We have a professional team to collect the first-rate information for the exam, and we also have reliable channel to ensure you that LEED-Green-Associate exam braindumps you receive is the latest one. We are strict with the quality and answers, and LEED-Green-Associate Exam Materials we offer you is the best and the latest one. In addition, we provide you with free update for 365 days, so that you can know the latest information for the exam, and the latest version for LEED-Green-Associate training materials will be sent to your email address automatically.

USGBC LEED Green Associate Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

When considering strategies for reducing indoor water use, which plumbing fixture would be excluded?

- A. Urinal
- B. Showerhead
- C. Drip irrigation**
- D. Kitchen faucet

Answer: C

Explanation:

Drip irrigation is a method of watering plants that delivers water directly to the roots through a network of pipes, tubes, valves, and emitters. Drip irrigation is not a plumbing fixture, but a landscaping technique that can reduce outdoor water use by minimizing evaporation, runoff, and overspray¹².

Plumbing fixtures are devices that provide water for various purposes, such as washing, bathing, cooking, or flushing. Plumbing fixtures include urinals, showerheads, kitchen faucets, and other types of faucets, toilets, bidets, and sinks. Plumbing fixtures are subject to indoor water use reduction strategies in LEED certification, such as installing low-flow or high-efficiency models, using automatic sensors or timers, or implementing water reuse systems³⁴.

NEW QUESTION # 27

Which of the following accurately describes Credit Interpretation Requests (CIRs)?

- A. U.S. Green Building Council (USGBC) company members and LEED registered project team members may approve CIRs
- B. CIRs allow project teams to obtain technical guidance for a particular credit in the LEED rating system**
- C. Any approved CIR can be used for any LEED project
- D. Use of CIRs is limited to LEED projects

Answer: B

Explanation:

Credit Interpretation Requests (CIRs) are a formal process for clarifying technical questions about LEED credits. Project teams submit CIRs through LEED Online to receive guidance on specific credit requirements. CIRs apply to the project in question and cannot be transferred to other projects. They are essential tools for resolving ambiguities in achieving LEED certification.

NEW QUESTION # 28

A daylighting strategy can reduce which of the following?

- A. Worker productivity
- B. Occupant comfort
- C. Internal cooling load
- D. Building envelope performance

Answer: A

NEW QUESTION # 29

Which of the following promote the thermal comfort of occupants?

- A. Dimmable lighting and daylighting
- B. Adjustable temperature with ventilation control
- C. Adjustable blinds and light shelves
- D. High cubicle partitions and large window-to-wall ratios

Answer: B

Explanation:

LEED Thermal Comfort credit requires:

"Comfort Control - defined as the ability to adjust air / radiant temperature, air velocity or humidity... Ensure 50% of individual occupant space have thermal comfort controls."

Ventilation control combined with adjustable temperature directly supports occupant comfort as per ASHRAE 55-2010.

NEW QUESTION # 30

Which of the following is a source of graywater?

- A. Lavatory faucets
- B. Urinals
- C. Toilets
- D. Sprinklers

Answer: A

Explanation:

Graywater refers to relatively clean wastewater from domestic activities such as washing dishes, laundry, and bathing. Water from lavatory faucets falls into this category. Graywater can be treated and reused for non-potable purposes such as toilet flushing or irrigation, which can help conserve water. Reference: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources
