Juniperインターネットは社会を変えつつあり、距離はもはや障害ではありません。JN0-460試験シミュレーションは、公式ウェブサイトからダウンロードできます。公式ウェブサイトは、最もプロフェッショナルな実践教材を提供するプロフェッショナルプラットフォームです。待つことなく15分以内に入手できます。Topexam、これらの高品質のJN0-460準備資料：Mist AI Wired, Specialist (JNCIS-MistAI-Wired)には膨大な投資が必要だと思われるかもしれません。実際、私たちはあなたを私たちの練習教材からブロックする障壁を取り除きます。すべてのタイプはあなたの希望に応じて有利な価格です。あなたの手のひらの上でJN0-460学習ガイドを入手すると、より高い成功率を達成できます。また、個々のニーズを満たすために慎重に検討するための無料のデモがあります。

Juniper JN0-460 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
トピック 2	• Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
トピック 3	• Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
トピック 4	• Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.

トピック 5

- **Campus EVPN-VXLAN:** This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.

弊社のソフトを利用して、あなたはJuniperのJN0-460試験に合格するのが難しくないことを見つけられます。Topexamの提供する資料と解答を通して、あなたはJuniperのJN0-460試験に合格するコツを勉強することができます。あなたに安心してソフトを買わせるために、あなたは無料でJuniperのJN0-460ソフトのデモをダウンロードすることができます。

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) 認定 JN0-460 試験問題 (Q52-Q57):

質問 # 52

Which statement is correct regarding the Mist UI?

- **A. The Mist UI is used to manage network devices.**
- B. The Mist UI is used by clients to connect to wireless networks.
- C. The Mist UI is used by cloud providers to provision VMs.
- D. The Mist UI is used to distribute routes between your wireless and physical networks.

正解: A

解説:

The Mist UI (User Interface) is Juniper's cloud-based management platform used to manage both wired and wireless devices, including EX, QFX, and SRX platforms.

It provides centralized visibility, configuration, analytics, and AI-driven insights for the entire enterprise network infrastructure.

Within Wired Assurance, the Mist UI enables device claiming, switch templates, configuration management, and SLE monitoring.

質問 # 53

Which three switch testing tools are available when using Wired Assurance? (Choose three.)

- **A. bounce port**
- **B. ping**
- C. load factory-default
- **D. cable test**
- E. iPerf

正解: A、B、D

解説:

According to Juniper Mist Wired Assurance documentation, three built-in diagnostic tools available for testing switch functionality are Bounce Port, Ping, and Cable Test.

Bounce Port allows you to disable and re-enable a port to reset connectivity.

Ping verifies Layer 3 reachability between the switch and target IPs.

Cable Test performs diagnostics to detect wiring faults, impedance mismatches, or cable lengths.

These tools are accessed directly from the Switch Testing Tools section in the Mist dashboard and are available for EX Series and QFX Series switches onboarded to the Mist cloud.

質問 # 54

You want a Juniper cloud-ready switch to connect to the Juniper Mist Cloud.
In this scenario, which two statements are correct? (Choose two.)

- A. The switch must connect to a DNS server.
- B. The switch must be running Junos OS version 23.2 or higher.
- C. The switch needs outbound connectivity to the Juniper Mist Cloud using either TCP port 2200 or port 443.
- D. The switch must connect to the Juniper Agile Licensing Portal.

正解: A、C

解説:

For Juniper cloud-ready EX Series switches (EX2300, EX3400, EX4100, EX4400, etc.) to successfully onboard to the Juniper Mist Cloud, specific connectivity requirements must be met:

"Cloud-managed EX switches require outbound connectivity to the Mist Cloud on TCP ports 2200 or 443.

Switches must also have access to DNS services to resolve cloud service URLs during onboarding." Option A: Incorrect - minimum version depends on switch model; older models may onboard with earlier releases (e.g., 20.x, 21.x).

Option B: Correct - outbound TCP 2200 or 443 connectivity is required for cloud registration.

Option C: Incorrect - switches connect directly to Mist Cloud, not the Agile Licensing Portal.

Option D: Correct - DNS resolution is mandatory for discovering Mist Cloud endpoints.

質問 # 55

What are Service Level Expectations (SLEs) used for in Wired Assurance Management?

- A. Defining and measuring network performance metrics
- B. Setting unrealistic performance targets
- C. Calculating network storage capacity
- D. Documenting employee vacation days

正解: A

質問 # 56

Which of the following are functions of EVPN in a Campus EVPN-VXLAN deployment? (Select two)

- A. Facilitates multipath forwarding
- B. Provides a control plane for MAC address learning
- C. Reduces the efficiency of data plane operations
- D. Limits the number of broadcast domains

正解: A、B

質問 # 57
