## PDII-JPN Study Guide Pdf - Valid Dumps PDII-JPN Book

If you want to learn the PDII-JPN practice guide anytime, anywhere, then we can tell you that you can use our products on a variety of devices. As you can see on our website, we have three different versions of the PDII-JPN exam questions: the PDF, Software and APP online. Though the content of them are the same. But the displays are totally different. And you can use them to study on different time and conditions. If you want to know them clearly, you can just free download the demos of the PDII-JPN Training Materials!

## Salesforce Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Visualforce ページの "get" 要求 (最初のページ訪問) の正しい実行順序は?

- A. コンストラクター、拡張機能、および存在するカスタム コンポーネントの属性定義の式を評価します。
  - 2) コントローラーと拡張機能のコンストラクターを評価する
  - 3) メインページでの式、`<apex:page>` 属性アクション、およびその他のメソッド呼び出し (`getter/setter`) の評価
  - 4) `<apex:form>` 要素がある場合は、ビューステートを作成します
  - 5) HTML をブラウザに送信する
- B. コントローラーと拡張機能のコンストラクターを評価する
  - 2) コンストラクター、拡張機能、および存在するカスタム コンポーネントの属性定義の式を評価する
  - 3) メインページでの式、`<apex:page>` 属性アクション、およびその他のメソッド呼び出し (`getter/setter`) の評価
  - 4) `<apex:form>` 要素がある場合は、ビューステートを作成します
  - 5) HTML をブラウザに送信する
- C. コントローラーと拡張機能のコンストラクターを評価する
  - 2) `<apex:form>` 要素がある場合は、ビューステートを作成します
  - 3) メインページでの式、`<apex:page>` 属性アクション、およびその他のメソッド呼び出し (`getter/setter`) の評価
  - 4) コンストラクター、拡張機能、および存在するカスタム コンポーネントの属性定義の式を評価する
  - 5) HTML をブラウザに送信する

**Answer: B**

### NEW QUESTION # 71

Visualforce ページは、表示されるデータ量が多いため、読み込みが遅くなります。開発者はどのような戦略を用いてパフォーマンスを改善できますか?

- A. コントローラーのコンストラクターではなく、遅延読み込みを使用して、要求に応じてデータを読み込みます。
- B. カスタム コントローラーで使用されるリスト変数に `transient` キーワードを使用します。
- C. JavaScript を使用して、データ処理をコントローラーではなくブラウザに移動します。
- D. ページ内で `<apex:actionPoller>` を使用して、すべてのデータを非同期的に読み込みます。

**Answer: A**

Explanation:

When a Visualforce page is slow because it attempts to load a massive dataset all at once, the bottleneck is often the time taken by the controller constructor to query and process those records before the page can even begin to render. Lazy Loading (Option B) is a strategy where the developer avoids loading all data during the initial page initialization.

Instead of querying 10,000 records in the constructor, the developer can load only the structural elements of the page first. Then, using an action method (triggered by `<apex:actionFunction>` or a `window.onload` script), the data is fetched in the background. This allows the user to see the page layout immediately while the data

"populates" shortly after. This significantly improves the Time to First Byte (TTFB) and the perceived performance of the page.

Option A (transient) is excellent for reducing the View State size and speeding up postbacks (button clicks), but it does not inherently speed up the initial load time of a large dataset. Option C (JavaScript processing) can help but doesn't solve the data retrieval bottleneck. Option D (actionPoller) is used for periodic updates and is not an efficient way to load an initial large dataset.

Lazy loading ensures that the "heavy lifting" is decoupled from the initial page load, providing a more responsive experience.

### NEW QUESTION # 72

ある企業には、Salesforce に接続してさまざまなオブジェクトから統合情報を JSON 形式で取得する必要があるネイティブ iOS 注文アプリケーションがあります。

これを Salesforce に実装する最適な方法はどれですか?

- A. Apex SOAP Web サービス

- B. Apex REST Web サービス
- C. Apex REST コールアウト
- D. Apex SOAP コールアウト

Answer: B

Explanation:

Apex REST web service is the optimal method to implement this in Salesforce because it allows you to expose your Apex classes and methods as RESTful web services that can be accessed by external applications. Apex REST web service can also return data in JSON format, which is suitable for the native iOS app. Apex SOAP web service, on the other hand, uses XML format, which is more verbose and complex to parse. Apex SOAP callout and Apex REST callout are used to invoke external web services from Apex, not to expose Apex as web services. Reference: [Apex REST Web Services], [Apex SOAP Web Services], [Apex Web Services and Callouts]

### NEW QUESTION # 73

開発者は、スケジュールされた Apex が DML 制限に達している問題を調査するよう求められます。開発者が調査したところ、スケジュールされた Apex によって処理されたレコード数が最近 10,000 を超えていることがわかりました。

制限例外エラーを解消するために、開発者は何をすべきですか？

- A. Bathable インターフェースを実装します。
- B. Queueable インターフェースを実装します。
- C. プラットフォーム イベントを使用します。
- D. @future アノテーションを使用します。

Answer: A

### NEW QUESTION # 74

以下のテスト方法を参照してください。

```
@isTest
static void testIncrement() {
    Account acct = new Account(Name = 'Test');
    acct.Number_of_Times_Viewed__c = 0;
    insert acct;

    AuditUtil.incrementViewed(acct.Id);

    Account acctAfter = [SELECT Number_of_Times_Viewed__c FROM Account
WHERE Id = :acct.Id][0];

    System.assertEquals(0, acctAfter.Number_of_Times_Viewed__c);
}
```

テストメソッドは、値をインクリメントする @future メソッドを呼び出します。

Number\_of\_Times\_Viewed\_\_c 値。アサーションは失敗します。

閲覧回数\_c は 0 です。

これを修正する最適な方法は何ですか？

- A. 前に rest.startTest() を追加し、AuditUtil.incrementViewed の後に Test.stopTest() を追加します。
- B. Test.startTest() を前に追加し、Test.stopTest() を insert acct の後に追加します。
- C. 初期化を acct に変更します。Number\_of\_Times\_Viewed\_\_c = 1。
- D. アサーションを system.assertEquals(0, acctAfter.Number\_of\_Times\_Viewed\_\_c) に変更します。

Answer: A

Explanation:

When a test method calls an @future method that performs DML operations, the changes made by the @future method won't be visible until after the Test.stopTest() is called. This method ensures that all asynchronous processes are completed before the test execution continues. Therefore, Test.startTest() should be before the call to the @future method and Test.stopTest() immediately after. References: Apex Developer Guide - Testing Asynchronous Apex

## NEW QUESTION # 75

.....

Supply the candidates with better product, quicker response. If you need Salesforce PDII-JPN practice test, TestPassed is good choice. And you don't regret purchasing TestPassed Salesforce PDII-JPN test. Through the process of IT certification exam, there is a very simple technique for helping you to pass Salesforce PDII-JPN Certification. TestPassed Salesforce PDII-JPN exam dumps are great. We guarantee that you must pass PDII-JPN exam. If you fail, we will REFUND you purchase price. 100% through PDII-JPN certification test.
