Download Valid NSE5_SSE_AD-7.6 PDF Dumps for Best Preparation

Exam : NSE5_SSE_AD-7.6

Title : Fortinet NSE 5 - FortiSASE and SD-WAN 7.6 Core Administrator

https://www.passcert.com/NSE5_SSE_AD-7.6.html

1/9

Firstly, we can give you 100% pass rate guarantee on the NSE5_SSE_AD-7.6 exam. Our NSE5_SSE_AD-7.6 practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. Secondly, during the period of using NSE5_SSE_AD-7.6 learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you on the NSE5_SSE_AD-7.6 exam questions at any time and sometimes mean a lot to our customers.

Fortinet NSE5_SSE_AD-7.6 Exam Syllabus Topics:

Section	Objectives
FortiSASE Architecture and Components	- FortiSASE architecture and deployment models - FortiSASE licensing and provisioning - FortiSASE components and integration
SD-WAN Architecture and Components	- SD-WAN overlays and underlays - SD-WAN components and topology - WAN path intelligence and link health monitoring - Fortinet Secure SD-WAN architecture

FortiSASE Security and Access	- Zero Trust Network Access (ZTNA) - Secure Web Gateway (SWG) - Endpoint protection and posture checks - User and device authentication - Data Loss Prevention (DLP) - Cloud Access Security Broker (CASB) - Performance SLA and health checks - VPN overlays with SD-WAN
SD-WAN Configuration and Management	- Application-aware routing - SD-WAN zone and interface configuration - Centralized management with FortiManager - SD-WAN rules and traffic steering - Sandboxing and threat intelligence - Antivirus and anti-malware
FortiSASE Policy and Configuration	- Web filtering and content inspection - Intrusion Prevention System (IPS) - Logging, monitoring, and reporting - Security policy configuration
Troubleshooting and Operations	- FortiSASE troubleshooting techniques - SD-WAN troubleshooting and diagnostics - Connectivity and performance issues - Logs, debug commands, and packet captures

NSE5_SSE_AD-7.6 Latest Dumps Ppt | NSE5_SSE_AD-7.6 Dumps Questions

It is known that our NSE5_SSE_AD-7.6 valid study guide materials have dominated the leading position in the global market with the decades of painstaking efforts of our experts and professors. There are many special functions about NSE5_SSE_AD-7.6 study materials to help a lot of people to reduce the heavy burdens when they are preparing for the NSE5_SSE_AD-7.6 Exams for the NSE5_SSE_AD-7.6 study practice question from our company can help all customers to make full use of their sporadic time. Must buy our NSE5_SSE_AD-7.6 exam questions, you will be able to pass the NSE5_SSE_AD-7.6 exam easily.

Fortinet NSE 5 - FortiSASE and SD-WAN 7.6 Core Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which two statements correctly describe what happens when traffic matches the implicit SD-WAN rule? (Choose two.)

- A. FortiGate flags the session with `may_dirty` and `vw1_default`.
- B. Traffic is load balanced using the algorithm set for the `v4-ecmp-mode` setting.
- C. The session information output displays no SD-WAN service id.
- D. The traffic is distributed, regardless of weight, through all available static routes.
- E. Traffic does not match any of the entries in the policy route table.

Answer: A,C

Explanation:

When traffic matches the implicit SD-WAN rule, the session is flagged with `may_dirty` and `vw1_default`, indicating it was steered by the default SD-WAN behavior.

Because the implicit rule is used, no specific SD-WAN service is matched, so the session information shows no SD-WAN service ID.

NEW QUESTION # 48

Which three reports are valid report types in FortiSASE? (Choose three.)

- A. Cyber Threat Assessment

- B. Shadow IT Report
- C. Vulnerability Assessment Report
- D. Web Usage Summary Report
- E. Endpoint Compliance Deviation Report

Answer: B,C,D

Explanation:

Shadow IT Report: Leveraging the built-in CASB (Cloud Access Security Broker) capabilities, this report identifies "unsanctioned" or "risky" SaaS applications being used by employees. It helps organizations discover hidden security risks by cataloging cloud applications that have not been explicitly approved by the IT department.

Vulnerability Assessment Report: Since FortiSASE integrates with FortiClient and an embedded EMS, it can aggregate vulnerability scan data from managed endpoints. This report lists software vulnerabilities found on user devices (OS-level and application-level), providing a "Security Rating" or posture assessment that is critical for Zero Trust Network Access (ZTNA) enforcement.

Web Usage Summary Report: This report provides a high-level overview of web activity across the SASE deployment. It categorizes traffic by website categories (e.g., Social Media, Streaming, Malicious Sites), top users by bandwidth, and blocked requests, helping IT teams understand how internet resources are being consumed by remote workers.

NEW QUESTION # 49

Refer to the exhibit. Which conclusion can you draw from the exhibit?

- A. The administrator configured the packet loss threshold for Corp_HC and HUB1_HC to 5%.
- B. The administrator configured the Corp_HC performance service-level agreement (SLA) with SLA targets for the three criteria: packet loss, latency, and jitter.
- C. Over the past 60 seconds, the member port2 latency was temporarily above the latency criteria defined for HUB1_HC.
- D. Over the past 60 seconds, the member port1 was monitored healthy for both latency criteria of the Corp_HC definition.

Answer: D

Explanation:

The graph shows the latency history for the Corp_HC SLA, and port1's latency remained below the defined threshold during the past 60 seconds. This indicates that port1 continuously met the Corp_HC latency SLA and was therefore monitored as healthy.

NEW QUESTION # 50

An existing Fortinet SD-WAN customer who has recently deployed FortiSASE wants to have a comprehensive view of, and combined reports for, both SD-WAN branches and remote users.

How can the customer achieve this?

- A. Forward the logs from FortiSASE to the external FortiAnalyzer.
- B. Forward the logs from the external SD-WAN FortiAnalyzer to FortiSASE.
- C. Forward the logs from FortiSASE to Fortinet SOCaaS.
- D. Forward the logs from FortiGate to FortiSASE.

Answer: A

Explanation:

An existing SD-WAN customer uses an external FortiAnalyzer to aggregate FortiGate branch logs for comprehensive visibility into branch performance and security events. Forwarding FortiSASE logs (remote user traffic, ZTNA, SIA) to this same FortiAnalyzer enables combined datasets, reports, and dashboards spanning both branch SD-WAN and cloud-secured remote users.

NEW QUESTION # 51

Which two delivery methods are used for installing FortiClient on a user's laptop? (Choose two.)

- A. Configure automatic installation through an API to the user's laptop.
- B. Download the installer directly from the FortiSASE portal.
- C. Use zero-touch installation through a third-party application store.
- D. Send an invitation email to selected users containing links to FortiClient installers.

Answer: B,D

Explanation:

The FortiSASE 7.6 Administration Guide outlines the standard onboarding procedures for deploying the FortiClient agent to remote endpoints. There are two primary user-facing delivery methods:

* Download from the FortiSASE portal (Option B): Administrators can provide users with access to the FortiSASE portal where they can directly download a pre-configured installer. This installer is uniquely tied to the organization's SASE instance, ensuring the client automatically registers to the correct cloud EMS upon installation.

* Invitation Email (Option C): This is the most common administrative method. The FortiSASE portal (via its integrated EMS) allows administrators to send an invitation email to specific users or groups.

This email contains direct download links for various operating systems (Windows, macOS, Linux) and the necessary invitation code for zero-touch registration.

Why other options are incorrect:

* Option A: While third-party stores (like the App Store or Google Play) are used for mobile devices,

"zero-touch installation through a third-party store" is not the standard curriculum-defined method for laptops (Windows/macOS) in a SASE environment.

* Option D: FortiSASE does not use a direct "API to the user's laptop" for automatic installation. While MDM/GPO (centralized deployment) is supported, it is not described as an API-based auto-installation in the core curriculum.

NEW QUESTION # 52

.....

We would like to benefit our customers from different countries who decide to choose our NSE5_SSE_AD-7.6 study guide in the long run, so we cooperation with the leading experts in the field to renew and update our NSE5_SSE_AD-7.6 study materials. Our leading experts aim to provide you the newest information in this field in order to help you to keep pace with the times and fill your knowledge gap. We can assure you that you will get the latest version of our NSE5_SSE_AD-7.6 Training Materials for free from our company in the whole year after payment.
