Actual Salesforce Certified Platform App Builder (Plat-Admn-202) dumps are designed to help applicants crack the Salesforce Plat-Admn-202 test in a short time. There are dozens of websites that offer Plat-Admn-202 exam questions. But all of them are not trustworthy. Some of these platforms may provide you with Salesforce Certified Platform App Builder (Plat-Admn-202) invalid dumps. Upon using outdated Salesforce Plat-Admn-202 dumps you fail in the Salesforce Certified Platform App Builder (Plat-Admn-202) test and lose your resources.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

Topic 2	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 3	<ul style="list-style-type: none"> • Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 4	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 5	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Also we provide one year free updates of Plat-Admn-202 learning guide if we release new version in one year, our system will send the link of the latest version of our Plat-Admn-202 training braindump to your email box for your downloading. It is free of charge. And you can save a lot of time and money for our updates of Plat-Admn-202 study guide. We make sure that you will have a happy free-shopping experience.

Salesforce Certified Platform App Builder Sample Questions (Q274-Q279):

NEW QUESTION # 274

Cloud Kicks has leads owned by users and queues. The sales manager wants the status to change to working when a user takes ownership.

What does an app builder need to have in the criteria to ensure the process runs without error?

- A. [Lead].Owner:Queue.OwnerId Is Null = True
- B. BEGINS([Lead].OwnerId, „005")
- C. [Lead].Owner:User.Role Is Null = False
- **D. NOT(ISBLANK([Lead].OwnerId))**

Answer: D

Explanation:

The app builder needs to have NOT(ISBLANK([Lead].OwnerId)) in the criteria to ensure the process runs without error. This formula checks if the OwnerId field on the Lead object is not blank, which means that the lead is owned by a user or a queue. This will prevent the process from running on leads that are not owned by anyone, which could cause an error. Option A, B, and C are not formulas that can ensure the process runs without error.

NEW QUESTION # 275

DreamHouse Realty wants to import its property records from an external system into Salesforce. The app builder will use an external ID field to house the property ID from the external system.

Which two details should the app builder know when using external ID fields?

Choose 2 answers

- A. An external ID field can be a URL field.
- **B. An external ID field can be a number field.**
- C. An external ID field can be a phone field.
- **D. An external ID field can be a text field.**

Answer: B,D

Explanation:

An external ID field can be a number field or a text field, but not a URL field or a phone field. A URL field is used to store web addresses and a phone field is used to store phone numbers. An external ID field is used to store unique identifiers from an external system and it can be used for upsert operations.

NEW QUESTION # 276

An app builder has created a custom Lightning App and wants to make it available to the internal users at Universal Containers.

Which two steps are necessary to accomplish this task?

Choose 2 answers

- A. Add the app to a Visualforce page.
- **B. Build a Custom Tab for the app.**
- C. Upload the app to Static Resources.
- **D. Create a subdomain using My Domain.**

Answer: B,D

Explanation:

The app builder needs to do two steps to make the custom Lightning App available to the internal users at Universal Containers:

Create a subdomain using My Domain: My Domain is a feature that allows an organization to set up a custom domain name for their Salesforce instance. This is required to use custom Lightning components and apps in Salesforce1.

Build a Custom Tab for the app: A custom tab is a tab that displays any custom object or web page in Salesforce. This is required to make the custom Lightning App accessible from the navigation menu or app launcher2. Option A and B are not necessary steps to make the custom Lightning App available to the internal users.

NEW QUESTION # 277

Duplicate management for Leads has been implemented at Universal Containers but it seems duplicate leads are still being created.

The Org Wide Default (OWD) is set to "Private" for Leads.

Which two actions help prevent duplicate Leads from being created?

Choose 2 answers

- A. Change the Lead Assignment Rule to check for duplicates.
- **B. Change the lead Hatching Rule to Block on create.**
- **C. Change the Lead Duplicate Rule details to Bypass Sharing Rules.**
- D. Change OWD for Leads to Public Read.

Answer: B,C

Explanation:

A: Changing the Lead Matching Rule to 'Block on create' will directly prevent duplicates at the point of lead creation based on defined criteria.

Salesforce Help - Duplicate Management

NEW QUESTION # 278

Universal Containers would like to collaborate with its customers within Salesforce, and has decided to enable the "Allow Customer Invitations" Chatter setting. What permission is granted to Customers when invited to ChatterGroup?

- A. The ability to request access to public groups
- B. The ability to @mention accounts of which they are a contact.
- C. The ability to interact with members of their groups
- D. The ability to invite members to groups of which they are a member

Answer: C

Explanation:

Customers who are invited to Chatter groups can only interact with members of their groups. They cannot invite other members, @mention accounts, or request access to public groups

NEW QUESTION # 279
