ISO-IEC-42001-Lead-Auditor시험준비자료 & ISO-IEC-42001-Lead-Auditor시험패스 인증공부

Itexamdump의 PECB인증 ISO-IEC-42001-Lead-Auditor시험덤프는 고객님의 IT자격증을 취득하는 꿈을 실현시켜 드리는 시험패스의 지름길입니다. PECB인증 ISO-IEC-42001-Lead-Auditor덤프에는 실제시험문제의 거의 모든 문제를 적중하고 습니다. Itexamdump의 PECB인증 ISO-IEC-42001-Lead-Auditor덤프가 있으면 시험패스가 한결 간편해집니다.

최신 AI management system (AIMS) ISO-IEC-42001-Lead-Auditor 무료샘플문제 (Q178-Q183):

질문 # 178

Scenario 1 (continued):

To ensure the integrity of the AI system, Future Horizon Academy has implemented measures to ensure that training data remain isolated from data that could lead to harmful or undesirable outcomes. The institution adds significant data elements as metadata, transforms the data into a format usable by the AI system, and uses data from one or more trusted sources.

Committed to standardization and continual improvement, Future Horizon Academy decided to implement an artificial intelligence management system (AIMS) based on ISO/IEC 42001 that would help the institution increase operational efficiency, resulting in improved processes.

After having the AIMS in place for a year, the institution decided to apply for a certification audit to get certified against ISO/IEC 42001. Prior to the certification audit, the institution conducted an internal audit and management review to ensure that the AIMS aligns with the institution's own requirements and that the system is being maintained effectively.

Question:

Based on Scenario 1, what category of AI systems did Future Horizon Academy utilize?

- A. Soft computing
- **B. Cognitive computing**
- C. Machine perception
- D. Semantic computing

정답: B

설명:

Future Horizon Academy's AI involves mimicking human learning from structured data and contextual metadata, which is part of Cognitive Computing. ISO/IEC 42001 Annex B highlights cognitive capabilities such as learning, reasoning, and adapting-relevant to the described system. Reference: ISO/IEC 42001:2023 Annex B (Informative: Cognitive Capabilities).

질문 # 179

Based on Scenario 5, Alterhealth determined the audit time. Is this acceptable?

Scenario 5: Alterhealth is a mid-sized technology firm based in Toronto, Canada. It develops AI systems for healthcare providers, focusing on improving patient care, optimizing hospital workflows, and analyzing healthcare data for insights that can improve health outcomes.

To ensure responsible and effective use of AI in its operations, Alterhealth has implemented an artificial intelligence management system AIMS based on ISO/IEC 42001. After a year of having the AIMS in place, the company decided to apply for a certification audit to obtain certification against ISO/IEC 42001.

The company contracted a certification body to conduct the audit, who assembled the audit team and appointed the audit team leader. The audit team leader had conducted a certification audit at Alterhealth in the past. The top management of Alterhealth decided to reject the appointment of this auditor because they believed that they would not receive added value from the audit. In response, the certification body appointed Jonathan, an independent auditor with no prior engagements with Alterhealth, as the new audit team leader. Jonathan's introduction marked the beginning of a collaborative process aimed at evaluating the conformity of the AIMS to ISO/IEC 42001 requirements.

The certification body determined the audit scope, which included only specific departments essential to the integration and application of AI, such as the AI Research, Machine Learning Applications, and AI Ethics and Compliance Departments, and did not cover all of the departments covered by the AIMS scope. Meanwhile, Alterhealth determined the audit time, setting the necessary time frame for planning and conducting a thorough and effective review to ensure all aspects of the AIMS within the selected departments were meticulously reviewed.

Afterward, Jonathan received a detailed offer from the certification body, outlining his role and including information related to the audit, such as the audit's duration, team members, their responsibilities, the limits to the audit engagement, and their salary compensation. With a clear mandate, Jonathan was tasked with a multitude of responsibilities: defining the audit objectives and criteria, planning the audit process, identifying and addressing audit risks, managing communication with Alterhealth, overseeing the audit team, and ensuring a smooth and conflict free execution.

With Jonathan's leadership and a well-defined audit framework in place, the certification audit proceeded with a structured and objective evaluation of Alterhealth's AIMS.

- A. Yes, the audit time must be determined by the auditee
- **B. No, the audit time must be determined by the certification body**
- C. Yes, if agreed upon with the auditor in writing
- D. No, the audit time must be determined by the audit team leader

정답: B

설명:

According to ISO/IEC 17021-1:2015 Clause 9.1.4, it is the responsibility of the certification body to determine the audit duration, based on factors such as the scope of the management system, number of personnel, complexity, and risk. While the auditee may provide input for logistical coordination, they do not have the authority to set the audit time unilaterally.

In Scenario 5, it is stated that "Alterhealth determined the audit time," which is not compliant with ISO/IEC 17021-1, as this responsibility lies with the certification body-not the auditee, and not the audit team leader alone.

Reference:

ISO/IEC 17021-1:2015, Clause 9.1.4 - Determination of audit time

ISO/IEC 42001:2023, Clause 9.2 - Internal and external audits

PECB ISO/IEC 42001 Lead Auditor Study Guide - Section: Certification Audit Management

질문 # 180

What does ISO 19011 provide?

- A. Guidance for practitioners on AI management system
- **B. Fundamental principles of auditing**
- C. Requirements for bodies providing audit
- D. Guidance for auditors on AI management system

정답: B

설명:

ISO 19011:2018 provides fundamental principles and guidance on auditing management systems, including:

- * Principles of auditing
- * Managing audit programs
- * Conducting internal or external audits
- * Evaluating the competence of auditors

While ISO/IEC 42001 is specific to AI Management Systems, ISO 19011 serves as a universal audit framework that applies to all types of management systems, including AI.

The PECB Lead Auditor Guide - Domain 3 highlights ISO 19011 as the primary guidance document for auditing practices, emphasizing its relevance to auditing AIMS as well.

질문 # 181

Question:

Which of the following describes a joint audit?

- A. When two or more management systems are audited together at a single auditee
- B. When audits are conducted back-to-back for efficiency
- **C. When two or more auditing organizations cooperate to audit a single auditee**
- D. When an internal audit and a third-party audit are conducted simultaneously

정답: C

설명:

A Joint Audit is when two or more audit organizations cooperate to audit the same auditee.

* ISO 19011:2018 Clause 3.9 defines joint audit as: "An audit carried out by two or more auditing organizations cooperating to audit a single auditee."

* This is further echoed in ISO/IEC 42001:2023, which supports joint audits especially in multi-country and consortium environments (Clause 9.2.1 reference to audit scope management).

Reference: ISO 19011:2018 Clause 3.9; ISO/IEC 42001:2023 Clause 9.2.1.

질문 # 182

What is one of the key objectives of conducting an audit according to ISO 19011?

- A. Imposing penalties on non-compliant organizations
- **B. Evaluating the effectiveness of the management system**
- C. Training employees on audit techniques
- D. Issuing certificates of compliance

정답: B

설명:

The primary objective of an audit, as defined in ISO 19011:2018 - Clause 5.1, is to evaluate the extent to which the management system conforms to planned arrangements and is effectively implemented and maintained.

Audits are not meant to issue certificates or impose penalties- they are tools for continual improvement, helping organizations assess the performance and effectiveness of their systems.

This aligns with the purpose of internal audits described in ISO/IEC 42001:2023 - Clause 9.2, which is to verify the effectiveness of the AIMS (Artificial Intelligence Management System).
