

權威的Oracle新版1Z0-1084-25考古題是行業領先材料&完美的1Z0-1084-25認證考試解析

P.S. Testpdf在Google Drive上分享了免費的、最新的1Z0-1084-25考試題庫：<https://drive.google.com/open?id=1nwT6gQrIsJj4EGyXpUtNDEMmalHeX0Up>

如果你正在尋找一個好的通過Oracle的1Z0-1084-25考試認證的學習網站，Testpdf是最好的選擇，Testpdf能給你帶來的將是掌握IT行業的尖端技能以及輕鬆通過Oracle的1Z0-1084-25考試認證，大家都知道這門考試是艱難的，想要通過它也不是機會渺小，但你可以適當的選擇適合自己的學習工具，選擇Testpdf Oracle的1Z0-1084-25考試試題及答案，這個培訓資料不僅完整而且真實覆蓋面廣，它的測試題仿真度很高，這是通過眾多考試實踐得到的結果，如果你要通過Oracle的1Z0-1084-25考試，就選擇Testpdf，絕對沒錯。

如果你想成功通過1Z0-1084-25認證考試，不要錯過閱讀Testpdf最新的1Z0-1084-25考古題資料，100%保證通過，所有的題庫都會及時更新。使用我們軟件版本的1Z0-1084-25題庫可以幫您評估自己掌握的知識點，從而在考試期間增加問題的回憶，幫助快速完成考試。Oracle 1Z0-1084-25考題具備了覆蓋率很高，能夠消除考生對考試的疑慮。1Z0-1084-25是一個很難通過的認證考試，要想通過考試必須為考試做好充分的準備，而Testpdf是您最佳的選擇！

>> 新版1Z0-1084-25考古題 <<

最有效的新版1Z0-1084-25考古題，由Oracle權威專家撰寫

只要你需要考試，我們就可以隨時更新Oracle 1Z0-1084-25認證考試的培訓資料來滿足你的考試需求。Testpdf的培訓資料包含Oracle 1Z0-1084-25考試的練習題和答案，能100%確保你通過Oracle 1Z0-1084-25考試。有了我們為你提供的培訓資料，你可以為你參加考試做更好的準備，而且我們還會為你提供一年的免費的更新服務。

最新的 Oracle Cloud Infrastructure 1Z0-1084-25 免費考試真題 (Q18-Q23):

問題 #18

You are developing a distributed application and you need a call to a path to always return a specific JSON content deploy an OCI API Gateway with the below API deployment specification. What is the correct value for type? { "routes": [{ "path": "/hello", "methods": ["Get"], "backend": { "type": "-----", "status": 200, "headers": [{ "name": "Content-Type", "value": "application/json" }] "body": "{ \"myjson\": \"consistent response\"}" } }] }

- A. JSON_BACKEND
- B. CONSTANT_BACKEND
- C. STOCK_RESPONSE_BACKEND
- D. HTTP_BACKEND

答案： C

解題說明：

The correct value for the "type" field in the API deployment specification is "STOCK_RESPONSE_BACKEND". By setting the "type" to "STOCK_RESPONSE_BACKEND", you are indicating that the backend for the specified route should return a pre-defined response. This type of backend is commonly used when you want a specific response to be returned consistently, regardless of the actual backend service implementation. In this case, the API deployment specification is configured to have a single route with the path "/hello" and the method "GET". The backend section specifies the type as "STOCK_RESPONSE_BACKEND". Additionally, it defines the response status code as 200, sets the "Content-Type" header to "application/json", and provides the JSON content in the "body" field. Using this configuration, any request to the "/hello" path with the "GET" method will always receive a consistent JSON response with the content '{"myjson": "consistent response"}'.

問題 #19

Which term describes a group formed by a master machine and a worker machine in a Kubernetes architecture?

- A. Node
- B. Deployment
- C. Pod
- D. Container
- E. Cluster

答案： E

解題說明：

The term that describes a group formed by a master machine and a worker machine in a Kubernetes architecture is "Cluster". A cluster in Kubernetes consists of one or more master machines and multiple worker machines (also known as nodes). The master machine manages the overall control plane and orchestrates the deployment and management of containers on the worker nodes. The worker nodes are responsible for running the containers and executing the workloads. The cluster is the fundamental unit of organization and management in Kubernetes, providing the infrastructure and resources to run and manage containerized applications. It ensures high availability, scalability, and fault tolerance for the applications deployed within it.

問題 #20

You are using Oracle Cloud Infrastructure (OCI) Resource Manager to manage your infrastructure lifecycle and wish to receive an email each time a Terraform action begins. How should you use the OCI Events service to do this without writing any code?

- A. Create an OCI Notifications topic and email subscription with the destination email address. Then create an OCI Events rule matching "Resource Manager Stack - Update" condition, and select the notification topic for the corresponding action.
- B. Create an OCI Email Delivery configuration with the destination email address. Then create an OCI Events rule matching "Resource Manager Job - Create" condition, and select the email configuration for the corresponding action.
- C. Create an OCI Notification topic and email subscription with the destination email address. Then create an OCI Events rule matching "Resource Manager Job - Create" condition, and select the notification topic for the corresponding action.
- D. Create a rule in OCI Events service matching the "Resource Manager Stack - Update" condition. Then select "Action Type: Email" and provide the destination email address.

答案： C

解題說明：

The correct approach to receive an email each time a Terraform action begins in Oracle Cloud Infrastructure (OCI) Resource Manager without writing any code is as follows: Create an OCI Notification topic and email subscription with the destination email address. This will define the email delivery configuration. Create an OCI Events rule that matches the "Resource Manager Job - Create" condition. This rule will be triggered when a Resource Manager job is created. In the OCI Events rule, select the notification topic that was created in step 1 as the action for the corresponding event. This will ensure that the notification is sent to the specified email address. By following these steps, you can configure the OCI Events service to send an email notification whenever a Resource Manager job is created in OCI Resource Manager.

問題 #21

A Docker image consists of one or more layers, each of which represents a Dockerfile instruction. The layers are stacked and each

one is a delta of the changes from the previous layer. What permission is associated with these layers?

- A. write once
- B. movable
- C. write only
- D. read mostly
- E. read only

答案： E

解題說明：

The correct answer is: "read only." The layers of a Docker image are read-only. Once a layer is created, it cannot be modified. Each layer represents a Dockerfile instruction, and it is stacked on top of the previous layer, forming a stack of immutable layers. These layers are designed to be read-only to ensure consistency and integrity of the image. When a Docker image is built, each instruction in the Dockerfile creates a new layer. Each layer represents the changes made by that instruction relative to the previous layer. The layers are stacked on top of each other to form the complete image. This layer-based approach allows for efficient storage and distribution of Docker images. Because the layers are read-only, any changes or modifications to the image result in the creation of new layers rather than modifying the existing ones. This immutability ensures that each layer remains intact and preserves the integrity of the image. It also enables Docker's caching mechanism, where previously built layers can be reused if the corresponding instructions haven't changed, speeding up the image build process. The other options mentioned, such as "write only," "write once," "movable," and "read mostly," do not accurately describe the permission associated with Docker image layers. Docker image layers are specifically designed to be read-only.

問題 #22

Which is NOT a valid use case for leveraging the Oracle Cloud Infrastructure (OCI) Events service?

- A. Triggering a notification action when a function completes its execution.
- B. Publishing a notification when long-lived tasks complete, such as an OCI Autonomous Database backup completion.
- C. Capturing the OCI Monitoring service alarms and invoking autoscaling of compute instances.
- D. Publishing all the OCI resource events in a specific compartment to the OCI Streaming service for later analysis.
- E. Triggering a function deployed in Oracle Functions when new files are uploaded to an OCI Object Storage bucket.

答案： C

解題說明：

The use case that is NOT a valid use case for leveraging the Oracle Cloud Infrastructure (OCI) Events service is "Capturing the OCI Monitoring service alarms and invoking autoscaling of compute instances." The OCI Events service is designed to provide event-driven architecture and enable automated responses to events occurring within the Oracle Cloud Infrastructure. It allows you to react to changes and activities happening within your OCI resources. The Events service can be used to trigger actions based on events like file uploads, resource changes, or task completions. However, capturing the OCI Monitoring service alarms and invoking autoscaling of compute instances is not a direct functionality provided by the OCI Events service. Autoscaling based on monitoring metrics is typically handled by the OCI Autoscaling service, which is specifically designed for that purpose. The OCI Monitoring service provides monitoring and alerting capabilities, while the Autoscaling service handles the dynamic scaling of compute instances based on predefined policies and thresholds.

問題 #23

.....

當你感到悲哀痛苦時，最好是去學些什麼東西，比如通過1Z0-1084-25考試，獲得該證書可以使你永遠立於不敗之地。我們的IT團隊致力於提供真實的Oracle 1Z0-1084-25題庫問題和答案，所有購買我們1Z0-1084-25題庫的客戶都將獲得長達一年的免費更新，確保考生有足夠的時間學習。成功不是將來才有的，而是從決定去做的那一刻起，持續累積，Oracle 1Z0-1084-25考古題學習資料是根據最新的考試知識點整編而來，覆蓋面廣，是你備考的最佳助手。

1Z0-1084-25認證考試解析： <https://www.testpdf.net/1Z0-1084-25.html>

所以，不管1Z0-1084-25考題難度怎麼樣，我們最基本的就是親自去練習一遍，確保自己能夠切實的解決這些1Z0-1084-25考題，Testpdf提供的培訓資料不僅包括與Oracle 1Z0-1084-25認證考試相關的資訊技術培訓資料，來鞏固專業知識，而且還有準確性很高的關於Oracle 1Z0-1084-25的認證考試的相關考試練習題和答案，Oracle 新版1Z0-

都是老朽教導無法了，她並沒有靠近我、撫摸我的背，像以前那樣，所以，不管1Z0-1084-25考題難度怎麼樣，我們最基本的就是親自去練習一遍，確保自己能夠切實的解決這些1Z0-1084-25考題，Testpdf提供的培訓資料不僅包括與Oracle 1Z0-1084-25認證考試相關的資訊技術培訓資料，來鞏固專業知識，而且還有準確性很高的關於Oracle 1Z0-1084-25的認證考試的相關考試練習題和答案。

這樣討得上司的喜歡，還不如用實力說話，在你使用之後，相信你會很滿意我們的產品的，因為如果選擇的1Z0-1084-25問題集質量不夠高，我們在實際考試中遇到的非常熟悉的考題和平時練習的就不能保證完全一樣，只要實際的1Z0-1084-25考試中的考題做了細微的改動，我們僅憑記憶答題，很可能就會答錯題。
