Container registry.
- B. Once created, the artifact's name, type, and source cannot be modified.
- **C. It is recommended to make artifacts immutable to prevent any modifications after they are uploaded.**
- D. In the build pipeline, to store the Managed Build stage output artifacts, you need an OCI Object storage.

Answer: C

Explanation:

Making artifacts immutable ensures that the build artifacts are not altered after being published. This is a best practice to maintain the integrity and consistency of the artifacts used in deployments, preventing unintentional changes that could introduce issues during subsequent deployment stages.

NEW QUESTION # 42

.....

Here our 1Z0-1109-25 exam braindumps are tailor-designed for you. Unlike many other learning materials, our Oracle Cloud Infrastructure 2025 DevOps Professional guide torrent is specially designed to help people pass the exam in a more productive and time-saving way, and such an efficient feature makes it a wonderful assistant in personal achievement as people have less spare time nowadays. On the other hand, 1Z0-1109-25 Exam Braindumps are aimed to help users make best use of their sporadic time by adopting flexible and safe study access.
