

New Fortinet NSE7_EFW-7.2 Exam Online | NSE7_EFW-7.2 Latest Braindumps Ebook

BONUS!!! Download part of PassLeaderVCE NSE7_EFW-7.2 dumps for free: https://drive.google.com/open?id=1biPmWE_zs_t4EBYOOOr_2-5_1K-H8TL6X

Our team of experts updates actual Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) questions regularly so you can prepare for the Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) exam according to the latest syllabus. Additionally, we also offer up to 1 year of free Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) exam questions updates. We have a 24/7 customer service team available for your assistance if you get stuck somewhere. Buy Fortinet NSE7_EFW-7.2 Latest Questions of PassLeaderVCE now and get ready to crack the NSE7_EFW-7.2 certification exam in a single attempt.

Fortinet NSE7_EFW-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Central management: The topic of Central management covers implementing central management.
Topic 2	<ul style="list-style-type: none">VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.
Topic 3	<ul style="list-style-type: none">Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Topic 4	<ul style="list-style-type: none">Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.
Topic 5	<ul style="list-style-type: none">System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.

Pass Guaranteed Fortinet - NSE7_EFW-7.2 - Pass-Sure New Fortinet NSE 7 - Enterprise Firewall 7.2 Exam Online

Knowledge makes prominent contributions to human civilization and progress. In the 21st century, the rate of unemployment is increasing greatly. Many jobs are replaced by intelligent machines. You must learn practical knowledge such as our NSE7_EFW-7.2 actual test guide, which cannot be substituted by artificial intelligence. In addition, you do not need to purchase other reference books. Our NSE7_EFW-7.2 Exam Questions are able to solve all your problems of preparing the exam. Of course, our study materials are able to shorten your learning time. You will have more spare time to do other things. And we can ensure you to pass the NSE7_EFW-7.2 exam.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q72-Q77):

NEW QUESTION # 72

Refer to the exhibit, which shows device registration on FortiManager.

```

FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE      OID      SN              HA      IP              NAME          ADOM  IPS      FIRMWARE      Hw_GenX
unregistered 273      FGM010000077646 - 10.1.0.1:9443  FGM010000077646 root  N/A      7.0 HR2 (1396) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unregistered; dm: none; conn: unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
unregistered 309      FGM010000077648 - 10.1.0.100:9443 FGM010000077648 root  N/A      7.0 HR2 (1396) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unregistered; dm: none; conn: unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
unregistered 285      FGM010000077650 - 10.1.0.253:9443 FGM010000077650 root  N/A      7.0 HR2 (1396) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unregistered; dm: none; conn: unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
fmgfaz-managed 297      FGM010000077649 - 10.1.0.254      NGFW-1        Core  6.00741 (extended) 7.0 HR2 (1396) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: autoupdated; conn: up
|- vdom:[3]root flags:0 adom:Core pkg:[imported]NGFW-1
fmgfaz-managed 321      FGM010000077651 - 100.64.3.1      Spoke-1        Core  6.00741 (extended) 7.0 HR2 (1396) N/A
|- STATUS: dev-db: modified; conf: in sync; cond: Modified (recent auto-updated); dm: autoupdated; conn: up
|- vdom:[3]root flags:1 adom:Core pkg:[out-of-sync]Spokes
fmgfaz-managed 333      FGM010000077652 - 100.64.5.1      Spoke-2        Core  6.00741 (extended) 7.0 HR2 (1396) N/A
|- STATUS: dev-db: modified; conf: in sync; cond: Modified (recent auto-updated); dm: autoupdated; conn: up
|- vdom:[3]root flags:1 adom:Core pkg:[out-of-sync]Spokes
  
```

What can you conclude about the Spoke-1 and Spoke-2 configurations with respect to the information cond: Modified (recent auto-updated)?

- A. Spoke-1 and Spoke-2 are sharing the same security policy configuration and the same policy package.
- **B. On NGFW-A, the configuration was changed and spokes are waiting for an autoupdate.**
- C. Based on the policy configuration on NGFW-1, the configuration on both spokes is modified and automatically updated.
- D. On both Spoke-1 and Spoke-2, the configuration was changed directly on the FortiGate device, and the changes were automatically retrieved by the device database.

Answer: B

NEW QUESTION # 73

You want to improve reliability over a lossy IPSec tunnel.

Which combination of IPSec phase 1 parameters should you configure?

- A. keepalive and keylive
- B. fragmentation and fragmentation-mtu
- **C. fec-ingress and fsc-egress**
- D. dpd and dpd-retryinterval

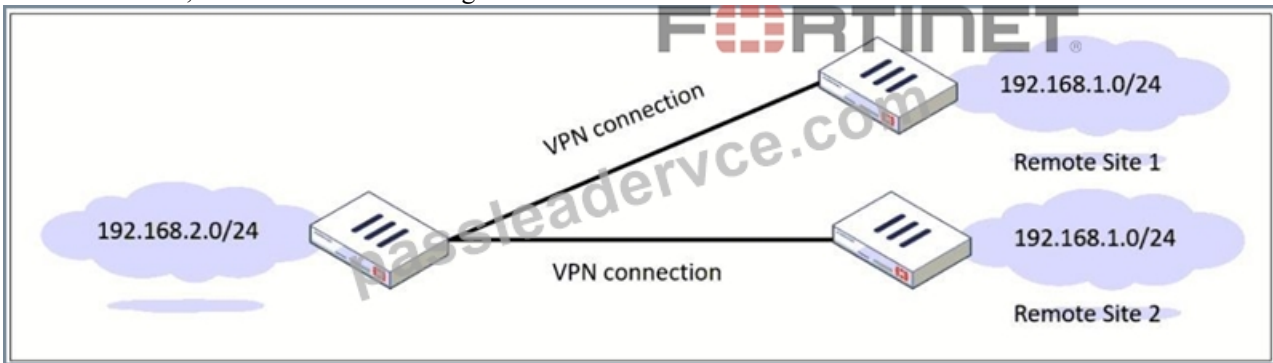

Answer: C

Explanation:

It improves reliability that can overcome adverse WAN conditions such as lossy or noisy links.

NEW QUESTION # 74

Refer to the exhibit, which shows a network diagram.

Which IPsec phase 2 configuration should you implement so that only one remote site is connected at any time?

- A. Set net-device to enable
- B. Set single-source to enable
- C. Set route-overlap to either use-new or use-old
- D. Set route-overlap to allow.

Answer: C

Explanation:

To ensure that only one remote site is connected at any given time in an IPsec VPN scenario, you should use route-overlap with the option to either use-new or use-old. This setting dictates which routes are preferred and how overlaps in routes are handled, allowing for one connection to take precedence over the other (C).

NEW QUESTION # 75

Which two statements about ADVPN are true? (Choose two.)

- A. The hub adds routes based on IKE negotiations.
- B. All FortiGate devices must be in the same autonomous system (AS).
- C. You must disable add-route in the hub.
- D. You must configure phase 2 quick mode selectors to 0.0.0.0 0.0.0.0.

Answer: C,D

Explanation:

C: The hub adds routes based on IKE negotiations: This is part of the ADVPN functionality where the hub learns about the networks behind the spokes and can add routes dynamically based on the IKE negotiations with the spokes.

D: You must configure phase 2 quick mode selectors to 0.0.0.0 0.0.0.0: This wildcard setting in the phase 2 selectors allows any-to-any tunnel establishment, which is necessary for the dynamic creation of spoke-to-spoke tunnels.

These configurations are outlined in Fortinet's documentation for setting up ADVPN, where the hub's role in route control and the use of wildcard selectors for phase 2 are emphasized to enable dynamic tunneling between spokes.

NEW QUESTION # 76

Refer to the exhibit, which contains a partial OSPF configuration.

```

config router ospf
  set router-id 0.0.0.3
  set restart-mode graceful-restart
  set restart-period 30
  set restart-on-topology-change enable
  ...
end

```

What can you conclude from this output?

- A. The restarting router sends gratuitous ARP for 30 seconds.
- B. Neighbors maintain communication with the restarting router.
- C. FortiGate restarts if the topology changes.
- **D. The router sends grace LSAs before it restarts.**

Answer: D

Explanation:

From the partial OSPF (Open Shortest Path First) configuration output:

B). The router sends grace LSAs before it restarts: This is implied by the command 'set restart-mode graceful-restart'. When OSPF is configured with graceful restart, the router sends grace LSAs (Link State Advertisements) to inform its neighbors that it is restarting, allowing for a seamless transition without recalculating routes.

Fortinet documentation on OSPF configuration clearly states that enabling graceful restart mode allows the router to maintain its adjacencies and routes during a brief restart period.

NEW QUESTION # 77

.....

PassLeaderVCE is a reputable platform that has been providing valid, real, updated, and free Fortinet NSE 7 - Enterprise Firewall 7.2 NSE7_EFW-7.2 Exam Questions for many years. PassLeaderVCE is now the customer's first choice and has the best reputation in the market. Fortinet NSE7_EFW-7.2 Actual Dumps are created by experienced and certified professionals to provide you with everything you need to learn, prepare for, and pass the difficult Fortinet NSE7_EFW-7.2 exam on your first try.
