## PK0-005 New Practice Questions, New PK0-005 Dumps Sheet

Entering a strange environment, we will inevitably be very nervous. And our emotions will affect our performance. That is why some of the candidates fail in their real exam. But if you buy our PK0-005 exam questions, then you won't worry about this problem. Our PK0-005 study guide has arranged a mock exam to ensure that the user can take the exam in the best possible state. We simulated the most realistic examination room environment so that users can really familiarize themselves with the examination room. And our PK0-005 Practice Engine can give you 100% pass guarantee.

To be eligible for the PK0-005 Exam, candidates must have at least one year of experience managing or participating in small- to medium-sized projects. They must also have a basic understanding of project management concepts and principles. Additionally, candidates must have knowledge of project management software tools and techniques, such as Microsoft Project.

## CompTIA Project+ Certification Exam Sample Questions (Q240-Q245):

### NEW QUESTION # 240

A project manager has decided to outsource portions of a project and will conduct a separate procurement. In which of the following phases does this task occur?

- A. Controlling
- **B. Planning**
- C. Executing
- D. Initiating

#### Answer: B

Explanation:

This answer is based on the understanding that outsourcing is a form of procurement, which is one of the knowledge areas in project management. Procurement involves acquiring goods and services from external sources to support the project objectives. According to the CompTIA Project+ Study Guide1, procurement activities occur mainly in the planning phase of the project, where the project manager identifies the project needs, defines the scope of work, evaluates the potential vendors, and prepares the procurement documents.

The other options are not correct because:

\* Initiating is the phase where the project manager defines the project purpose, objectives, and deliverables, and obtains the project charter and stakeholder approval. Initiating does not involve procurement activities, although it may involve some preliminary research on the feasibility and availability of external resources.

\* Controlling is the phase where the project manager monitors and measures the project performance, compares it with the baseline, and implements corrective actions if needed. Controlling does involve some procurement activities, such as reviewing the vendor deliverables, managing the changes, and resolving the issues, but these are not the main tasks of procurement.

\* Executing is the phase where the project manager leads and directs the project team and other resources to complete the project work according to the plan. Executing does involve some procurement activities, such as selecting the vendor, signing the contract, and managing the relationship, but these are not the main tasks of procurement. References = CompTIA Project+ Study Guide: Exam PK0-005,

3rd Edition, Chapter 8: Planning Projects, Part 4 (Procurement and Communication), pages 243-

260; CompTIA Project+ Certification Exam Objectives, Domain 2: Project Planning, Objective 2.5:

Given a scenario, plan procurement for a project.

### NEW QUESTION # 241

A stakeholder works in a remote location and has not been replying to emails. The Internet service in that location is intermittent, and the stakeholder prefers to be contacted by telephone. Which of the following artifacts should the project manager have prepared to avoid this situation?

- **A. Acceptable communication channels**
- B. Risk registry
- C. Responsibility assignment matrix
- D. Staff directory

#### Answer: A

Explanation:

Explanation

The project manager should have prepared acceptable communication channels to avoid the situation of a stakeholder not replying to emails due to intermittent Internet service. Acceptable communication channels are methods or modes of communication that are agreed upon by all parties involved in a project. They may include aspects such as email, phone call, text message, video conference, instant message, or face-to-face meeting. Acceptable communication channels can help to ensure that messages are delivered and received effectively and efficiently and that communication preferences and limitations are respected.

### NEW QUESTION # 242

Which of the following should occur when implementing an IT infrastructure change that takes risks into consideration?

- **A. Developing a rollback plan**
- B. Approving the change request
- C. Defining requirements
- D. Gathering necessary resources

**Answer: A**

Explanation:

When implementing an IT infrastructure change that takes risks into consideration, the project manager should develop a rollback plan. A rollback plan is a contingency plan that outlines the steps that need to be taken in case the change does not work as expected. It includes a plan to roll back the changes and restore the system to its previous state. References: CompTIA Project+ Study Guide Section 3.3.

The project manager should develop a rollback plan when implementing an IT infrastructure change that takes risks into consideration. A rollback plan is a contingency plan that describes how to revert back to the previous state of the system in case of a failure or disruption during the change implementation. A rollback plan can help to minimize the impact of the change on the system performance and availability and ensure business continuity and data integrity.

**NEW QUESTION # 243**

To gather requirements from stakeholders, the project manager sits down with them and allows them to discuss freely. Which of the following techniques is the project manager utilizing?

- A. Process moving
- **B. Focus group**
- C. Interview
- D. Brainstorming

**Answer: B**

Explanation:

A focus group is a technique that involves bringing together a group of stakeholders and facilitating a discussion to elicit their opinions, needs, and expectations about the project. This technique can help to gather requirements from stakeholders in an interactive and collaborative way<sup>1</sup>, p. 67

**NEW QUESTION # 244**

Which of the following criteria would favor using the agile methodology to manage an upcoming project?

- A. Medium risk
- B. Strong projectized organization
- C. Lack of resources
- **D. Multiple undefined tasks**

**Answer: D**

Explanation:

Multiple undefined tasks would favor using the agile methodology to manage an upcoming project. Agile methodology is a project management framework that breaks projects down into several dynamic phases, commonly known as sprints. Agile methodology is an iterative and adaptive approach that allows teams to respond to changing requirements and customer feedback quickly and effectively. Agile methodology is suitable for projects that have multiple undefined tasks, as it enables teams to prioritize and deliver the most valuable features first, and refine and improve them over time based on user input and testing<sup>12</sup>
