GARP Sustainability and Climate Risk Sample Questions (Q20-Q25):

NEW QUESTION # 20

A European bank surveyed its most prominent clients to assess interest in sustainability-linked loans (SLLs) and green loans. The survey came after a recent study showed higher profitability rates of SLLs and green products than classical banking products. After positive feedback, the bank decides to introduce SLLs and green loans. The bank's sustainability loan officer writes a new loan product guideline for corporate clients that explains SLLs and green loans.

How will the bank officer describe these loan types?

- A. SLLs require external review, while green loans require external review if the loan information is not publicly available.
- **B. SLLs incentivize borrowers through margins, while green loans focus on the purpose of the loan.**
- C. Market participants are unable to structure a loan to meet both the characteristics of a green loan and an SLL.
- D. Green loans can be applied more broadly on the corporate loan market than SLLs since there are no predetermined performance targets for SLLs.

Answer: B

NEW QUESTION # 21

Organizers of an upcoming UN Climate Change Conference prepare a document highlighting successes and failures of climate accords over the last 20 years.

The document lists what success from the 2009 Copenhagen Accord?

- A. Binding short-term GHG emissions reduction commitments
- B. Unconditional emissions reduction targets by Annex II parties
- C. Establishment of a uniform emissions reduction target baseline
- **D. Acceptance of a quantitative long-term global warming limit**

Answer: D

NEW QUESTION # 22

A financial services firm in South America evaluates climate-related financial risks and opportunities to align with ISSB reporting standards. The firm initiates a scenario analysis to determine potential impacts on its investment portfolio. To enable a thorough assessment, which climate scenario input parameter should the firm prioritize in the analysis?

- A. Net earnings
- B. Asset allocation
- **C. Carbon price**
- D. Employee productivity

Answer: C

NEW QUESTION # 23

To improve sustainability, a railroad and transportation services company will revitalize its rail network by installing an operating system that reduces idle time. A reduction in idle time will decrease GHG emissions.

To finance this plan, the company will issue green bonds beginning in 2024. The company sustainability director develops sustainability objectives and eligibility criteria to communicate to investors.

The director is fulfilling which core component of the Green Bond Principles?

- **A. Process for project evaluation and selection**
- B. Management of proceeds
- C. Reporting
- D. Use of proceeds

Answer: A

NEW QUESTION # 24

After launching new large-scale sites for engine testing, a global automaker prepares a GHG inventory report according to the GHG Protocol. An analyst on the sustainability team gathers data for the assessment. The analyst identifies emissions from production processes, previously deemed irrelevant at the corporate level, now constitute over 25% of company aggregated GHG emissions across plant sites.

Which GHG Protocol principle did the company analyst follow?

- A. Transparency
- **B. Completeness**
- C. Consistency
- D. Accuracy

Answer: B

NEW QUESTION # 25
